3. Setup

Before first use, wash the cooling rack thoroughly with warm, soapy water. Rinse completely and dry. The rack is dishwasher safe for convenient cleaning.

4. Operating Instructions

This versatile rack can be used for various cooking and baking applications:

4.1. Cooling Baked Goods

Place freshly baked items such as cookies, cakes, or bread directly on the rack. The elevated design and tight grid pattern allow for optimal air circulation, ensuring even cooling and preventing condensation that can make bottoms soggy.

4.2. Baking, Roasting, and Broiling

The rack is oven safe up to 575°F (302°C). It fits perfectly inside a standard 10.25" x 15.25" jelly roll pan or cookie sheet (pan not included). Use it to elevate foods for even cooking, allowing fats and juices to drip away for crispier results.

- **Crispy Chicken:** Place chicken pieces on the rack over a baking sheet to allow air to circulate around all sides.
- **Roasting Vegetables:** Elevate vegetables for uniform roasting and browning.
- **Broiling Meats:** Ideal for broiling bacon or other meats, allowing grease to drain.

4.3. Decorating

Utilize the rack to hold items while decorating, allowing excess glaze or frosting to drip through, minimizing mess.

5. Care and Maintenance

Proper care ensures the longevity and performance of your Spring Chef cooling rack.

5.1. Cleaning

- **Dishwasher Safe:** The rack is fully dishwasher safe. Place it in the dishwasher for easy cleaning.
- **Hand Washing:** For hand washing, use warm, soapy water and a non-abrasive sponge or brush. The tight grid is designed to be easy to clean.
- **Stubborn Residue:** For baked-on residue, soak the rack in warm, soapy water for a period before scrubbing.

5.2. Storage

Store the rack in a dry place to maintain its condition. Its flat design allows for easy storage in cabinets or drawers.

6. Troubleshooting

The Spring Chef cooling rack is designed for durability and performance. If you encounter any issues, consider the following:

- **Food Sticking:** Ensure the rack is clean before use. For baking or roasting, a light coating of cooking spray can help prevent sticking, though the stainless steel surface is generally non-stick.
- **Warping/Bending:** This rack is constructed from heavy-gauge 304 (18/8) stainless steel and is designed to be rust and warp-resistant. If warping occurs, ensure it is not exposed to extreme, rapid temperature changes beyond its rated 575°F limit.

- **Rust Spots:** While highly rust-resistant, prolonged exposure to harsh chemicals or standing water can potentially cause discoloration. Ensure thorough drying after washing.
