## De'Longhi SER3017

# De'Longhi SER3017 Water Filter Instruction Manual

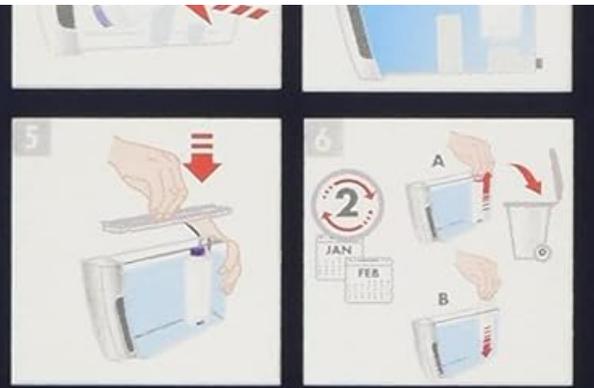

## INTRODUCTION

This manual provides essential information for the proper installation, operation, and maintenance of your De'Longhi SER3017 Water Filter. This filter is designed to improve water quality for your De'Longhi coffee machine, enhancing the taste of your beverages and protecting the appliance from limescale buildup. Please read these instructions carefully before use.

## PRODUCT OVERVIEW

The De'Longhi SER3017 Water Filter is an Original Equipment Manufacturer (OEM) authorized part, specifically engineered for various De'Longhi coffee machine models. It utilizes activated carbon to reduce sediment and improve water quality.

For USA and Canada distributed by:  
De'Longhi America Inc.  
Upper Saddle River, NJ 07458

Importowano do Polski przez:  
De'Longhi Polska Sp. zoo.o  
Ul. Putawska 303 - 02- 785 Warszawa

## Key Features

- O.E.M. authorized part for guaranteed compatibility and performance.
- Reduces sediment and improves water quality.
- Contains activated carbon for effective filtration.
- Manufactured in the United States.

## Compatibility

The SER3017 Water Filter is compatible with various De'Longhi models. Please verify your machine's compatibility before installation. Known compatible models include:

- 3066
- 3067
- 3093
- 3094
- 3111
- 3112
- KF140
- KF759

## SETUP INSTRUCTIONS

Follow these steps to properly install your new De'Longhi SER3017 Water Filter:

1. **Unpack the Filter:** Remove the water filter from its packaging.
2. **Rinse the Filter:** Hold the filter under running cold water for approximately 2 minutes to remove any loose carbon particles and prepare it for use.
3. **Insert into Water Tank:** Locate the water tank in your De'Longhi coffee machine. Insert the rinsed filter into the designated slot at the bottom of the water tank. Ensure it is securely seated.
4. **Fill Water Tank:** Fill the water tank with fresh, cold water up to the maximum level indicator.
5. **Prime the Filter:** Place a container under the hot water spout of your coffee machine. Activate the hot water function to allow water to flow through the filter and machine until approximately 0.5 liters (500ml) of water has been dispensed. This primes the filter and removes any air.
6. **Reinstall Water Tank:** Carefully reinsert the water tank into your coffee machine.

## OPERATING THE WATER FILTER

Once installed and primed, the De'Longhi SER3017 Water Filter operates automatically, continuously filtering the water used by your coffee machine. It works to reduce impurities and hardness, which contributes to a better-tasting coffee and helps prevent limescale buildup in the machine's internal components. No further user interaction is required for its daily operation.

## MAINTENANCE AND REPLACEMENT

Regular replacement of the water filter is crucial for maintaining optimal water quality and protecting your coffee machine.

### Filter Lifespan

The De'Longhi SER3017 Water Filter typically lasts for approximately 2 to 3 months, depending on water hardness and frequency of use. Your coffee machine may also have an indicator light or message to prompt filter replacement. Always refer to your specific coffee machine's manual for exact recommendations and instructions regarding filter replacement indicators.

## Replacement Procedure

1. **Remove Old Filter:** Empty the water tank and carefully remove the old water filter from its slot.
2. **Dispose:** Dispose of the used filter responsibly.
3. **Install New Filter:** Follow the "Setup Instructions" provided in this manual for installing a new filter, including rinsing and priming.
4. **Reset Machine (if applicable):** If your coffee machine has a filter replacement indicator, follow the machine's instructions to reset it after installing the new filter.

## TROUBLESHOOTING

If you encounter issues related to your water filter, consider the following:

- **Poor Water Flow:** Ensure the filter is correctly seated in the water tank. If the filter is old, it may be clogged and require replacement.
- **Coffee Taste Not Improving:** Verify that the filter was properly rinsed and primed during installation. If the filter is nearing the end of its lifespan, its effectiveness may decrease, necessitating replacement.
- **Machine Alerts:** If your coffee machine displays a specific alert related to the water filter, consult your coffee machine's user manual for detailed troubleshooting steps.
- **Limescale Buildup:** While the filter reduces limescale, it does not eliminate the need for periodic descaling of your coffee machine, especially in areas with very hard water. Follow your machine's descaling instructions.

## PRODUCT SPECIFICATIONS

Specification	Detail
Model Number	SER3017 (also known as DLS C002)
Brand	De'Longhi
Material	Activated carbon
Product Dimensions	2"D x 2.5"W x 5"H (approximately)
Item Weight	10 Grams (0.353 ounces)
Product Benefits	Reduces Sediment
External Testing Certification	NSF
Unit Count	1 Count
Manufacturer	DeLonghi

Specification	Detail
Date First Available	September 10, 2015

## WARRANTY AND SUPPORT

---

As an O.E.M. authorized part, the De'Longhi SER3017 Water Filter is manufactured to high standards. For specific warranty information, please refer to the documentation included with your original De'Longhi coffee machine or visit the official De'Longhi website. For product support or inquiries, please contact De'Longhi customer service directly.
