National Tree Company PEV3-311-75

National Tree Company 7.5 ft Pre-Lit Snowy Everest Fir Artificial Christmas Tree

Model: PEV3-311-75

Product Overview

The National Tree Company Pre-Lit Snowy Everest Fir Artificial Christmas Tree is designed to provide a realistic and festive display. Standing 7.5 feet tall with a 53-inch diameter base, this tree features 1,619 branch tips with 'Feel Real' technology for enhanced realism. It comes pre-strung with 450 UL listed clear lights and includes a sturdy metal stand. The tree is constructed with a hinged branch system for straightforward assembly and storage. Needles are fire-resistant and non-allergenic.

Setup Instructions

1. **Unpack Components:** Carefully remove all tree sections, the metal stand, and any accessories from the reusable storage carton. Ensure all plastic protective caps are retained for future storage.
2. **Assemble the Stand:** Unfold the metal tree stand into an 'X' shape. Insert the provided screw into the stand's collar and tighten it to secure the legs.
3. **Insert Bottom Section:** Place the bottom section of the tree into the assembled stand. Ensure it is firmly seated and the pole is straight.
4. **Insert Middle and Top Sections:** Continue by inserting the middle section into the bottom section, followed by the top section. The hinged branches will fall into place.
5. **Connect Lights:** The tree features a pre-strung lighting system. Connect the light cords between each section.

6. **Shape the Branches:** After assembly, allow 45-60 minutes to properly shape the tree. Gently peel back the branches and pull the tips apart to achieve a full-bodied appearance. Adjust individual branches to fill any gaps.
7. **Plug In:** Connect the tree's power cord to a suitable electrical outlet.

Visual Guide: Tree Assembly

Operating Instructions

This artificial Christmas tree is pre-strung with 450 UL listed clear incandescent lights. Once assembled and plugged into a power source, the lights will illuminate. The lights operate individually, meaning if one bulb burns out or is damaged, the remaining lights on the strand will continue to function, provided the bulb lens is not cracked or broken.

Maintenance

- **Needle Care:** The tree features hypo-allergenic and fire-resistant needles, requiring minimal maintenance.
- **Light Bulb Replacement:** In the event of a non-functioning bulb, replace it with a spare bulb of the same type and wattage.

Refer to the included spare parts for replacements.

- **Storage:** When disassembling the tree for storage, carefully collapse the hinged branches. Place the plastic protective caps back onto the ends of each section to prevent damage during storage. Store the tree in its original reusable carton or a suitable tree storage bag in a cool, dry place.

Troubleshooting

- **Lights Not Illuminating:** Ensure all sections are properly connected and the main power cord is securely plugged into a working outlet. Check for any loose or broken bulbs. Due to individual bulb operation, a single faulty bulb will not affect the entire strand.
- **Tree Appears Sparse:** Artificial trees require thorough shaping after assembly. Dedicate 45-60 minutes to carefully separate and spread out each branch tip to achieve a full and natural appearance.
- **Flocking Shedding:** Some minimal shedding of the flocked material is normal during initial setup and handling. This typically reduces over time.

Specifications

Feature	Detail
Brand	National Tree Company
Model Number	PEV3-311-75
Height	7.5 ft
Base Diameter	53 inches
Branch Tips	1,619
Lights	450 UL listed clear incandescent lights
Material	Polyvinyl Chloride (PVC)
Item Weight	37.2 pounds
