LiftMaster 971LM

LiftMaster 971LM Security+ 1-Button Garage Door Opener Remote Control Manual

Model: 971LM

1. Introduction

This manual provides instructions for the LiftMaster 971LM Security+ 1-Button Remote Control. This device is designed to operate compatible LiftMaster garage door openers or gate operators equipped with Security+ 2.0 technology and a yellow programming button. The remote features a single button for convenient control and includes a visor clip for easy vehicle access.

Image: The LiftMaster 971LM single-button remote control, highlighting its model number and function.

2. Safety Information

- Always keep remote controls out of reach of children.
- Operate the garage door or gate only when it is in full view, free of obstructions, and the opener is properly adjusted.
- Do not allow children to play with the remote control or the garage door opener.
- Ensure the garage door or gate is fully closed before leaving the premises.

3. Package Contents

Your package should contain the following items:

- LiftMaster 971LM 1-Button Remote Control (quantity as purchased)
- 3V Lithium Battery (pre-installed)
- Visor Clip

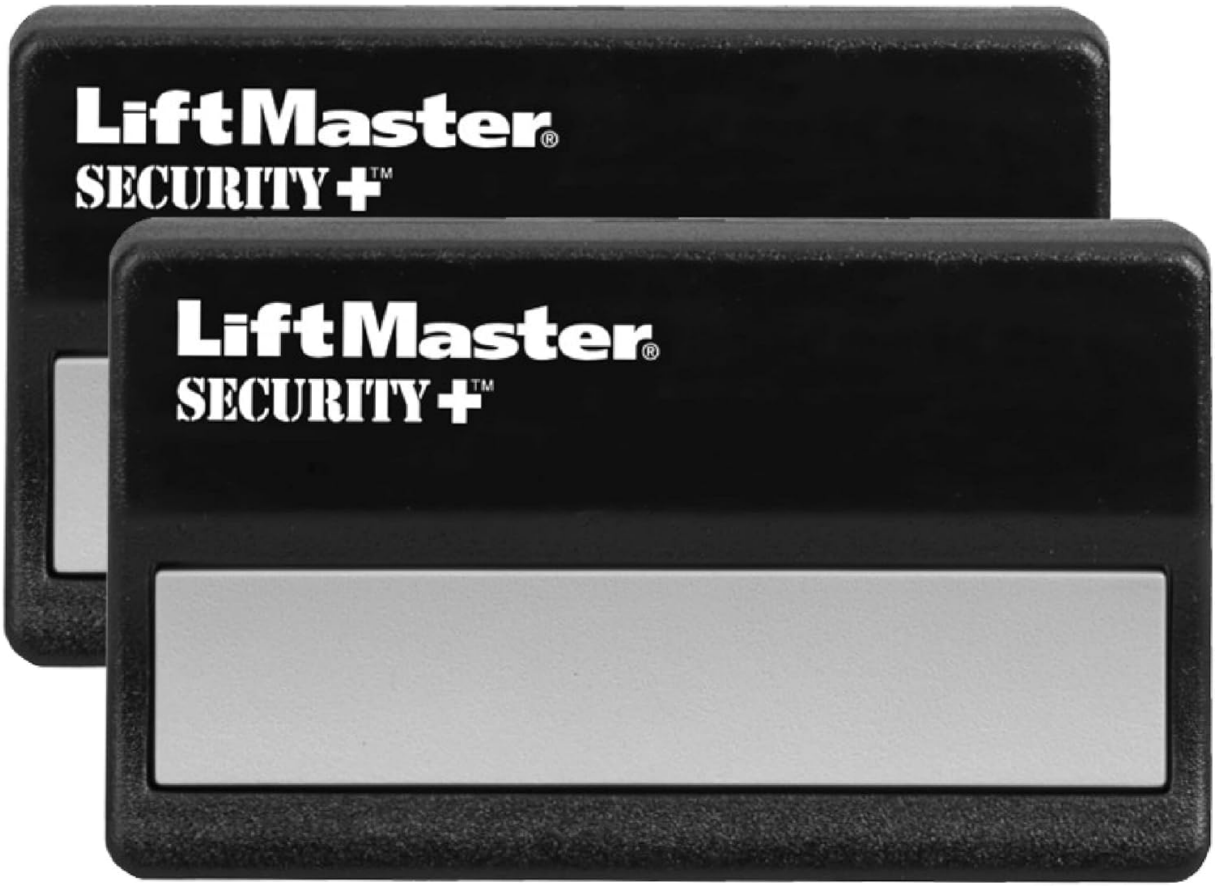

Image: Two LiftMaster Security+ remote controls, illustrating the typical product packaging contents.

