OttLite T57J3M

OttLite TrueColor 13W Replacement Bulb User Manual

Model: T57J3M

INTRODUCTION

This manual provides essential information for the safe and effective use of your OttLite TrueColor 13W Replacement Bulb. Please read these instructions carefully before installation and operation.

The OttLite TrueColor 13W replacement bulb is designed to provide high-quality, low-glare illumination, ideal for detailed tasks such as reading, crafting, and office work. Its energy-efficient design ensures a long lifespan of up to 10,000 hours, reducing the frequency of replacements.

PRODUCT OVERVIEW

Figure 1: OttLite TrueColor 13W Replacement Bulb in its retail packaging. The packaging highlights its 13W power, OttLite brand, and suitability for reading, crafting, and office use. Key features like "Instant-on," "See fine print and details clearly," "Shows colors accurately," "Reduces glare and eyestrain," and "Bulb lasts up to 10,000 hours" are visible. The model number T13330 and type PL13-A are also indicated.

The OttLite TrueColor 13W Replacement Bulb is a compact fluorescent lamp (CFL) with a tubular (T4) shape and an E26

base. It operates at 120 volts and provides 210 lumens of full spectrum light, enhancing clarity and reducing eye strain for various activities.

SETUP AND INSTALLATION

Before installing the replacement bulb, ensure the lamp or fixture is unplugged from the power source to prevent electrical shock.

1. **Safety First:** Disconnect power to the lamp or fixture. Allow the old bulb to cool completely if it was recently in use.
2. **Remove Old Bulb:** Carefully grasp the base of the old bulb and gently pull it straight out from the socket. Avoid twisting the glass tube.
3. **Unpack New Bulb:** Remove the new OttLite TrueColor 13W Replacement Bulb from its packaging. Handle the bulb by its plastic base, avoiding direct contact with the glass tubes.
4. **Insert New Bulb:** Align the pins on the base of the new bulb with the slots in the lamp's socket. Gently push the bulb straight into the socket until it is firmly seated. Do not force the bulb.
5. **Restore Power:** Once the new bulb is securely installed, plug the lamp or fixture back into the power source.
6. **Test:** Turn on the lamp to ensure the new bulb is functioning correctly.

For optimal performance and safety, always use the correct wattage and bulb type as specified by your lamp's manufacturer.

OPERATING INSTRUCTIONS

The OttLite TrueColor 13W Replacement Bulb is designed for simple operation within compatible OttLite lamps and fixtures. Once installed, operation is typically controlled by the lamp's existing power switch.

- **Power On/Off:** Use the lamp's integrated switch (e.g., push button, toggle switch) to turn the light on or off.
- **Instant-On Technology:** This bulb features instant-on technology, providing full brightness immediately upon activation.
- **Optimal Use:** For best results in reducing glare and eye strain, position your OttLite lamp to illuminate your workspace directly without casting shadows.

This bulb is not dimmable and should not be used with dimmer switches unless explicitly stated by the lamp's manufacturer.

MAINTENANCE

Proper maintenance ensures the longevity and performance of your OttLite TrueColor 13W Replacement Bulb.

- **Cleaning:** To clean the bulb, ensure the lamp is unplugged and the bulb is cool. Gently wipe the glass tubes with a soft, dry, lint-free cloth. Do not use liquid cleaners or abrasive materials.
- **Handling:** Always handle the bulb by its plastic base. Avoid touching the glass tubes directly, as oils from your skin can reduce bulb life.
- **Replacement:** Replace the bulb when its light output significantly diminishes or it ceases to function. The bulb is rated for up to 10,000 hours of use.
- **Disposal:** CFL bulbs contain small amounts of mercury and should be disposed of according to local regulations. Many retailers and recycling centers offer collection programs for fluorescent bulbs. Do not dispose of in regular household trash.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bulb does not light up.	Lamp not plugged in. Power outlet not working. Bulb not seated correctly. Bulb is faulty or at end of life.	Ensure lamp is securely plugged into a working outlet. Test the outlet with another device. Unplug the lamp, then re-insert the bulb firmly into the socket. Replace the bulb with a new one.
Bulb flickers.	Loose connection. Incompatible dimmer switch. Bulb nearing end of life.	Unplug the lamp and re-seat the bulb. Ensure the lamp is not connected to a dimmer switch, as this bulb is not dimmable. Replace the bulb.
Reduced brightness.	Bulb nearing end of life. Dust accumulation on bulb.	Replace the bulb. Clean the bulb gently with a dry, lint-free cloth (ensure lamp is unplugged and bulb is cool).
