MagniPros B017MVQ0NU

MagniPros Jumbo Size Magnifying Glass

Model: B017MVQ0NU - Instruction Manual

Introduction

This manual provides essential information for the safe and effective use of your MagniPros Jumbo Size Magnifying Glass. This device features a wide horizontal lens with 3X magnification, designed to assist with reading small prints and for individuals with low vision. Its lightweight and durable design ensures comfortable and long-lasting use.

Product Features

- **Rectangular Shape and Lightweight Design:** The magnifier weighs approximately 5 ounces, making it suitable for extended use. Its rectangular lens provides a natural viewing area for reading text, reducing the need for frequent repositioning.
- **3X Optical Grade Magnification:** The main lens measures 4.35" x 2.5" and offers 3x (300%) magnification. This magnification level is designed for viewing small prints, maps, newspapers, and magazines.
- **Shatterproof Acrylic Lens:** The lens is constructed from optical-grade acrylic, which is lighter and more resistant to shattering than traditional glass, while maintaining clarity. The lens and frame are designed to withstand accidental drops.
- **Shockproof and Scratch Resistant Housing:** The design includes shockproof housing on both sides of the lens to protect it from shattering and surface scratches. This allows the magnifier to be placed flat on a table without scratching the lens.

Setup

Your MagniPros Jumbo Size Magnifying Glass requires minimal setup. Upon unboxing, ensure all packaging materials are removed. The lens is protected by a thin film on both sides; gently peel this film off before first use to ensure optimal clarity.

