KAWADA NBC-168

Kawada Nanoblock NBC-168 Golden Retriever Micro Block Miniature Collection Puzzle Instruction Manual

1. Product Overview

The Kawada Nanoblock NBC-168 Golden Retriever Micro Block Miniature Collection Puzzle allows you to construct a detailed miniature model of a Golden Retriever using micro-sized building blocks. This set is part of the Nanoblock Miniature Collection series, known for its intricate designs and small block size, offering a challenging yet rewarding building experience.

This image displays the packaging for the Kawada Nanoblock Golden Retriever set, model NBC-168. The package shows the completed Golden Retriever model made from micro-sized building blocks, along with the Nanoblock logo, product name, and piece count (140 pieces).

2. Setup and Assembly

This Nanoblock set contains 140 micro-sized building blocks and detailed assembly instructions. Follow the steps below to construct your Golden Retriever model.

1. **Unpack Components:** Carefully open the packaging and remove all block pieces and the instruction booklet. Ensure all pieces are present before beginning assembly.
2. **Review Instructions:** Thoroughly read the included assembly instructions. Nanoblock models often require careful attention to detail due to the small size of the blocks. The instructions will provide step-by-step diagrams for construction.
3. **Organize Blocks:** For easier assembly, sort the blocks by color and size. This can significantly reduce assembly time and frustration.

4. **Begin Assembly:** Follow the diagrams in the instruction booklet precisely. Start from the base and build upwards, ensuring each block is securely connected to the previous one.
5. **Verify Connections:** Due to the small size, ensure blocks are firmly pressed together to prevent the model from falling apart during construction or display.
6. **Completion:** Once all steps in the instruction booklet are followed, your Nanoblock Golden Retriever model will be complete.

Note: The difficulty level for this model is indicated on the packaging. Patience and precision are key for successful assembly.

3. Operating and Display

Once assembled, your Nanoblock Golden Retriever model is ready for display.

- **Placement:** Choose a stable, flat surface for display to prevent accidental falls.
- **Environment:** Avoid placing the model in direct sunlight or in areas with extreme temperature fluctuations, as this may affect the plastic over time.
- **Handling:** Handle the model gently. While the blocks are designed to interlock securely, excessive force or dropping can cause pieces to detach.

4. Maintenance

To keep your Nanoblock model in optimal condition, follow these simple maintenance guidelines:

- **Cleaning:** Dust can accumulate on the model over time. Use a soft, dry brush (like a clean makeup brush or a soft toothbrush) to gently remove dust. Avoid using water or chemical cleaners, as these may damage the blocks or cause discoloration.
- **Storage:** If you need to store the model, place it in a sturdy container to protect it from dust and physical damage.

5. Troubleshooting

Encountering issues during assembly or with your completed model? Here are some common troubleshooting tips:

- **Missing Pieces:** Double-check the packaging and your work area thoroughly. Due to their micro size, blocks can be easily overlooked. If pieces are genuinely missing, contact Kawada customer support.
- **Difficulty Connecting Blocks:** Ensure blocks are aligned correctly before applying pressure. Sometimes a slight twist or adjustment is needed. Avoid excessive force, which could damage the blocks.
- **Model Instability:** If the model feels unstable, re-examine the connections of the lower layers. Loose connections can affect the overall stability. Refer back to the instruction manual to ensure all steps were followed correctly.
- **Disassembly:** If you need to disassemble parts, use a block separator tool (if available) or carefully pry blocks apart using a thin, flat object. Avoid using sharp objects that could scratch the blocks.

6. Specifications

Feature	Detail
Brand	KAWADA

Model Number	NBC-168
Product Name	Golden Retriever Micro Block Miniature Collection Puzzle
Number of Pieces	140
Recommended Age	13 - 15 years (Manufacturer Recommended)
Product Dimensions	18 x 11 x 1 cm (Packaging)
