Skywalker Trampolines CK7015

Skywalker Trampolines 15-Foot Round Jump Mat Instruction Manual

Model: CK7015

1. PRODUCT OVERVIEW

This document provides essential information for the Skywalker Trampolines 15-foot Round Jump Mat, Model CK7015. This jump mat is designed as a replacement component for compatible Skywalker Trampolines models, ensuring continued safe and enjoyable use of your trampoline.

Key Features

- **Safety Tested:** All Skywalker Trampolines products are tested for safety and durability to meet or exceed all ASTM standards.
- **Durable Material:** Constructed from UV-protected polypropylene, woven to prevent slipping and ensure longevity.
- **Reinforced V-Rings:** Features reinforced V-rings for secure and easy attachment to the enclosure net and springs.

2. SAFETY INFORMATION

Your safety is paramount. Adhere to the following guidelines to ensure a safe trampoline experience:

- **Adult Supervision:** Always ensure adult supervision when the trampoline is in use.
- **One Jumper at a Time:** Only one person should use the trampoline at any given time to prevent collisions and injuries.

- **Regular Inspection:** Periodically inspect the jump mat, springs, frame, and enclosure net for wear, damage, or loose components. Replace any damaged parts immediately.
- **Proper Installation:** Ensure the jump mat is installed correctly and securely according to the instructions provided in this manual.
- **Clear Area:** Keep the area around the trampoline clear of obstacles.
- **No Flips or Stunts:** Avoid performing flips or dangerous stunts without proper training and supervision.

3. IDENTIFYING YOUR TRAMPOLINE MODEL

Before purchasing or installing a replacement jump mat, it is crucial to verify your trampoline's model number to ensure compatibility. An incorrect mat size or V-ring count can lead to improper fit and safety hazards.

How to Find Your Model Number

Your trampoline's model number can typically be found in one of the following locations:

- On a white tag located on the underside of your original jump mat.
- On a tag attached to the enclosure net.
- On a tag attached to your spring pad.

Always cross-reference this number with the compatibility list for the replacement part.

Compatible Models for 15-Foot Round Jump Mat (CK7015)

This 15-foot round jump mat (CK7015) is compatible with the following Skywalker Trampolines models:

- SWJD15B
- SWJD15C
- SWJD15G
- SWJD15P
- SWJD15R
- SWJD15SS
- OWTC15
- SWSA1500
- SWTC1500
- SWTC1500WS
- SWTC1511
- SWTC1513
- SWTC1515
- SWTC15P

4. INSTALLATION INSTRUCTIONS

Follow these steps carefully to replace your trampoline jump mat. It is recommended to have at least two adults for safe installation.

Before You Begin

- Ensure you have the correct replacement jump mat (Model CK7015) for your trampoline size and model.
- Gather necessary tools, which may include a spring pull tool (often included with new trampolines or replacement spring kits).
- Clear the area around the trampoline of any obstructions.

Step-by-Step Installation

1. **Remove Old Mat:** Carefully detach all springs from the old jump mat and the trampoline frame. Remove the old mat and set it aside for disposal.
2. **Inspect Components:** Inspect the trampoline frame for any damage, rust, or sharp edges. Check all springs for stretching, rust, or breakage. Replace any damaged springs before installing the new mat.
3. **Position New Mat:** Unfold the new jump mat and center it on the trampoline frame. Ensure the V-rings are facing upwards.
4. **Attach First Springs:** Attach four springs at 12, 3, 6, and 9 o'clock positions (evenly spaced around the frame). This helps to center the mat and distribute tension. Use a spring pull tool if available.
5. **Attach Remaining Springs:** Continue attaching springs in a symmetrical pattern. For example, attach two springs opposite each other, then two more opposite each other, and so on. This ensures even tension and prevents overstretching one side of the mat.
6. **Verify Attachment:** Double-check that all springs are securely attached to both the jump mat's V-rings and the trampoline frame.
7. **Install Enclosure Net (if applicable):** If your trampoline has an enclosure net that attaches to the V-rings, reattach it now according to your trampoline's specific instructions.

5. OPERATION AND USAGE

Once the jump mat is correctly installed, the trampoline is ready for use. Always follow general trampoline safety rules:

- Ensure the trampoline is on a level surface.
- Always enter and exit the trampoline carefully.
- Avoid jumping off the trampoline onto the ground.
- Do not use the trampoline in wet or windy conditions.
- Educate all users on safe jumping techniques.

6. MAINTENANCE AND CARE

Proper maintenance extends the life of your jump mat and ensures continued safety.

Cleaning Instructions

- Clean the jump mat with mild soap and water. Avoid harsh chemicals or abrasive cleaners.

- Rinse thoroughly with water and allow to air dry completely before use.

Inspection Schedule

Perform regular inspections:

- **Before Each Use:** Quickly check for any obvious damage, tears, or loose springs.
- **Weekly:** Conduct a thorough inspection of the jump mat for tears, fraying, or holes. Check all V-rings for deformation or detachment. Inspect springs for stretching, rust, or breakage. Examine the frame for structural integrity.
- **Seasonally:** Perform a comprehensive inspection at the beginning and end of the jumping season. Consider disassembling and storing the trampoline during off-seasons to protect it from extreme weather.

Storage Recommendations

If storing the trampoline for an extended period:

- Clean and dry the jump mat thoroughly.
- Store the mat in a cool, dry place away from direct sunlight and extreme temperatures to prevent material degradation.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your jump mat.

Common Issues and Solutions

- **Mat Does Not Fit:**
Solution: Double-check your trampoline's model number and the size of the replacement mat. Ensure the number of V-rings on the mat matches the number of springs on your trampoline. An incorrect size will not fit properly and is unsafe.
- **Reduced Bounce:**
Solution: Inspect all springs. Stretched, rusted, or broken springs can reduce bounce. Replace any compromised springs. Also, ensure the mat is clean and dry.
- **Tears or Holes in Mat:**
Solution: Small tears can sometimes be repaired with specialized trampoline repair kits, but for significant damage, the mat must be replaced immediately to ensure safety.
- **V-Rings Detached or Damaged:**
Solution: If V-rings are detached or severely damaged, the mat's integrity is compromised. The mat should be replaced.

8. SPECIFICATIONS

Detailed specifications for the Skywalker Trampolines 15-Foot Round Jump Mat (Model CK7015).

Specification	Detail
Product Dimensions	457.2 x 457.2 x 457.2 cm (4.57L x 0.13W x 4.57H meters)
Item Weight	5.94 kg

Model Number	CK7015
Brand	Skywalker Trampolines
Material	UV-protected Polypropylene (Other)
Frame Size Compatibility	15 feet (Round)
Color	Black
Included Components	Jump mat, V-rings
GTIN (Global Trade Identification Number)	00818567012318

9. WARRANTY INFORMATION

The Skywalker Trampolines 15-Foot Round Jump Mat (Model CK7015) comes with a **1-year limited warranty** on parts. This warranty covers manufacturing defects under normal use and service.

For specific warranty claims or details, please refer to the original product documentation or contact Skywalker Trampolines customer support.