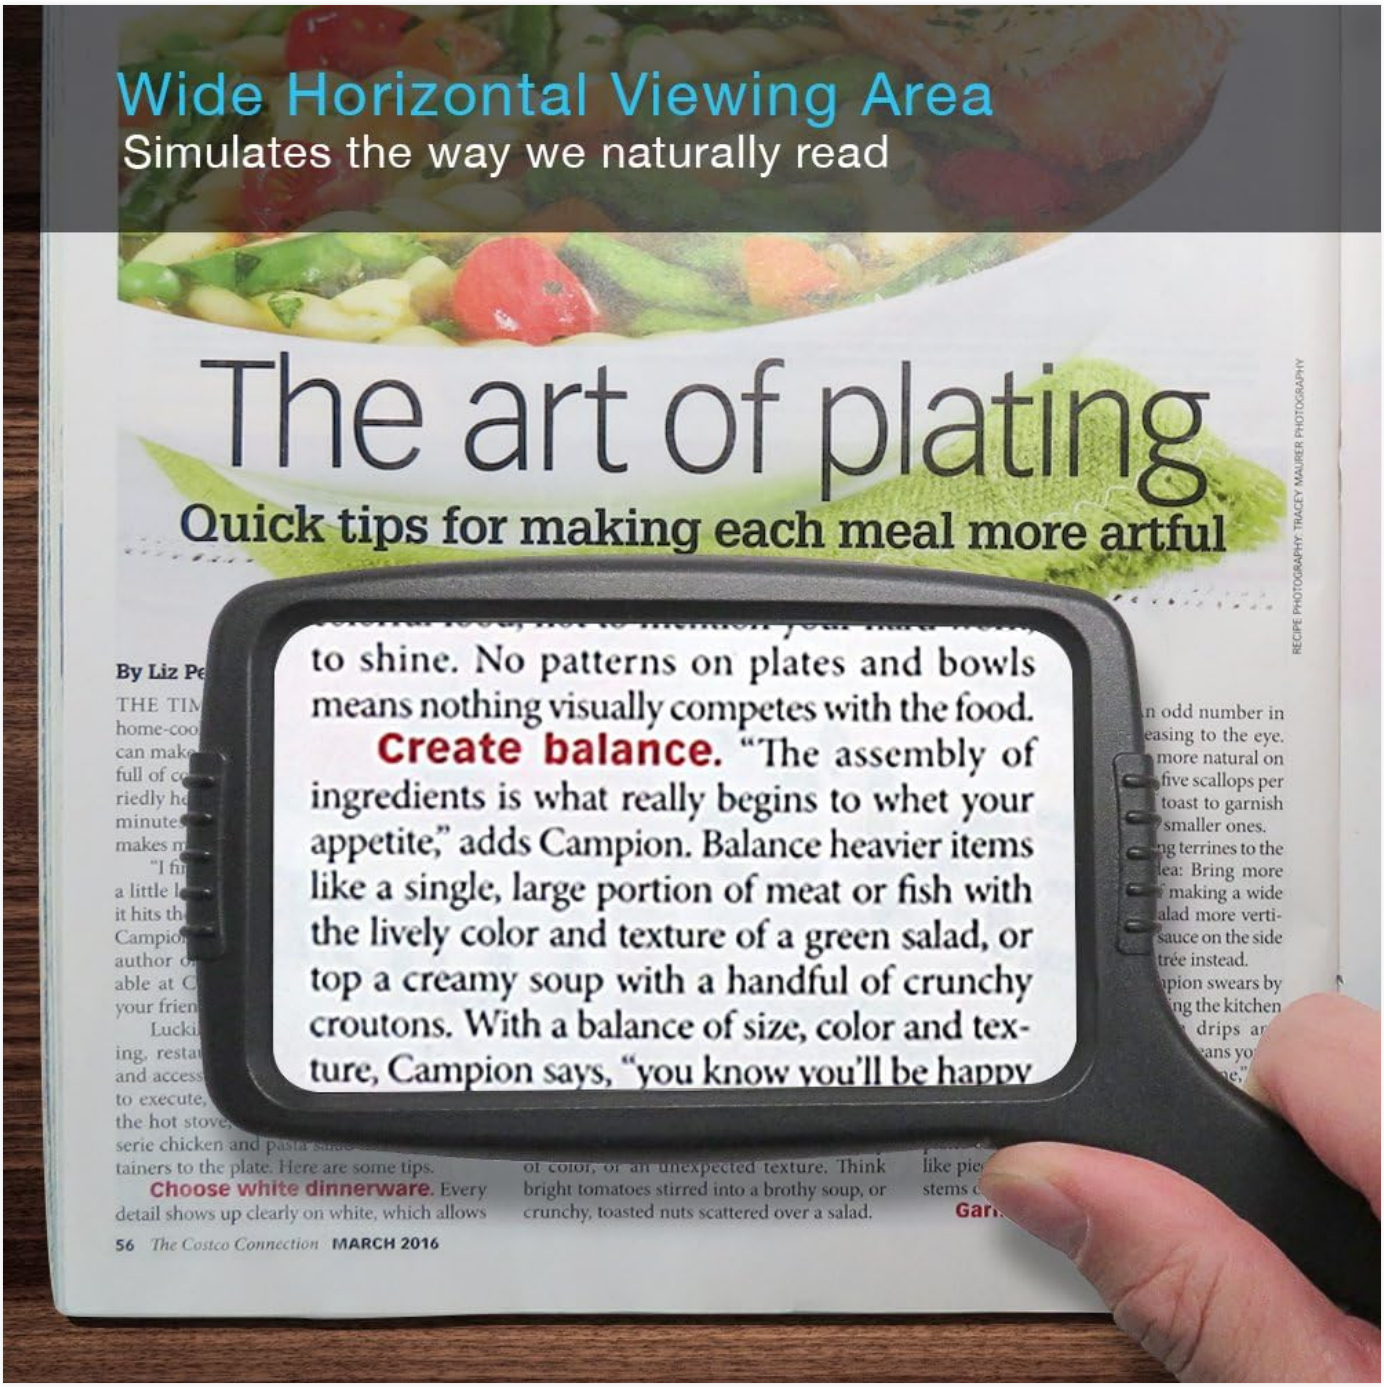

Image: MagniPros Jumbo Magnifying Glass in use, showing magnified text on a page. This illustrates the clear magnification provided by the lens.

The magnifier is ready for use immediately after removing the protective film. No batteries or assembly are required.

Operating Instructions

To use the magnifying glass, hold it approximately 2 to 3 inches above the object you wish to magnify. Adjust the distance slightly until the text or image appears clear and magnified to your preference. The rectangular shape is designed to allow for natural reading across a line of text without constant repositioning.

Image: MagniPros Jumbo Magnifying Glass used to read text in both vertical and horizontal positions. The rectangular design supports flexible viewing.

The ergonomic handle provides a comfortable grip for extended reading sessions.

Maintenance

To maintain the clarity and longevity of your magnifying glass, follow these simple maintenance guidelines:

- **Cleaning the Lens:** Use a soft, lint-free cloth (such as a microfiber cloth) to gently wipe the lens. For stubborn smudges, a small amount of lens cleaner or water can be applied to the cloth, not directly to the lens. Avoid abrasive cleaners or paper towels, which can scratch the acrylic surface.

- **Storage:** Store the magnifier in a clean, dry place to prevent dust accumulation. The shockproof and scratch-resistant housing is designed to protect the lens, even when placed on flat surfaces.
- **Handling:** While the lens is shatter-resistant, avoid dropping the magnifier from excessive heights to prevent potential damage to the frame or lens.

Troubleshooting

If you encounter any issues with your MagniPros Jumbo Size Magnifying Glass, please refer to the following common solutions:

- **Blurred Image:** If the magnified image appears blurry, adjust the distance between the magnifier and the object. The optimal viewing distance is typically 2 to 3 inches.

- **Insufficient Magnification:** This magnifier provides 3X magnification. If you require higher magnification, this model may not meet your specific needs.
- **Scratches on Lens:** While the lens is designed to be scratch-resistant, improper cleaning or abrasive contact can cause damage. Refer to the Maintenance section for proper cleaning techniques.

For further assistance, please contact customer support.

Specifications

Brand	MagniPros
Model Number	B017MVQ0NU
Color	Black
Magnification Strength	3X
Lens Material	Optical Grade Acrylic
Item Weight	5.92 ounces
Item Dimensions (L x W)	4.35" x 2.5" (Lens)
Batteries Required	No
