SOUND OFF MU-5QGS-VVHI

SOUND OFF (STV-N11-32P) Nissan MC315D-W TV/DVD & Navigation Control Kit

Model: MU-5QGS-VVHI

Introduction

This manual provides essential instructions for the installation and operation of the SOUND OFF (STV-N11-32P) kit. This connector kit is designed to enable viewing of TV and DVD content, and operation of the navigation system, in compatible Nissan MC315D-W head units while the vehicle is in motion. It utilizes genuine connectors for a straightforward installation process.

Kit Components

The kit includes the necessary wiring harness with genuine connectors for integration with your vehicle's existing system.

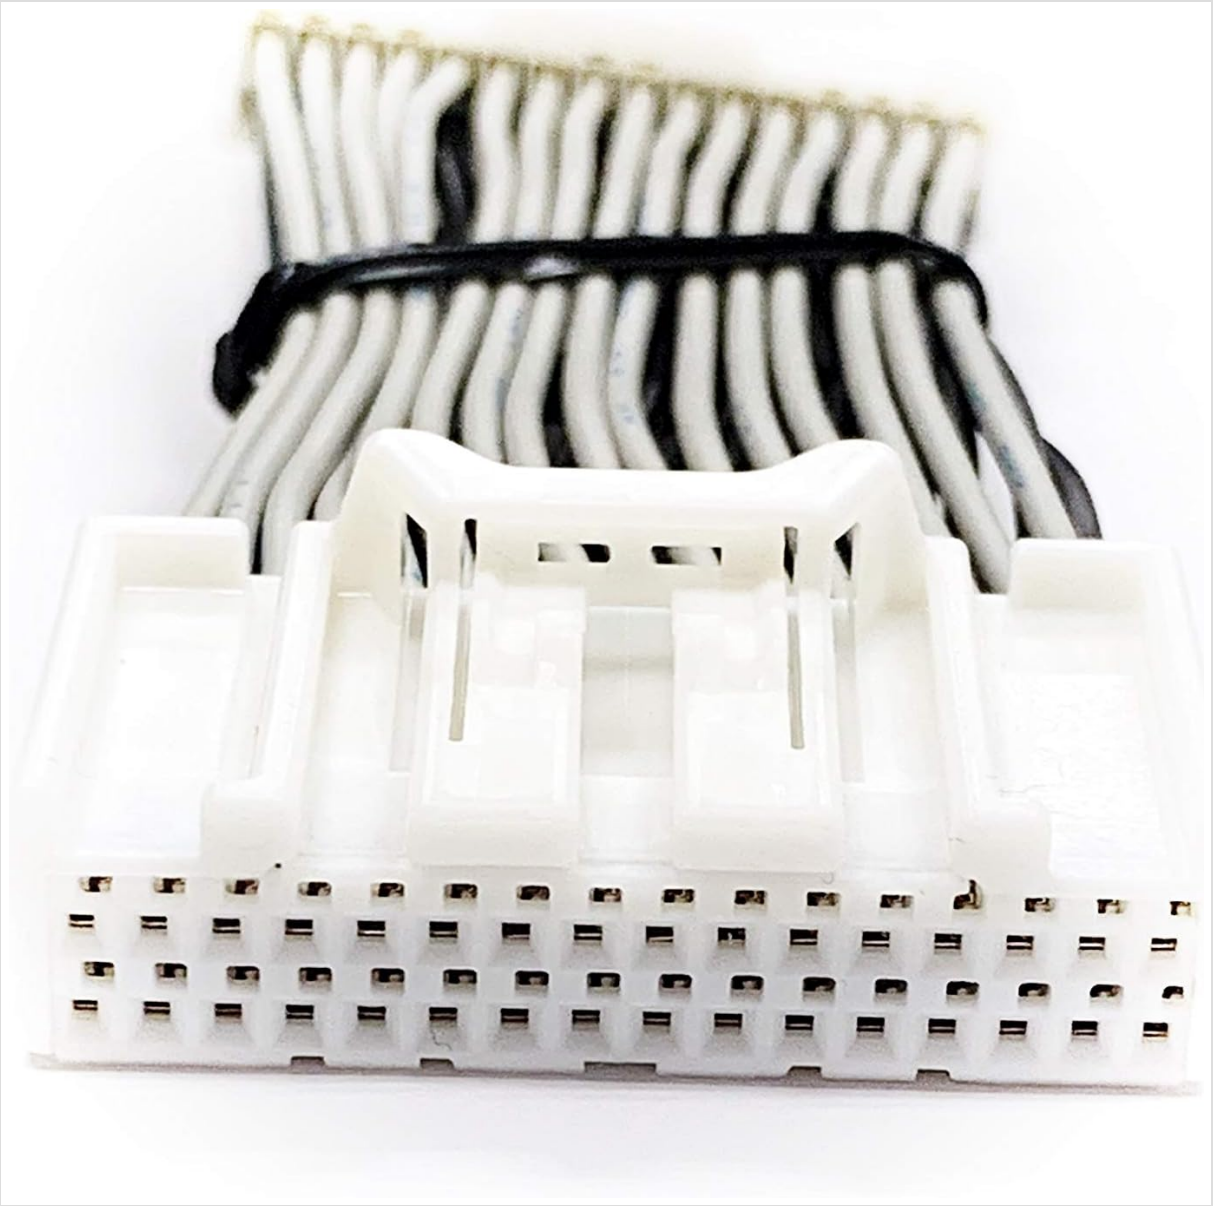

Image: The SOUND OFF (STV-N11-32P) connector kit, showing the multi-pin connector and bundled wires. This is the primary component for enabling TV/DVD viewing and navigation control.