4. Setup and Programming

The LiftMaster 971LM remote control is compatible with LiftMaster garage door openers and gate operators featuring Security+ 2.0 technology and a yellow programming button. Follow these steps to program your remote:

1. **Locate the Learn Button:** On your garage door opener motor unit, locate the "Learn" button. This button is typically yellow.
2. **Activate Learn Mode:** Press and immediately release the "Learn" button on the motor unit. The LED indicator on the motor unit will illuminate steadily for 30 seconds, indicating it is in learn mode.

3. **Program the Remote:** Within 30 seconds, press and hold the button on your 971LM remote control that you wish to program.
4. **Confirm Programming:** The garage door opener lights will flash once (or you will hear two clicks) when the code has been learned. Release the remote control button.
5. **Test the Remote:** Press the programmed button on your remote control to test its operation. The garage door should activate.

If the remote does not work, repeat the steps. Ensure you are within range of the garage door opener during programming.

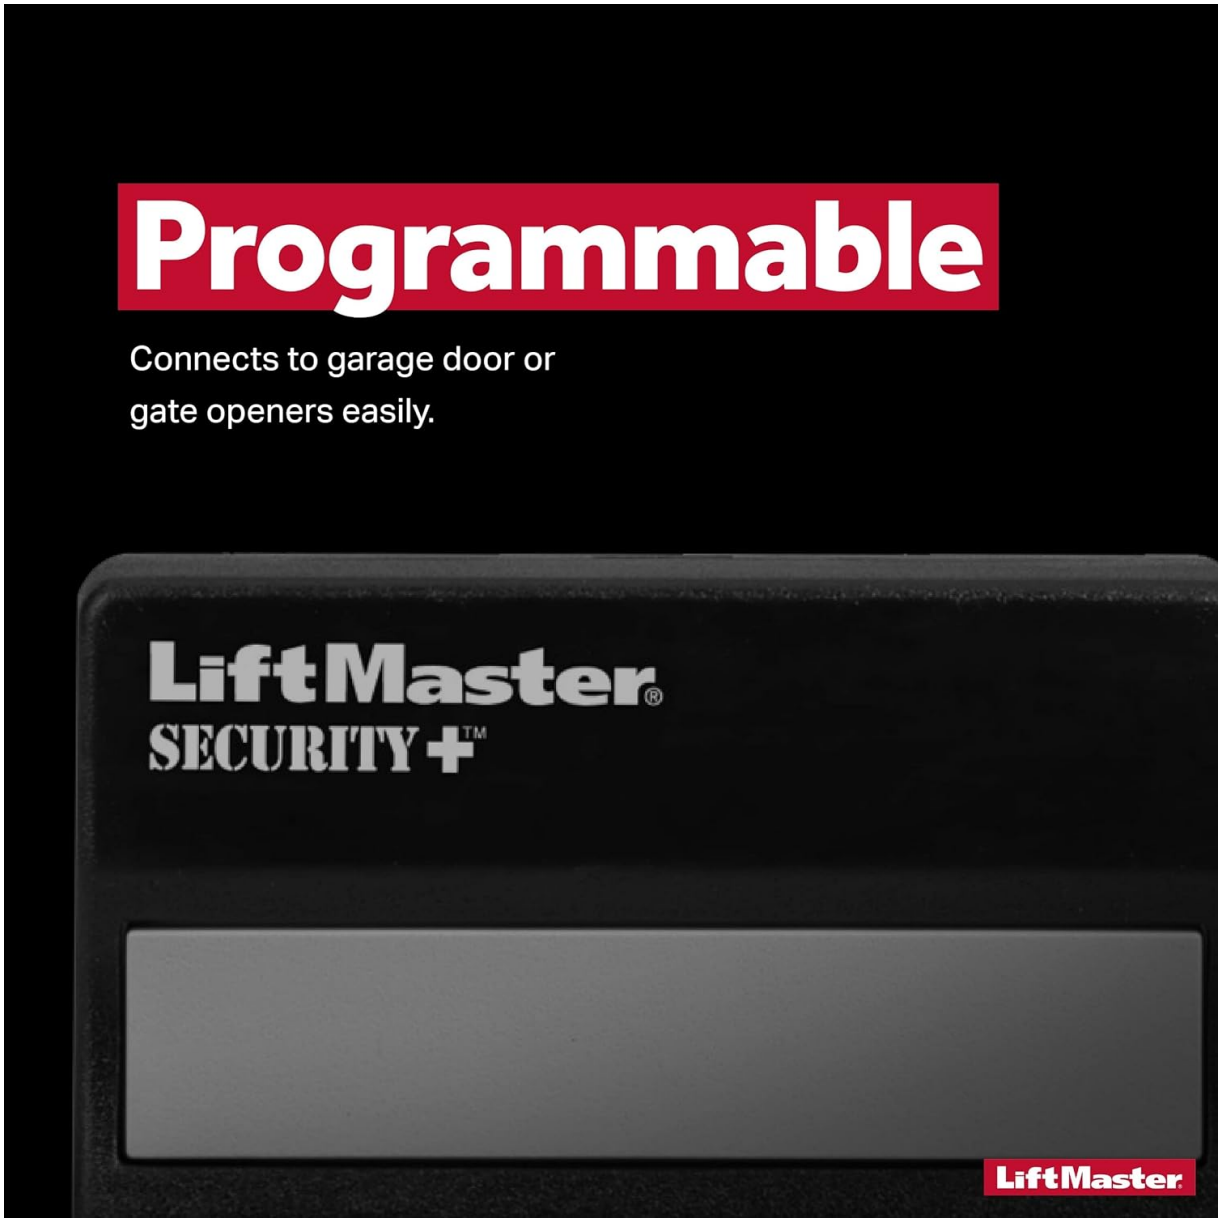

Image: The LiftMaster remote control, emphasizing its programmable feature for easy connection to garage door or gate openers.

5. Operation

To operate your garage door or gate, simply press the programmed button on your LiftMaster 971LM remote control. The door or gate will open or close. Pressing the button again will stop the movement, and a third press will reverse the direction.

Image: Close-up of the LiftMaster remote control, highlighting its large, easy-to-use button for improved accessibility.

6. Battery Replacement and Maintenance

Battery Life

The 971LM remote control uses a 3V lithium battery (CR2 type). The average battery life is approximately 5 years under normal usage conditions.

Replacing the Battery

When the remote's range decreases or the LED indicator on the remote does not light up when pressed, it is time to replace the battery. To replace the battery:

1. Open the remote control casing. This usually involves prying open the case with a small flathead screwdriver at the seam.
