## MEE audio AF-T1

# MEE audio Connect Bluetooth Audio Transmitter

Model: AF-T1

### PRODUCT OVERVIEW

The MEE audio Connect Bluetooth Audio Transmitter allows you to stream high-definition stereo sound wirelessly from your TV or other audio sources to up to two Bluetooth headphones or speakers simultaneously. Featuring Qualcomm aptX Low Latency technology, it ensures a high-fidelity, lag-free audio experience, eliminating lip-syncing issues. It supports multiple connectivity options including 3.5mm, RCA, and optical TOSLINK inputs, making it universally compatible with various devices.

Figure 1: MEE audio Connect Bluetooth Audio Transmitter. This compact device enables wireless audio streaming from your

## WHAT'S INCLUDED

Your MEE audio Connect package includes the following items:

- Connect Bluetooth Transmitter
- Micro-USB charging cable
- 3.5mm audio cable
- 3.5mm to RCA adapter
- TOSLINK digital optical SPDIF audio cable

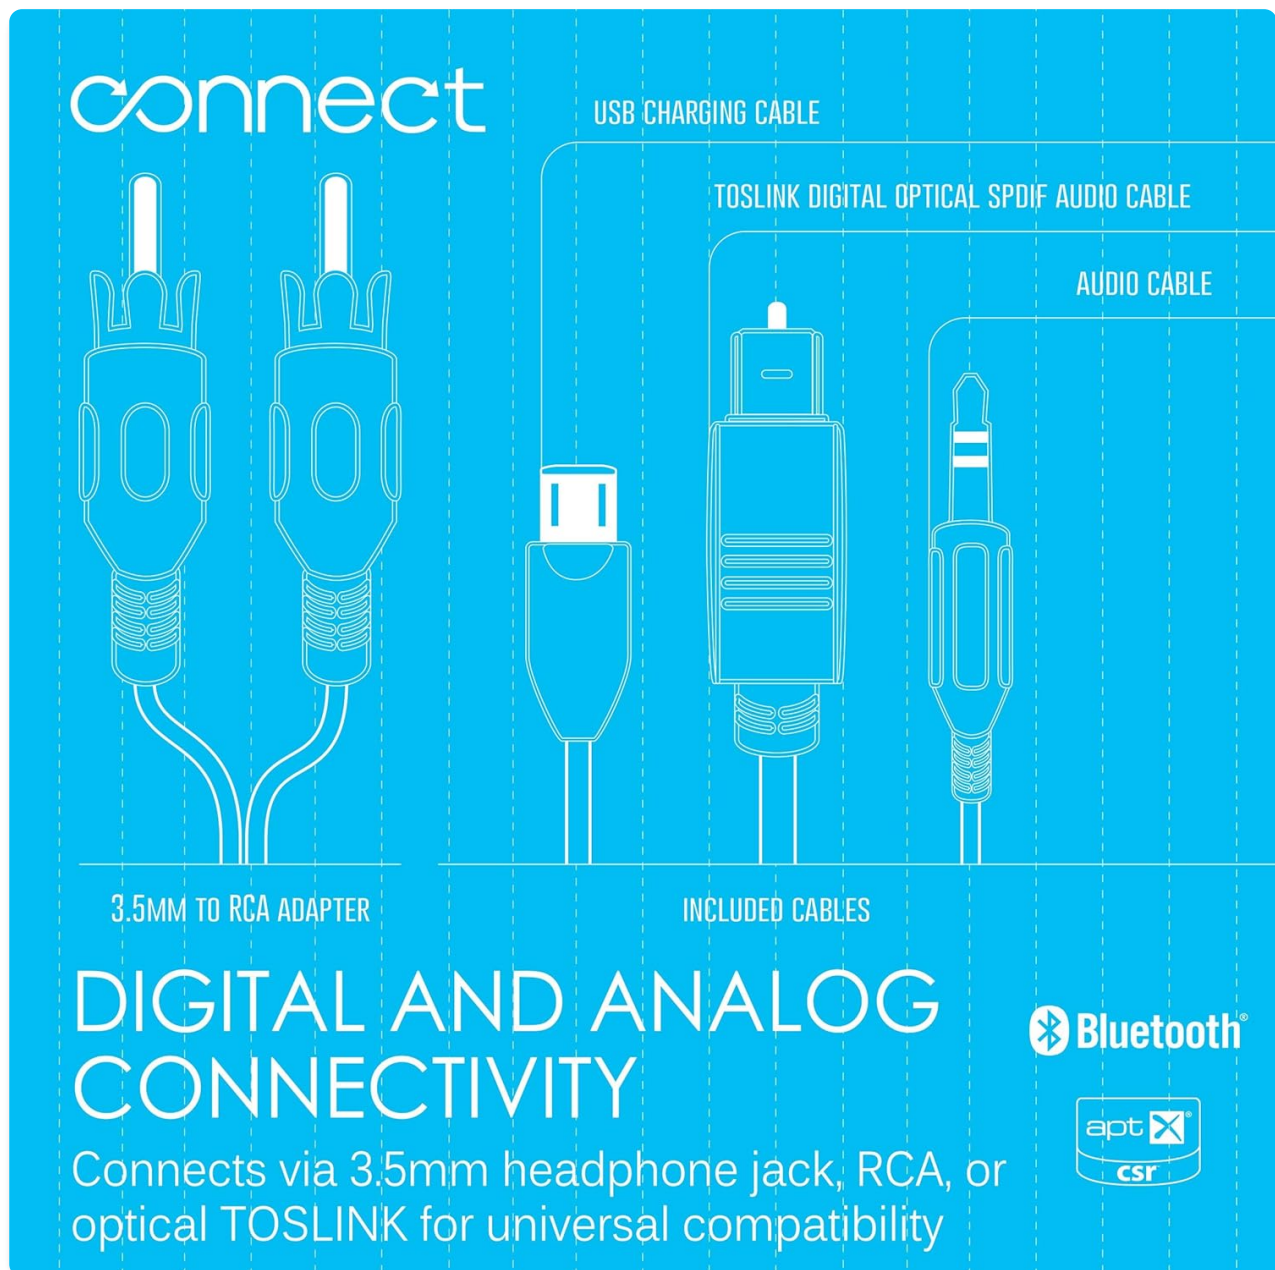

Figure 2: All cables and the Connect transmitter included in the package, illustrating digital and analog connectivity options.

## SETUP GUIDE

### 1. Power and Charging

Plug the micro-USB charging cable into the Connect transmitter and connect the other end to a USB power source (e.g., TV USB port, wall adapter, computer USB port). The Connect can be left plugged in at all times.

Video: MEE audio Connect Bluetooth Audio Transmitter for TV | Setup. This video demonstrates the initial power and charging steps for the Connect transmitter.

### 2. Pairing Your Bluetooth Headphones

Put your Bluetooth headphones into pairing mode. This usually involves pressing and holding the power or multi-function button for 5-10 seconds until an indicator light blinks (often red and blue). Once your headphones are in pairing mode, press the 'A' button on the Connect transmitter to put it into pairing mode. A blinking blue light on the Connect indicates it's ready to pair. The light will turn solid blue once successfully paired.

## DUAL HEADPHONE SUPPORT

Streams audio to up to two Bluetooth headphones or speakers simultaneously

Figure 3: The MEE audio Connect supports dual headphone streaming, allowing two users to listen simultaneously.

### 3. Connecting to Your TV

Choose only ONE audio cable supported by your TV. Identify the audio output ports on your TV (consult your TV's user manual if unsure).

### Option 1: Using the Optical Cable

If your TV has a 'Digital Audio Out (Optical)' port, remove the plastic caps from the optical cable and plug one end into your TV's optical port and the other end into the 'OPTICAL' port on the Connect transmitter. The optical port on the Connect is covered by a door that will move out of the way when the cable is plugged in. Ensure it clicks into place.

Video: MEE audio Connect Transmitter for TV | Using Digital Optical. This video guides you through connecting the transmitter to your TV using the optical cable.