Setup and Installation

Installation of the (STV-N11-32P) kit involves connecting the provided harness to the rear of your Nissan MC315D-W navigation unit. No complex wiring procedures are required as the kit uses genuine connectors designed for direct plug-and-play integration.

1. **Preparation:** Ensure the vehicle's ignition is off and the battery is disconnected before beginning installation to prevent electrical damage.
2. **Access Navigation Unit:** Carefully remove the trim panels and fasteners required to access the rear of your Nissan MC315D-W navigation unit. Refer to your vehicle's service manual for specific instructions on removing the head unit.
3. **Connect Harness:** Locate the corresponding connector on the back of the navigation unit. Connect the kit's harness to this port. The kit is designed to match the original connector shape.
4. **Ground Wire Connection:** Secure the ground wire (typically a single wire with a terminal) from the kit to a suitable metal screw or bolt on the side of the navigation unit or vehicle chassis. This ensures proper electrical grounding.
5. **Reassembly:** Once the connections are secure, carefully reassemble the navigation unit and trim panels.

Reconnect the vehicle battery.

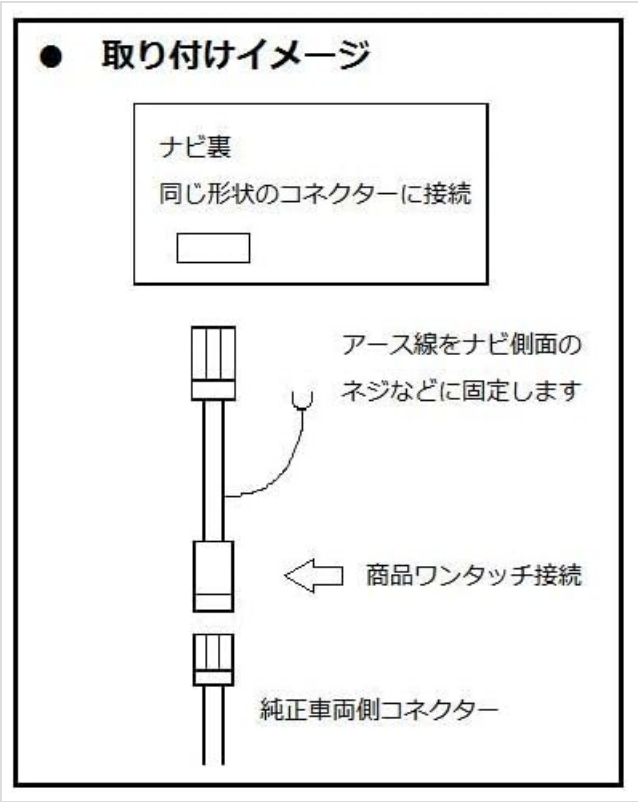

Image: Installation diagram illustrating the connection process. It shows the kit connecting to the back of the navigation unit ( ) to a connector of the same shape ( ). It also indicates securing the ground wire ( ) to a screw on the side of the navigation unit, and the one-touch connection of the product ( ) to the genuine vehicle-side connector ( ).

Note: After installation, the vehicle's position on the navigation map will not move while the kit is active. This is a normal function of the kit to enable video playback and navigation control during driving.

Operating Instructions

Once the (STV-N11-32P) kit is correctly installed, the following functionalities will be enabled:

- **TV/DVD Playback While Driving:** The kit allows passengers to view TV broadcasts and DVD movies (if the navigation unit supports DVD playback) on the vehicle's display while the vehicle is in motion.
- **Navigation System Operation While Driving:** You will be able to input destinations, adjust settings, and fully operate the navigation system even when the vehicle is moving.

No special controls or buttons are typically required to activate the kit's functions; they become active automatically upon proper installation. Ensure all connections are secure if functionality is not immediately apparent.

Maintenance

The (STV-N11-32P) kit is a passive electronic component and requires minimal maintenance. To ensure continued reliable operation:

- **Connection Integrity:** Periodically check that all connections to the navigation unit remain secure, especially if the vehicle experiences significant vibrations or if the head unit has been accessed for other reasons.
- **Cleanliness:** Keep the area around the navigation unit and wiring free from excessive dust or moisture.

Troubleshooting

If you encounter issues after installing the (STV-N11-32P) kit, consider the following troubleshooting steps:

- **No TV/DVD Playback While Driving:**
  - Verify all connectors are fully seated and secure at the back of the navigation unit.
  - Ensure the ground wire is properly connected to a clean, unpainted metal surface.
  - Confirm that your navigation unit supports DVD playback if you are attempting to watch DVDs.
- **Navigation Not Operable While Driving:**
  - Check all connections as described above.
  - Ensure the kit is compatible with your specific Nissan MC315D-W model.
- **Map Position Not Moving:** This is expected behavior when the kit is active. The kit intentionally prevents the map from updating vehicle position while driving to enable video playback and navigation control. This is not a malfunction.

If problems persist after performing these checks, contact SOUND OFF customer support for further assistance.

Specifications

Brand	SOUND OFF
Model Number	MU-5QGS-VVHI (Kit Identifier: STV-N11-32P)
Compatible Navigation Unit	Nissan MC315D-W
Functionality	Enables TV/DVD viewing and navigation control while driving.
Connection Type	Genuine plug-and-play connectors.
Package Dimensions	16.1 x 12.3 x 1.8 cm
Item Weight	50 g

Warranty and Support

This product comes with a **1-year warranty** from the date of purchase. Please retain your proof of purchase for warranty claims.

For technical support, warranty service, or any inquiries regarding the (STV-N11-32P) kit, please refer to the official SOUND OFF manufacturer's website or contact their customer service department. Contact information is typically available on the product packaging or the manufacturer's official online resources.