2. Remove the old 3V lithium battery.
3. Insert a new 3V lithium battery (CR2 type) with the positive (+) side facing up.
4. Snap the remote control casing back together securely.

No reprogramming is typically required after battery replacement.

7. Troubleshooting

- **Remote Not Working:**
  - Check the battery. Replace if necessary.
  - Ensure the remote is properly programmed to your garage door opener. Repeat the programming steps in Section 4.
  - Verify your garage door opener has a yellow learn button and Security+ 2.0 technology.
- **Reduced Range:**
  - The battery may be low. Replace the battery.
  - Check for sources of interference near your garage door opener or remote.
- **Garage Door Opener Not Responding:**
  - Ensure the garage door opener is plugged in and receiving power.
  - Check if the safety sensors are obstructed or misaligned.

8. Specifications

Brand	LiftMaster
Model	971LM
Color	Black
Item Weight	0.01 Ounces
Battery Type	3V Lithium (CR2)
Compatibility	LiftMaster Security+ 2.0 garage door openers/gate operators with yellow learn button
UPC	641361643897
Manufacturer Part Number	CECOMINOD032845

9. Warranty and Support

Warranty

This LiftMaster 971LM remote control comes with a**1-year warranty** from the date of purchase, covering defects in materials and workmanship under normal use.

Image: The LiftMaster remote control next to text indicating a "1 Year Warranty."

Security+ 390MHz 3 Channel Remote Control

Descriptions

The Security+ remote control works only with door openers and light controls having an orange "Smart" button and a yellow indicator light. Programming instructions are described and illustrated below.The additional push buttons can also activate other garage door openers and/or light controls.

(Instructions for programming light products are included with those accessories.)

Security+ GARAGE DOOR OPENERS

To Program the Opener to Accept the Remote Control Code

Select a remote control push button to operate the opener..The large button is recommended for use with a garage door opener.

