Triangle ELARA LN02 Center Channel Speaker User Manual

Model: LN02

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your Triangle ELARA LN02 Center Channel Speaker. The LN02 is a compact 2-way bass reflex speaker designed to deliver clear and dynamic sound reproduction, seamlessly integrating into your home theater system. Please read this manual thoroughly before using the product to ensure optimal performance and safety.

Figure 1: Front view of the ELARA LN02 speaker, showcasing its two woofers, central tweeter, and two front-facing bass ports.

2. SAFETY INFORMATION

To prevent fire, electric shock, or product damage, please observe the following safety precautions:

- Do not expose the speaker to rain or moisture.
- Do not place objects filled with liquids, such as vases, on the speaker.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Only use attachments/accessories specified by the manufacturer.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way.

3. PACKAGE CONTENTS

Carefully unpack your ELARA LN02 speaker and ensure all items are present:

- Triangle ELARA LN02 Center Channel Speaker
- User Manual (this document)

If any items are missing or damaged, please contact your retailer immediately.

4. KEY FEATURES

The Triangle ELARA LN02 speaker incorporates advanced design and engineering to deliver superior audio performance:

- **Compact 2-Way Design:** The LN02 uses a two-way configuration to produce detailed mids and highs while maintaining a rich low-end response, all in a compact enclosure perfect for discreet home integration.
- **Sonic Harmony Across ELARA Range:** Utilizing identical membrane materials across the ELARA series, the LN02 ensures consistent tonal quality when used with other Triangle components in a multi-channel setup.
- **Optimized Sensitivity:** With a sensitivity of 89 dB/W/m, the speaker delivers powerful, clear sound with modest amplifier requirements, ideal for a wide range of home audio systems.
- **Space-Saving Front Reflex Porting:** Front-mounted bass reflex ports allow for flexible placement options, including inside media cabinets, without muffling low-frequency performance.
- **Crafted in France:** Built by Triangle, a trusted name in high-fidelity sound, the LN02 combines decades of audio expertise with European craftsmanship.

Figure 2: The ELARA LN02 speaker with its magnetic grille in place, offering a sleek and discreet appearance.

5. SETUP

5.1 Placement

As a center channel speaker, the ELARA LN02 is designed to reproduce dialogue and central sound effects in a home theater system. Optimal placement is crucial for soundstage accuracy:

- Place the speaker directly above or below the center of your television or projection screen.
- Ensure the speaker is at or near ear level when seated in your primary listening position.
- Due to its front-firing bass ports, the LN02 can be placed inside a media cabinet or on a shelf without significant impact on bass performance, but ensure there is some clearance around the speaker for optimal sound dispersion.

5.2 Connections

The ELARA LN02 connects to your AV receiver or amplifier using standard speaker cables. Ensure your amplifier is turned off before making any connections.

1. Identify the positive (+) and negative (-) terminals on the back of your LN02 speaker and on your amplifier's center channel output.
2. Strip approximately 1/2 inch (1.2 cm) of insulation from the ends of your speaker cables.
3. Connect the positive (red) terminal of the speaker to the positive (red) terminal of the center channel output on your amplifier.
4. Connect the negative (black) terminal of the speaker to the negative (black) terminal of the center channel output on your amplifier.
5. Ensure all connections are secure and there are no stray wire strands that could cause a short circuit.

Figure 3: Rear panel of the ELARA LN02, illustrating the speaker cable binding posts for connection to an amplifier.

6. OPERATING

Once the ELARA LN02 speaker is properly connected to your AV receiver or amplifier, you can begin using it as part of your home theater system.

- Turn on your AV receiver/amplifier.
- Select the appropriate input source (e.g., Blu-ray player, streaming device).
- Adjust the volume level on your receiver/amplifier. Start with a low volume and gradually increase it to a comfortable listening level.
- For optimal sound, it is recommended to run your AV receiver's automatic room correction system (e.g., Audyssey, MCACC, YPAO) after connecting all speakers, including the LN02. This will calibrate speaker levels, distances, and equalization for your specific room.