## DIGITAL AND ANALOG CONNECTIVITY

Connects via 3.5mm headphone jack, RCA, or optical TOSLINK for universal compatibility

**FOR TV'S  
AND OTHER  
AUDIO DEVICES**

Figure 4: The MEE audio Connect offers digital and analog connectivity, including an optical TOSLINK port.

### Option 2: Using the 3.5mm Headphone Jack

If your TV has a 3.5mm headphone jack (often labeled 'Headphones', 'Phones', or with a headphone symbol), plug one end of the 3.5mm audio cable into the '3.5mm' port on the Connect transmitter and the other end into your TV's headphone jack.

Video: MEE audio Connect Transmitter for TV | Using Headphone Jack. This video demonstrates connecting the transmitter to

your TV via the 3.5mm headphone jack.

### Option 3: Using RCA Cables

If your TV has red and white RCA jacks labeled 'Audio Out', connect the 3.5mm to RCA adapter to the 3.5mm audio cable, then plug the red and white RCA connectors into the respective red and white 'Audio Out' ports on your TV. Plug the 3.5mm end into the '3.5mm' port on the Connect transmitter.

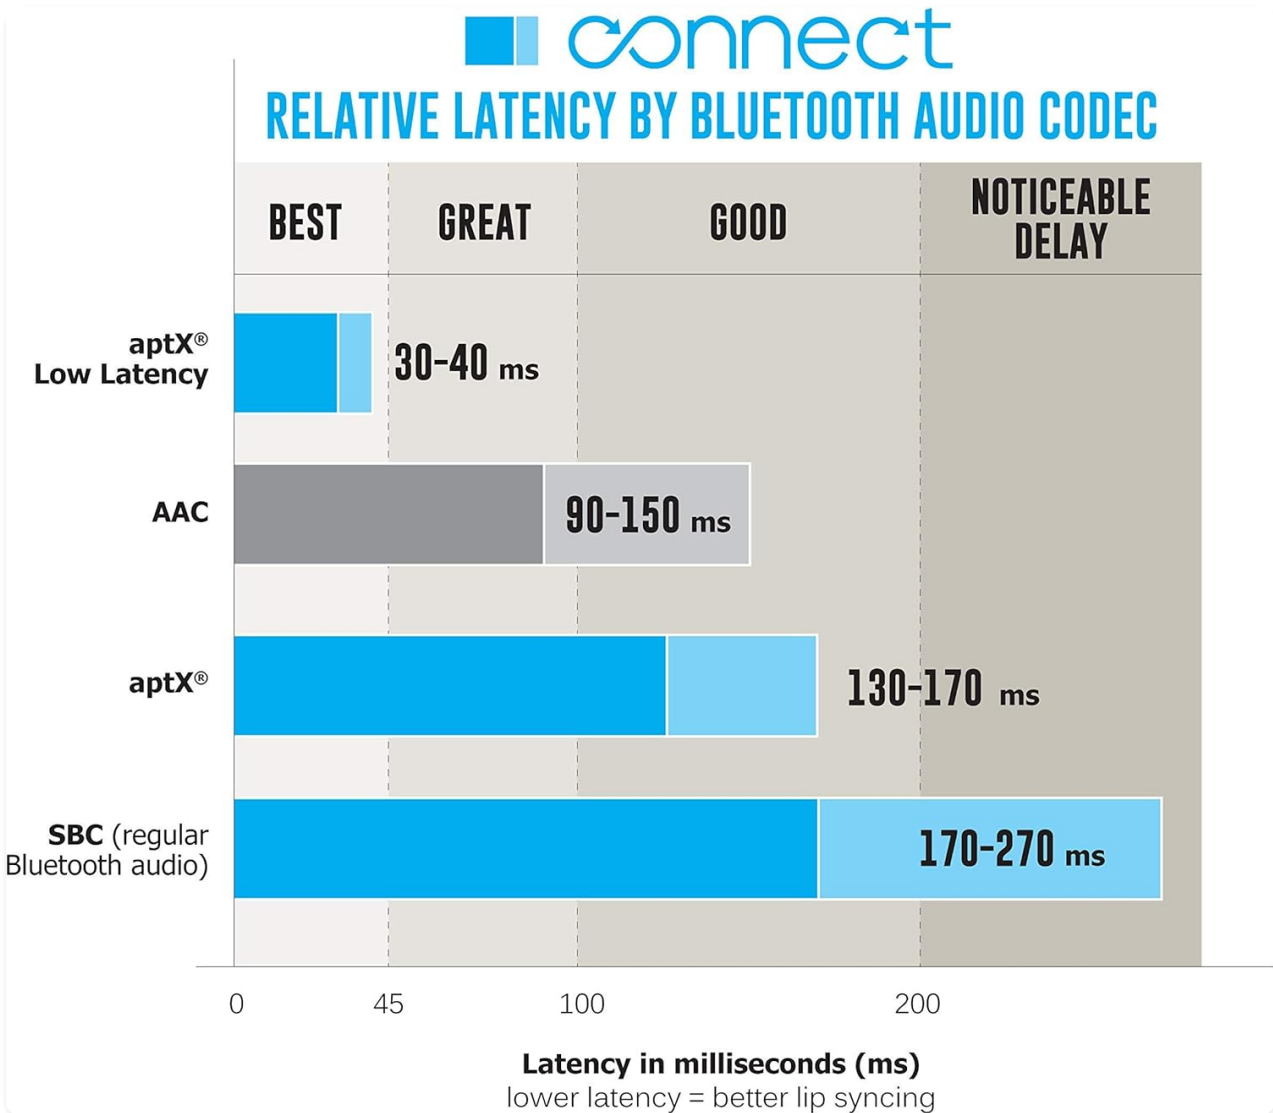

Figure 5: The Connect transmitter supports multiple audio input types, including RCA, for broad compatibility.

## OPERATING INSTRUCTIONS

### Adjusting Volume

Once connected and receiving sound, you can control the volume directly from your Bluetooth headphones. For optimal sound, ensure your TV's volume is turned up sufficiently.

### Automatic Reconnection

After initial pairing, your headphones will automatically reconnect to the Connect transmitter when both devices

are powered on and within range. The solid blue light on the Connect indicates a successful connection.

## CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your MEE audio Connect Bluetooth Audio Transmitter, follow these simple care guidelines:

- Keep the device dry and away from moisture.
- Clean the device with a soft, dry cloth. Avoid harsh chemicals or abrasive materials.
- Store the device in a cool, dry place when not in use.
- Avoid dropping or subjecting the device to strong impacts.

## TROUBLESHOOTING

### No Sound Output

If you are not getting sound after connecting, check the following:

- **TV Audio Settings:** For optical connections, ensure your TV's digital audio output format is set to 'PCM' (Pulse-Code Modulation). Many TVs default to Dolby Digital or DTS, which the Connect does not convert. Refer to your TV's audio settings menu (often found under 'Sound' or 'Additional Settings').
- **Volume Levels:** Ensure both your TV's volume and your headphones' volume are turned up.
- **Cable Connection:** Verify that all cables are securely plugged into the correct ports on both the TV and the Connect transmitter.

### Pairing Issues

If your headphones are not pairing with the Connect:

- **Pairing Mode:** Ensure both the Connect transmitter and your headphones are in active pairing mode (indicated by blinking lights).
- **Proximity:** Place the headphones close to the Connect transmitter during the pairing process.
- **Interference:** Turn off other Bluetooth devices nearby that might interfere with the pairing process.

## PRODUCT SPECIFICATIONS

Feature	Detail
Product Dimensions	3 x 3 x 3 inches
Item Weight	3 ounces
ASIN	B016NIOOH2

Item Model Number	AF-T1
Batteries	1 Lithium Ion batteries required.
Date First Available	October 15, 2015
Manufacturer	MEE audio
Special Feature	Lightweight
Brand	MEE audio
Connectivity Technology	Bluetooth
Power Source	Battery Powered
Material	Plastic
