## WeatherTech 110055

# WeatherTech Custom No Drill Splash Guard MudFlaps

Model: 110055 | Brand: WeatherTech

## Product Overview

The WeatherTech Custom No Drill Splash Guard MudFlaps are designed to provide superior protection for your vehicle's paint finish. Specifically engineered for select Toyota Tacoma models from 2016-2023, these mudflaps are a front pair, colored black, and are proudly manufactured in the USA. They offer an ideal defense against stone chips, mud, and grime that can be kicked up by your tires, helping to preserve the appearance of your fender and rocker panels.

## Installation Guide

WeatherTech MudFlaps are engineered for a straightforward installation process, often completed in minutes without the need for wheel or tire removal. Crucially, they require no drilling into your vehicle's painted metal surface, which helps prevent potential rust issues.

## Key Installation Features:

- **Laser Measured Fit:** Each mudflap is precisely laser-measured to ensure a tight, seamless fit for your specific vehicle's make and model.
- **No-Drill Design:** Eliminates the need for drilling, protecting your vehicle's finish and preventing rust.
- **Patented Quick-Turn Fastening System:** Utilizes a unique fastening system for swift and secure installation.

## Installation Steps:

1. Identify the correct mudflap for the front left and front right wheel wells.
2. Align the mudflap with the existing factory mounting points on your vehicle's fender.
3. Utilize the patented quick-turn fastening system to secure the mudflap in place. Ensure all fasteners are tightened securely to prevent movement.
4. Verify that the mudflap is flush against the vehicle's contour for optimal protection.

## Operating and Protection

Once installed, the WeatherTech MudFlaps provide continuous protection for your vehicle. Their contoured design works effectively to deflect road debris, such as rocks, mud, and slush, away from your vehicle's lower body panels. This significantly reduces the risk of paint damage, scratches, and corrosion caused by impacts from tire-thrown materials.

## Maintenance

Maintaining your WeatherTech MudFlaps is simple and requires minimal effort. Regular cleaning will help preserve their appearance and effectiveness.

- **Cleaning:** Wash the mudflaps with mild soap and water using a soft brush or cloth. Rinse thoroughly to remove all soap residue.
- **Inspection:** Periodically inspect the mudflaps and their fastening points to ensure they remain securely attached and free from damage.

## Troubleshooting

While WeatherTech MudFlaps are designed for easy installation and durability, here are some common issues and their resolutions:

| Problem | Possible Cause | Solution |
| --- | --- | --- |

| Problem | Possible Cause | Solution |
|---|---|---|
| Mudflap feels loose after installation. | Fasteners not fully engaged or tightened. | Re-check all quick-turn fasteners. Ensure they are fully turned and secured according to the installation instructions. |
| Mudflap does not sit flush against the fender. | Incorrect alignment during installation or debris behind the mudflap. | Remove the mudflap, clear any debris from the mounting area, and re-align carefully before re-fastening. Ensure it is the correct mudflap for that specific wheel well. |

## Specifications

**Brand:** WeatherTech

**Model Number:** 110055

**Color:** Black

**Vehicle Service Type:** Select 2016-2023 Toyota Tacoma Models

**Auto Part Position:** Front

**Installation Type:** Screw-In (No-Drill using patented quick-turn fasteners)

**Finish Type:** Powder Coated

**Item Weight:** Approximately 2.3 pounds

**UPC:** 787765942713

**Manufacturer:** Weathertech
