

Eurodib USF168S

Eurodib USF168S Wine Cooler Refrigerator Instruction Manual

Model: USF168S

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your Eurodib USF168S Single Section Wine Cooler Refrigerator. Please read these instructions thoroughly before installation and use, and retain them for future reference. The Eurodib USF168S is designed to store up to 165 bottles of wine at a single, controlled temperature. It features beech wood shelves, LED interior lighting, and a full glass door with a stainless steel frame.

SAFETY INFORMATION

To reduce the risk of fire, electric shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the appliance.
- Ensure the appliance is properly grounded.
- Do not operate the appliance with a damaged cord or plug.
- Keep ventilation openings clear of obstruction.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Unplug the appliance before cleaning or performing maintenance.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

UNPACKING AND SETUP

Unpacking

Carefully remove all packaging materials. The package includes the wine cabinet. Inspect the unit for any shipping damage. Report any damage immediately to your dealer.

It is recommended to keep the original packaging for future transport of the appliance.

Placement

This is a freestanding wine cooler. Ensure adequate ventilation around the unit. Avoid placing the unit in direct sunlight or near heat sources (e.g., oven, radiator, or other heat-generating appliances). The appliance should be placed on a flat, stable surface. Allow at least 4 inches (10 cm) of space at the back and sides of the unit for proper air circulation.

Leveling

The unit is equipped with adjustable feet. Adjust the feet to ensure the appliance is level. A level unit will operate more efficiently and prevent door alignment issues.

Electrical Connection

Before plugging in the unit, allow it to stand upright for at least 2-4 hours. This allows the refrigerant to settle. Connect the appliance to a dedicated, properly grounded 110v/60Hz, 1.7 amps electrical outlet (NEMA 5-15P). Do not use extension cords or adapter plugs.

Figure 1: Eurodib USF168S wine cooler integrated into a kitchen setting, demonstrating its freestanding installation.

OPERATING INSTRUCTIONS

Temperature Control

The Eurodib USF168S features a single temperature zone with a digital control panel, typically located at the top interior of the unit. The temperature range is adjustable between 41°F and 64°F (5°C and 18°C). Use the up and down arrows on the control panel to set your desired temperature. The fan-forced evaporator cooling system will then circulate cold air to maintain this setting.

Loading Bottles

The unit is equipped with fifteen beech wood shelves designed to hold up to 165 standard wine bottles. Ensure bottles are placed securely on the shelves to prevent rolling or damage. Avoid overloading shelves to allow for proper air circulation.

LED Interior Lighting

The interior LED lighting illuminates the wine collection. This light can typically be turned on or off via a button on the control panel. It is recommended to keep the light off when not viewing the contents to conserve energy and minimize heat transfer.

Figure 2: Front view of the Eurodib USF168S wine cooler, showcasing the full glass door, beech wood shelves, and LED interior lighting.

MAINTENANCE

Cleaning the Interior

Before cleaning, unplug the appliance. Clean the interior with a soft cloth dampened with a solution of mild detergent and warm water. Do not use abrasive cleaners or solvents. Ensure the interior is dry before plugging the unit back in.

Cleaning the Exterior

Wipe the exterior surfaces with a soft, damp cloth. For stainless steel parts, use a stainless steel cleaner. Avoid getting water into the control panel or electrical components.

Defrost System

The Eurodib USF168S features an automatic defrost system. During operation, frost may accumulate on the evaporator. This frost will periodically melt and drain into an evaporation tray, where it evaporates. Ensure the drain hole (if visible) is not obstructed.

Power Outage

In case of a power outage, the wine cooler will generally maintain its temperature for several hours if the door remains closed. Avoid opening the door unnecessarily during a power outage to preserve the internal temperature.

TROUBLESHOOTING

Before contacting service, please check the following common issues:

- **Appliance does not operate:** Check if the power cord is properly plugged into the outlet. Verify the circuit breaker or fuse.
- **Temperature is not cold enough:** Ensure the door is closed properly. Check if the temperature setting is correct. Avoid placing the unit near heat sources. Ensure adequate ventilation.
- **Excessive noise:** Ensure the unit is level. Check for any objects vibrating against the unit.
- **Water on the floor:** Check if the drain hole is clear (if applicable) and the evaporation tray is correctly positioned.

