Keter 226814

Keter Store-It-Out MAX Outdoor Storage Shed (Model 226814)

User Instruction Manual

INTRODUCTION

Thank you for choosing the Keter Store-It-Out MAX Outdoor Storage Shed. This durable, weather-resistant resin shed provides a generous 42 cubic feet of storage capacity, ideal for garden tools, two 63-gallon trash bins, and other outdoor items. This manual provides essential information for the safe assembly, operation, and maintenance of your new storage shed.

SAFETY INFORMATION

- Read all instructions carefully before assembly and use.
- Ensure all parts are present and undamaged before beginning assembly.
- Assemble the shed on a flat, level, and stable surface.
- Keep children and pets away from the assembly area.
- Use appropriate safety gear, such as gloves, during assembly.
- Do not overload the shed. Refer to specifications for weight limits.
- Secure the shed to the ground to prevent tipping in high winds.

PACKAGE CONTENTS

Your Keter Store-It-Out MAX shed includes the following main components:

- Base panel
- Side panels (2)
- Back panels (2)
- Lid panel
- Front doors (2)
- Hydraulic pistons (2)

- Locking mechanism components
- Metal reinforcement bar
- Screws and other fasteners
- Trash bin opening chains (2)

SETUP AND ASSEMBLY

Assembly typically requires two people and basic tools like a screwdriver or a variable-speed drill with adjustable torque settings. Follow these steps for proper assembly:

1. **Prepare the Base:** Place the base panel on a flat, level surface. Ensure the area is clear of debris.
2. **Attach Side Panels:** Carefully snap the side panels into the channels on the base. It may be helpful to have a second person hold the panels upright.
3. **Assemble Back Panels:** Join the two back panels together using the provided screws. Ensure they are correctly oriented (one upside down, one right side up) as per the instructions.
4. **Install Back Assembly:** Slide the assembled back panels into the channels of the side panels. Secure the top with the metal reinforcement bar, ensuring it is properly seated in the channels.
5. **Assemble the Lid:** Attach the hydraulic pistons to the lid panel using the designated screws.
6. **Attach the Lid to the Shed:** Carefully align the lid with the top of the shed and secure the hinges. This step is easier with two people to support the lid.
7. **Prepare the Doors:** Attach the locking mechanism components to the front doors.
8. **Install Front Doors:** Insert the door hinges into the designated slots on the side panels. Ensure the doors swing freely.
9. **Install Locking Bar:** Attach the main locking bar to the top of the doors, allowing it to slide and secure both doors.
10. **Attach Trash Bin Chains (Optional):** If using for trash bins, attach the provided chains to the underside of the shed lid and to the lids of your trash bins. This allows the bin lids to open automatically when the shed lid is raised.

OPERATING INSTRUCTIONS

Opening the Shed

- **Front Doors:** Slide the top locking bar to the side to disengage the doors. Pull the bottom latch on

the right door upwards to release it from the base. Open both doors outwards.

- **Top Lid:** Lift the lid upwards. The hydraulic pistons will assist in opening and holding the lid in place. If the trash bin chains are attached, the bin lids will also open.

Closing the Shed

- **Top Lid:** Gently pull the lid downwards until it closes securely.
- **Front Doors:** Close both doors. Push the bottom latch on the right door downwards to secure it to the base. Slide the top locking bar across to engage both doors.

Security

The shed features a robust locking mechanism. For added security, a padlock (not included) can be attached to the central locking bar.

MAINTENANCE

- **Cleaning:** Clean the shed periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the resin.
- **Inspection:** Regularly check all fasteners and connections to ensure they are tight. Re-tighten if necessary.
- **Weather Resistance:** The shed is weather-resistant, waterproof, and UV protected. No special treatment is required for protection against peeling, rotting, or rusting.

TROUBLESHOOTING

- **Difficulty Closing Doors/Lid:** Ensure the shed is assembled on a level surface. Check for any obstructions inside the shed or along the door/lid edges.
- **Loose Components:** If any parts feel loose, re-tighten the screws. Avoid over-tightening to prevent damage to the resin.
- **Water Leakage:** Verify that all panels are correctly seated in their channels and all screws are tightened. Ensure the shed is on a level surface to prevent water pooling.

SPECIFICATIONS

Feature	Detail
Dimensions (W x D x H)	57 in. W x 32 in. D x 49 in. H (144.78 cm W x 81.28 cm D x 124.46 cm H)
Internal Capacity	42 cubic feet
Material	Polypropylene Resin Plastic & Steel Reinforcement
Color	Beige/Brown
Weather Resistance	Weather-resistant, waterproof, UV protected
Door Type	Double front doors with wood-look texture
Lid Mechanism	Hydraulic pistons for easy opening/closing
Locking	Integrated locking mechanism (padlock not included)
Assembly Required	Yes