1. Press and hold the selected remote control push button.See Figure 1.

SECURITY+ Remote Control

Figure 1

2. Press and release the "Smart"(learn)button on the opener panel.See Figure 2.The indicator light on the panel will begin to blink and the opener lights will flash once.

LiftMaster PROFESSIONAL

WIRELESS ACCESS CONTROL RECEIVER STAR™ 450-390 STAR™ 450-315

SPECIFICATIONS
SUPPLY VOLTAGE: 12-24 VOLTS AC OR DC
OPERATING CURRENT: 250 mA MAXIMUM
OPERATING TEMP RANGE: -40 TO +140F (-40 TO +65C)
FREQUENCY: 390 MHz STAR450 - 390
315 MHz STAR450 - 315
RELAY CONTACT RATING: 1 AMP @ 24 VOLTS AC OR DC

INSTALLATION

1. Select a convenient location near your device to be controlled by the STAR450.
2. Mount the STAR450 in the "Line-Of-Sight" of the intended transmitting location.

NOTE: Avoid mounting the STAR450 in or on metallic enclosures. See Remote Antenna Mounting for proper installation.

3. Mount back plate to desired surface using hardware #6 (not provided). Hardware used will depend on mounting application (refer to Figure 1 for receiver mounting hole locations).
4. Wire electrical connections to unit. Snap receiver to back plate.
5. Install the provided antenna onto the receiver antenna connector by screwing the connector clockwise.
6. Slide the seal boot down to meet the o-ring, covering the antenna hardware.

⚠ WARNING

To prevent possible SERIOUS INJURY or DEATH from electrocution:
- Be sure power is not connected BEFORE installing the receiver.

To prevent possible SERIOUS INJURY or DEATH from a moving gate or garage door:
- ALWAYS keep remote controls out of reach of children. NEVER permit children to operate, or play with remote controls.
- Activate gate or door ONLY when it can be seen clearly, is properly adjusted, and there are no obstructions to door travel.
- ALWAYS keep gate or garage door in sight until completely closed. NEVER permit anyone to cross path of moving gate or door.

Remote Antenna Mounting:

Use the optional 86LM antenna extension kit to mount the remote antenna as high and far from metal as possible for best radio range (Figure 2). Contact technical support at: 1-800-528-2806 to order the model 86LM.

GARAGE DOOR OPENER PROGRAMMING INSTRUCTIONS

GENIE GARAGE DOOR OPENER KEYPADS

Genie Garage Door Opener Wireless Keypad Model GPWK-12, GWK

(Works with remotes having 9 or 12 internal code setting switches. Keypad is black with a slide-up cover showing the Genie logo only)

This keyless garage door opener entry pad works with Genie transmitters using 390 MHz frequency. It is NOT compatible with Genie Intellicode transmitters. The Door Code in the Step-By-Step Procedure at right is determined by the internal code switches inside your transmitter and the accompanying chart. Determine the settings of the first 3 switches and write down the corresponding number from the chart. Continue with the next 3 switches and its corresponding number, and so on, until the last set of 3 switches. You should have 3 or 4 Door Code numbers.

Switch Settings			Door Code Number
UP	UP	UP	7
UP	UP	DOWN	6
UP	DOWN	UP	5
UP	DOWN	DOWN	4
DOWN	UP	UP	3
DOWN	UP	DOWN	2
DOWN	DOWN	UP	1
DOWN	DOWN	DOWN	0

Door Code in Step 4: ____ ____ ____ ____

Step-By-Step Procedure

1. Reset Keypad - slide keypad cover half way up. While pressing the # and 9 buttons simultaneously, slide the Keypad Cover the rest of the way up until it latches. Release # and 9 buttons. At this point, if the back-lit keypad light stays on, proceed directly to step 3. If the back-lit keypad light goes out, close the cover pad and repeat this until it sticks. Proceed to step 2.
2. Press 3, 5, 7 and # buttons in said order.
3. Enter your PIN and press the # button. Your PIN number can be created from any group of numbers up to 8 digits of your choice. Note: Do NOT use "#" or "star" key.
4. Enter Door Code, as determined from the chart at left, and press the "star" key.
5. Slide Keypad Cover down.
6. Test Keypad by sliding cover up until it latches. Enter your PIN and Press "star" key. Your door should operate.

Genie Wireless Intellicode Keyless Entry Pad Programming:

2 Models

Model 1: Intellicode Model GWKIC, ACSDG (black with slide-up cover and the word "Intellicode" printed on the cover)