If problems persist after checking these points, please contact Eurodib customer support.

SPECIFICATIONS

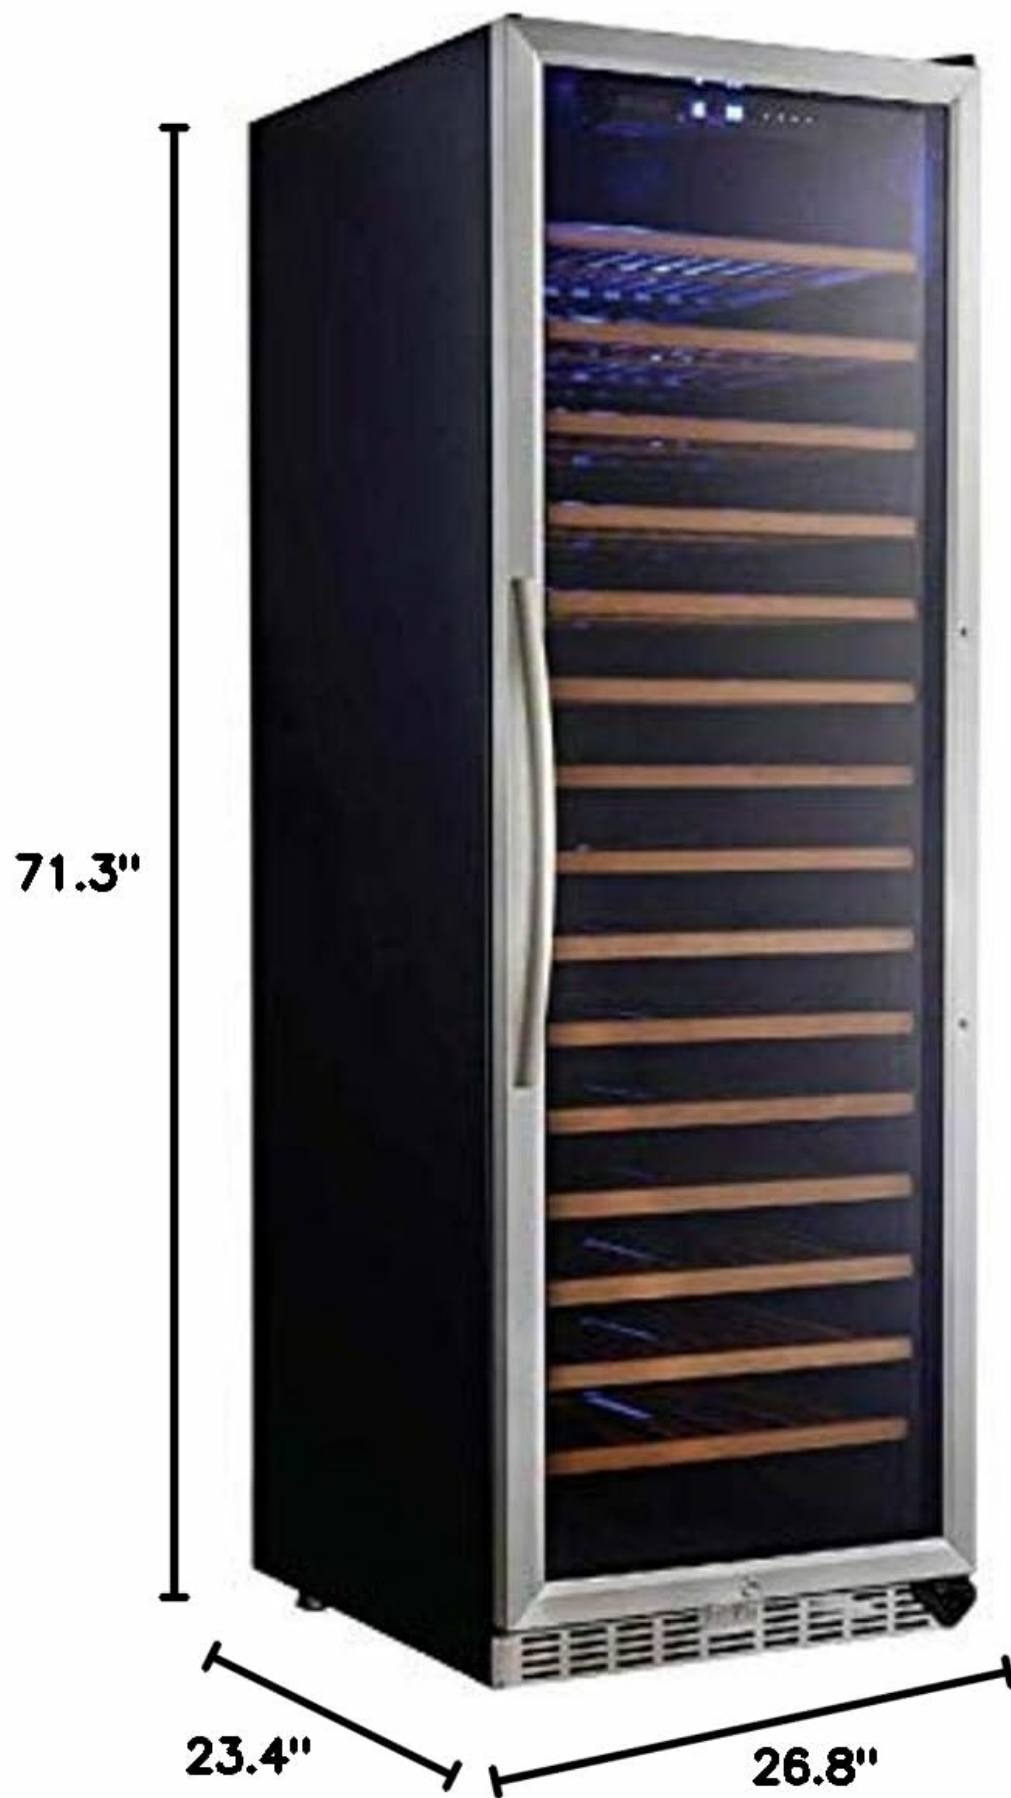

Figure 3: Dimensional overview of the Eurodib USF168S wine cooler.

| Feature | Detail |
|---------|--------|
|---------|--------|

| Feature | Detail |
|------------------------|----------------------------------|

Eurodib Warranty Policy

Eurodib warrants all equipment sold directly by Eurodib and/or through its approved suppliers only. Should any item prove defective due to a manufacturer's defect, Eurodib will repair or replace the equipment. The decision to either repair or replace the item in question will be entirely at the discretion of Eurodib. All warranty claims must be made directly to Eurodib. Eurodib will not be responsible for any costs incurred for services performed without prior consent from Eurodib.

Key Electric Items: 3 Months Parts & Labour
Electric or Gas Fridge or Freezer: 3 Year Parts & Labour
Blast Chiller: 1 Year Parts and Labour / 3 Years Compressor
Ice Maker: 3 Year Parts and Labour / 3 Years Compressor
Wine Cellar: 3 Year Parts and Labour / 3 Years Compressor

Exemptions: the following items are not covered under warranty

- Glass doors on Ovens and Provenors
- Glass tops on Induction Cookers
- Core probes on Blast Chillers
- Door seals on Wine Coolers

Items which weigh more than 75 lbs (34 kgs) will be serviced on-site providing they are located within a one hour drive from the nearest warranty service location. Items that weigh less than 75lbs (34 kgs) must be brought in to the warranty service location for repair.

Eurodib will repair or replace any item found defective in material or workmanship when put to normal use and care according to the instructions. Minor imperfections, surface marring as a result of shipping, and slight color variations are normal. Damage to equipment from misuse or abuse, such as improper cleaning, improper installation, neglect, accident, alter abuse, fire, theft, etc., will not be covered under warranty. This policy applies only in Canada and the lower 48 United States of America; any items located outside of these defined territories are not covered under warranty. The warranty on all items is non-transferable by any means.

If upon arrival and inspection a technician dispatched by Eurodib determines that the problem is not a warranty issue it is the end user's responsibility to pay for the technician's time and possible repair. If the end user refuses to pay the technician Eurodib reserves the right to cancel the warranty for a given unit until such time as costs are repaid to Eurodib.

Should you have any questions or concerns about this policy please do not hesitate to contact us.
