

BV BV-TL04

BV TSA Accepted Luggage Travel Lock Instruction Manual

Model: BV-TL04

INTRODUCTION

Thank you for choosing the BV TSA Accepted Luggage Travel Lock. This combination lock is designed to provide secure protection for your belongings while allowing TSA agents to inspect your luggage without damage. Its durable construction and resettable combination feature make it ideal for various uses, including luggage, gym lockers, and toolboxes.

Image: Two BV TSA Accepted Luggage Travel Locks, black in color, featuring a flexible steel cable shackle and a 3-digit combination dial. The locks display the red Travel Sentry logo, indicating TSA acceptance.

SETUP: SETTING YOUR COMBINATION

Your lock is preset to 0-0-0 at the factory. To set your personal combination, follow these steps:

1. Ensure the lock is set to the default combination (0-0-0) and the cable is unlocked.
2. Locate the small reset button on the side or bottom of the lock. This button is typically recessed and requires a pen or a pointed object to press.
3. While pressing and holding the reset button, rotate the dials to your desired 3-digit combination. Choose a memorable number.
4. Release the reset button. Your new combination is now set.
5. Scramble the dials to lock the cable. Test your new combination to ensure it opens the lock correctly before securing any valuables.

Providing unmatched security.

- ✓ officially TSA accepted
- ✓ 1000 different codes
- ✓ reinforced quality

OPERATING YOUR LOCK

Locking and Unlocking

- To lock: Ensure the cable is inserted into the lock body and scramble the dials away from your set combination.
- To unlock: Rotate the dials to your personal 3-digit combination. The cable will release from the lock body.

TSA Inspection Indicator

This lock features a pop-up inspection indicator. If TSA agents open your lock using their master key, a small red indicator will pop up on the top of the lock. This allows you to know if your luggage has been inspected without the lock being damaged.

MAINTENANCE

To ensure the longevity and smooth operation of your BV Travel Lock:

- Keep the lock clean and free from dirt or debris, especially around the dials and cable mechanism.
- Avoid exposing the lock to extreme temperatures or harsh chemicals.
- If the dials become stiff, a small amount of silicone-based lubricant can be applied.

TROUBLESHOOTING

Forgotten Combination

If you forget your combination, there is no master key or backdoor to reset it without knowing the current combination. It is highly recommended to write down your combination and store it in a secure, memorable place, separate from your

luggage.

Lock Not Opening

- Double-check that the dials are precisely aligned with your set combination.
- Ensure the cable is fully inserted into the lock body before attempting to unlock.
- If the dials are stiff, try wiggling them gently or applying a small amount of lubricant.

SPECIFICATIONS

Brand	BV
Model Name	BV-TL04
Lock Type	Combination Lock
