Setup and Installation

The Eviva EVVN12-36ASH vanity is designed for wall-mount installation. While the vanity unit itself requires no complex assembly, professional installation is recommended for secure wall mounting and plumbing connections.

Before Installation:

- Inspect all components for damage before installation. Do not proceed with installation if any parts are damaged.
- Ensure you have all necessary tools and materials for wall mounting and plumbing connections (e.g., drill, level, wall anchors, sealant, plumbing supplies).
- Verify wall structure can support the vanity's weight (approximately 49.9 kg / 110 lbs). Reinforcement may be required.
- Turn off the main water supply before beginning any plumbing work.

Installation Steps:

1. **Prepare the Wall:** Determine the desired height for the vanity. Mark the mounting points on the wall, ensuring they are level and align with the vanity's mounting brackets.
2. **Install Wall Anchors/Brackets:** Drill pilot holes and securely install appropriate wall anchors or mounting brackets suitable for your wall type (e.g., studs, drywall with heavy-duty anchors).
3. **Mount the Vanity Cabinet:** Carefully lift the vanity cabinet and align it with the installed wall brackets. Secure the cabinet to the wall using the provided hardware or suitable fasteners. Ensure the vanity is level and firmly attached.
4. **Connect Plumbing:** Connect the hot and cold water supply lines to the faucet (not included) and the drain assembly to the integrated sink. Use plumber's putty or sealant as required to prevent leaks.
5. **Install Faucet:** Install your chosen faucet into the pre-drilled sink hole.
6. **Test for Leaks:** Once all connections are made, slowly turn on the water supply and check for any leaks at all connection points. Tighten connections as needed.

Operating Instructions

The Eviva EVVN12-36ASH vanity is designed for straightforward use. Its primary functions involve the integrated sink and the soft-closing drawer.

Integrated Sink:

- The white integrated acrylic sink is designed for daily washing and hygiene.
- Ensure the faucet (not included) is properly installed and connected to the water supply.
- The sink features one pre-drilled hole for faucet installation.

Soft-Closing Drawer:

- The vanity includes one soft-closing drawer for storage.
- To open, gently pull the drawer outwards.

- To close, push the drawer inwards. The soft-closing mechanism will engage to ensure a quiet and smooth closure, preventing slamming.
- Avoid overloading the drawer to ensure proper function of the soft-closing mechanism.

Care and Maintenance

Proper care and maintenance will help preserve the appearance and functionality of your Eviva vanity set.

General Cleaning:

- **For the Sink:** Clean the integrated acrylic sink with mild soap and water. Use a soft cloth or sponge. Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can scratch or damage the surface. Rinse thoroughly after cleaning.
- **For the Cabinet:** Wipe the high gloss ash gray cabinet surfaces with a soft, damp cloth. For stubborn spots, use a mild, non-abrasive cleaner specifically designed for finished wood surfaces. Dry immediately with a clean, soft cloth to prevent water spots.
- **Spills:** Wipe up spills immediately to prevent staining or damage to the finish.
- **Avoid Excessive Moisture:** While designed for bathroom environments, avoid prolonged exposure to standing water or excessive moisture on the cabinet surfaces.

Long-Term Care:

- Periodically check all plumbing connections for leaks and tighten if necessary.
- Inspect drawer slides for smooth operation. If needed, clean any debris from the tracks.
- Avoid placing extremely hot items directly on the sink or cabinet surface without protection.

Troubleshooting

This section addresses common issues you might encounter with your vanity set.

Problem	Possible Cause	Solution
Water Leakage	Loose plumbing connections; damaged seals.	Check and tighten all water supply and drain connections. Replace worn or damaged seals/gaskets. If problem persists, consult a professional plumber.
Slow Drainage	Drain partially clogged with hair or debris.	Remove the drain stopper and clear any visible obstructions. Use a drain cleaner suitable for acrylic sinks if necessary, following product instructions carefully.
Drawer Not Closing Smoothly	Drawer overloaded; debris in slides; misaligned slides.	Reduce drawer contents. Inspect drawer slides for obstructions and clean them. Ensure the drawer is properly seated on its tracks. If misalignment is suspected, consult the installation guide or a professional.
