

Feit Electric 72041

Feit Electric 72041 String Lights User Manual

Model: 72041

INTRODUCTION

Enhance any outdoor or indoor area with the Feit Electric 72041 30 ft. Incandescent String Lights. These lights are designed to create a warm and inviting ambiance, perfect for gazebos, patios, pergolas, restaurants, backyards, porches, and special occasions. The bulbs are dimmable, offering flexibility to set the perfect mood lighting.

Constructed with commercial-strength, heavy-duty 16/3 SJTW cord, these string lights are built to withstand extreme temperatures and wet weather, ensuring year-round enjoyment. Each 30-foot set includes 10 light sockets spaced 3 feet apart, along with 10 decorative clear incandescent bulbs and 5 spare bulbs. A key feature is that if one bulb goes out, the rest will remain lit, ensuring continuous illumination. Installation is straightforward, and you can easily connect up to 13 sets end-to-end safely to cover larger areas.

WHAT'S IN THE BOX

- 1 x 30' String Light
- 15 x Incandescent Bulbs (10 for use, 5 spare)

SETUP

1. **Unpack and Inspect:** Carefully remove all components from the packaging. Inspect the string light cord,

sockets, and bulbs for any visible damage.

2. **Ensure Power is Off:** Before handling or installing the string lights, ensure they are NOT plugged into any power source. The outlet you plan to use should be outdoor-rated if installing outdoors.
3. **Install Bulbs:** Screw each incandescent bulb firmly into its respective socket. It is crucial to tighten each bulb until it stops moving. This action creates a watertight seal that prevents moisture from getting inside the socket, which is essential for the weather-resistant design.
4. **Plan Your Layout:** Determine the desired path for your string lights. Utilize the integrated hanging loops on each socket for easy installation using hooks, guide wires, or zip ties (not included).
5. **Secure the String Lights:** Hang the string lights along your planned path, ensuring the cord is adequately supported to prevent sagging and strain on the sockets.
6. **Connect to Power:** Once all bulbs are securely installed and the string lights are properly hung, plug the string light set into a suitable power outlet.

**THIS STRING LIGHT SET IS
DESIGNED TO BE WEATHER
RESISTANT. BULBS MUST
BE TIGHTLY SCREWED IN
TO WORK. PLUG IN, AND IF
ANY BULB DOES NOT LIGHT,
TIGHTEN IT FURTHER.**

Image: A crucial warning indicating that bulbs must be tightly screwed in to ensure weather resistance and proper function. If a bulb does not light, further tightening is recommended.

Video: An official product video demonstrating the unpacking, bulb installation, and initial setup of the Feit Electric 72041 string lights, emphasizing the importance of tightening bulbs for a watertight seal.

OPERATING INSTRUCTIONS

- **Power On/Off:** Simply plug the string lights into a live outlet to turn them on. Unplug them to turn them off. For convenience, consider using a compatible outdoor timer or smart plug (sold separately).
- **Dimmable Feature:** These string lights are dimmable. To utilize this feature, connect them to a compatible dimmer switch (sold separately). This allows you to adjust the brightness to create the desired ambiance for any occasion.
- **Connecting Multiple Sets:** For larger installations, you can connect up to 13 sets of Feit Electric 72041 string lights end-to-end. Ensure the total wattage of all connected sets does not exceed the maximum rating of your power circuit.

MAINTENANCE

- **Cleaning:** Periodically clean the bulbs and cords with a soft, dry cloth. Ensure the lights are unplugged before cleaning. Do not use harsh chemicals or abrasive cleaners.
- **Bulb Replacement:** If a bulb burns out, replace it with an 11-watt S14 incandescent bulb with an E26 medium base. Always ensure the string lights are unplugged before replacing any bulbs. Screw the new bulb in tightly to maintain the weather-resistant seal.
- **Weather Resistance Check:** Although designed for weather resistance, periodically check the integrity of the bulb seals and cord for any signs of wear or damage, especially after severe weather conditions. Ensure all bulbs remain tightly screwed in.

TROUBLESHOOTING

- **Lights Not Turning On:**

- Ensure the string lights are securely plugged into a working power outlet.
- Check if the outlet has power by plugging in another device.
- Verify that all bulbs are screwed in tightly. Loose bulbs can prevent the entire string from lighting up.
- Check your circuit breaker if multiple lights or appliances are not working.

- **Individual Bulbs Not Lighting:**

- Tighten the specific bulb that is not lighting up.
- If tightening does not work, replace the bulb with one of the spare bulbs provided or a new compatible bulb.

- **Flickering Lights:**

- Ensure all bulbs are tightly secured in their sockets.
- If using a dimmer, ensure it is compatible with incandescent string lights and functioning correctly.