7. MAINTENANCE

To ensure the longevity and pristine appearance of your ELARA LN02 speaker, follow these simple maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to wipe the cabinet surfaces. For stubborn marks, slightly dampen the cloth with water. Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the finish.
- **Grille Care:** The magnetic grille can be gently removed for cleaning. Use a soft brush or a vacuum cleaner with a brush attachment to remove dust from the grille fabric.
- **Driver Protection:** Avoid touching the speaker drivers (woofers and tweeter) directly, as this can cause damage.
- **Placement:** Keep the speaker away from direct sunlight, excessive heat, and high humidity.

8. TROUBLESHOOTING

If you encounter issues with your ELARA LN02 speaker, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No sound from speaker	Loose or incorrect speaker cable connection. Amplifier/receiver not powered on or set to correct input. Speaker output muted or volume too low.	Check all speaker cable connections at both the speaker and amplifier. Ensure polarity (+ to + and - to -) is correct. Verify amplifier/receiver is on and the correct input source is selected. Increase volume and check mute settings on your amplifier/receiver.
Distorted or unclear sound	Overdriving the speaker (volume too high). Loose speaker cable connections. Interference from other electronic devices.	Reduce the volume level. Check and secure all speaker cable connections. Move the speaker or other electronic devices to reduce interference.
Poor bass response	Incorrect amplifier settings (e.g., crossover frequency). Speaker placement issues.	Check your AV receiver's speaker setup menu. Ensure the center channel is set to "Small" if you have a subwoofer, and adjust the crossover frequency (typically 80-100 Hz). If no subwoofer, set to "Large". Ensure the speaker is not placed in a way that obstructs the front bass ports.

9. SPECIFICATIONS

Detailed technical specifications for the Triangle ELARA LN02 Center Channel Speaker:

Attribute	Value
Model Name	ELARA LN02 Center Channel Speaker
Speaker Type	Center Channel
Design	2-Way Bass Reflex
Speaker Maximum Output Power	60 Watts RMS
Connectivity Technology	Speaker Cable
Mounting Type	Tabletop Mount
Color	Gloss White
Product Dimensions (D x W x H)	10.2"D x 19.1"W x 6.5"H
Item Weight	15 Pounds
Manufacturer	Triangle
ASIN	B016ENSK4O
Item Model Number	LN02

Gamme : ELARA

Modèle : LN07
Finition : Laque noir ou blanche

La LN07, munie de ses deux haut-parleurs de 170mm, est le modèle le plus imposant de la gamme. Conçu particulièrement pour des pièces de réception conséquentes, elle saura vous ravir par son dynamisme et sa large scène sonore.

Ce modèle propose l'impact le plus important dans les basses fréquences ainsi qu'une sensibilité plus élevée.

Detailed information on the LED SION CES-EX-LN02-60 Linear Explosion Proof LED Luminaire, including features, electrical specifications, dimensions, suitable applications, and comprehensive installation instructions for hazardous environments.

lang:en **score:14** filesize: 1.78 M page_count: 5 document date: 2025-10-20

Linear Explosion Proof LED Luminaires

FEATURES

- Linear Explosion Proof, CLASS 1, DIVISION 2 rated, Private model
- Linear design allows for easy installation
- LED - 5000K color, high efficiency, long life expectancy
- Available in lengths up to 1700mm
- Temperature protected & vibration resistant, Super clean, 95% light output
- IP65 RATED, Housing: Aluminum alloy
- Maximum LED power: 60W, 100% efficiency
- Anti-Corrosion Protection

SUITABLE APPLICATIONS

Approved in Class 1 Division 2, Groups A, B, C and D, Class II Division 1, Groups E and F, and Class III Hazardous environments

- Wet areas, washrooms, oil and gas refineries, drilling rigs, offshore platforms, petrochemical facilities, chemical plants, coal mines, steel mills, food plants, pharmaceutical plants, breweries, bottling, and other hazardous areas, general lighting for hazardous environments

CONSTRUCTION:

Copper laminated with high quality powder coated together. Lens: tempered glass

OPTICAL SYSTEM:

Luminaires LED chip, high quality transmission, 90° beam angle

WARRANTY:

3 year limited warranty. Actual performance may differ as a result of end-user environment and application.
