## GROOVYPETS 800 Feet Remote Dog Trainer Training Collar System (B0164PVDRS)

# Groovypets® Remote Dog Trainer Training Collar System

## USER MANUAL

### Introduction

---

Thank you for choosing the Groovypets® Remote Dog Trainer Training Collar System. This system is designed to assist in effective and humane dog training, helping to correct unwanted behaviors and reinforce positive ones. With a remote range of up to 800 feet (approximately 240 meters), this system provides reliable control for various training scenarios. Please read this manual thoroughly before use to ensure proper operation and the safety of your pet.

### Package Contents

---

Your Groovypets® Remote Dog Trainer Training Collar System package includes the following components:

- 1 x Remote Transmitter
- 2 x Receiver Collars (White)
- 1 x 9V Battery (for Remote)
- 2 x Adjustable Collar Straps
- 1 x User Manual (this document)

Figure 1: Overview of the Groovypets Remote Dog Trainer Training Collar System components.

## Product Features

---

- **Extended Range:** Operates effectively up to 800 feet (approximately 240 meters).
- **Multiple Correction Modes:** Features strong, humane vibration and static shock corrections.
- **Adjustable Shock Levels:** Low (L1/L2) and High (H1/H2) shock levels to suit different dog sensitivities and sizes. Low level is half the intensity of the high level.
- **Intuitive Remote Design:** Color-coded buttons for easy operation and quick access to commands.
- **Dual Dog Control:** Dedicated buttons (V1, V2) for individual dog vibration commands and a combined button (V) for both dogs.
- **Comfortable Fit:** Adjustable collar straps fit dogs with neck sizes from 6 to 25 inches (15cm to 65cm).
- **Durable Construction:** Remote features an upgraded rubberized coating for improved grip and durability.
- **Night Visibility:** Collar receivers include a glowing red light for visibility in low-light conditions.

## Setup Guide

---

### 1. Installing the Remote Battery

1. Locate the battery compartment on the back of the remote transmitter.

2. Open the battery cover.
3. Insert the provided 9V battery, ensuring correct polarity (+/-).
4. Close the battery cover securely.

*Figure 2: Back view of the remote transmitter.*

## **2. Attaching the Collar Straps to Receivers**

The receiver units are designed to be attached to the adjustable collar straps. Thread the strap through the designated slots on the receiver unit.

## **3. Fitting the Collar on Your Dog**

Proper fit of the collar is crucial for effective operation and your dog's comfort and safety.

- Place the receiver collar around your dog's neck, ensuring the contact points are positioned underneath, touching the skin.
- Adjust the strap so it is snug but not too tight. You should be able to fit one or two fingers comfortably between the strap and your dog's neck.
- The collar should not be worn for more than 12 hours a day. Regularly check the contact area for any signs of irritation.

## Operating Instructions

---

The remote transmitter features color-coded buttons for intuitive control of the receiver collars.

Figure 4: Remote Transmitter Button Layout.

#### Remote Button Functions:

- **V1 (Blue):** Activates vibration for Dog 1.
- **V2 (Blue):** Activates vibration for Dog 2.
- **V (Blue, center):** Activates vibration for both Dog 1 and Dog 2 simultaneously. This can be used for a general warning or to address both dogs at once.
- **L1 (Red):** Activates low-level static shock for Dog 1. This level is half the intensity of the high level and is suitable for

smaller or more sensitive dogs.

- **L2 (Red):** Activates low-level static shock for Dog 2.
- **H1 (Red):** Activates high-level static shock for Dog 1. This level provides a more powerful jolt for larger or more headstrong/insensitive dogs.
- **H2 (Red):** Activates high-level static shock for Dog 2.

When a button is pressed, the corresponding receiver will deliver a single, controlled correction (vibration or shock). The system is designed to prevent prolonged or unnecessary corrections.

### Training Tips:

- **Start with Vibration:** Always begin training with the vibration mode. Many dogs respond well to vibration alone.
- **Introduce Shock Gradually:** If vibration is ineffective, introduce the low-level shock. Only use the high level if necessary and after careful observation of your dog's reaction.
- **Timing is Key:** Deliver corrections immediately as the unwanted behavior occurs to help your dog associate the correction with the action.
- **Positive Reinforcement:** Always pair corrections with positive reinforcement when your dog performs the desired behavior.
- **Short Training Sessions:** Keep training sessions short and positive to maintain your dog's engagement.
- **Consistency:** Be consistent with commands and corrections.

## Maintenance

- **Cleaning:** Wipe the remote and receiver collars with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Battery Care:** Replace the 9V battery in the remote when the indicator light dims or the remote's range decreases.
- **Storage:** Store the system in a cool, dry place when not in use. Keep out of reach of children and pets.
- **Collar Inspection:** Regularly inspect the collar strap and receiver for any signs of wear or damage. Ensure the contact points are clean.

## Troubleshooting

Problem	Possible Cause	Solution
Remote not turning on.	Dead or incorrectly installed 9V battery.	Replace the 9V battery, ensuring correct polarity.
Collar not responding to remote.	Out of range; low battery in remote; collar not powered on or paired.	Move closer to the dog; replace remote battery; ensure collar is active and properly paired.
Correction seems weak or inconsistent.	Poor contact with dog's skin; collar too loose; dog's fur too thick.	Adjust collar for snug fit; trim fur around contact points if necessary.
Dog shows no reaction to correction.	Correction level too low; dog is desensitized.	Increase correction level (start with low shock, then high if needed); ensure proper contact.

## Specifications

- **Model:** Groovypets® 800 Feet Remote Dog Trainer Training Collar System
- **Remote Range:** Up to 800 feet (approx. 240 meters)

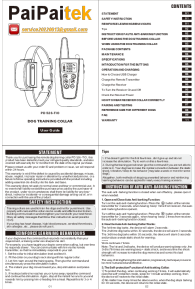

- **Collar Fit:** Adjustable strap fits neck sizes 6-25 inches (15cm-65cm)
- **Remote Battery:** 1 x 9V battery (included)
- **Correction Modes:** Vibration (V1, V2, V), Low Static Shock (L1, L2), High Static Shock (H1, H2)
- **Manufacturer:** GROOVYPETS
- **ASIN:** B0164PVDRS
