NUBAND NU-G0015

Nuband NU-G0015 Pulse Activity and Tracking Watch User Manual

Model: NU-G0015

INTRODUCTION

Welcome to the user manual for your Nuband NU-G0015 Pulse Activity and Tracking Watch. This guide provides comprehensive instructions on setting up, operating, and maintaining your device to ensure optimal performance. The Nuband Pulse is designed to help you monitor your activity, heart rate, and sleep patterns, supporting your fitness journey.

PRODUCT OVERVIEW

Front view of the Nuband NU-G0015 Pulse Activity and Tracking Watch, showing its black band, silver accents, and the OLED display with time and date.

The Nuband NU-G0015 Pulse Watch as it appears when worn on a user's wrist, demonstrating its compact and sleek design.

The Nuband NU-G0015 Pulse is a versatile activity tracker featuring a heart rate sensor, OLED display, and smart alarm capabilities. It is designed for daily wear and can track various fitness metrics.

SETUP

1. Initial Charging

Before first use, fully charge your Nuband Pulse watch. Connect the charging cable to the designated port on the watch and plug the other end into a USB power source. A full charge typically takes 1-2 hours.

2. App Installation and Pairing

1. Download the official Nuband app from your smartphone's app store (iOS or Android).
2. Ensure Bluetooth is enabled on your smartphone.
3. Open the Nuband app and follow the on-screen instructions to create an account or log in.
4. Within the app, navigate to the device pairing section. The app will search for available Nuband devices.
5. Select "NU-G0015" from the list of found devices to initiate pairing. Confirm any pairing requests on both your phone and the watch.
6. Once paired, the watch's time and date will automatically synchronize with your phone.

Note: Some users have reported initial syncing difficulties. Ensure your phone's Bluetooth is active, location services are enabled for the app, and try restarting both the watch and the app if issues persist. You may need to allow downloads from unknown sources in your phone's security settings temporarily during initial setup, then disable it afterwards.

OPERATING INSTRUCTIONS

Basic Navigation

The Nuband Pulse features an OLED display. Interact with the watch using the touch-sensitive area or button (if present) to cycle through different screens such as time, steps, distance, calories, heart rate, and sleep data.

Activity Tracking

- **Steps, Distance, Calories:** The watch automatically tracks your daily steps, estimated distance covered, and calories burned. View these metrics directly on the watch display or in detail within the Nuband app.
- **Heart Rate Monitoring:** The built-in HRM (Heart Rate Monitor) continuously or periodically measures your heart rate. Ensure the watch is snug on your wrist for accurate readings. Data can be viewed on the watch and in the app.

- **Sedentary Reminder:** Enable the sedentary reminder in the app to receive alerts when you have been inactive for a prolonged period, encouraging you to move.

Sleep Tracking

Wear the watch to bed for automatic sleep tracking. The watch monitors your sleep patterns, including light and deep sleep stages. Review your sleep data and quality reports in the Nuband app.

Smart Alarm

Set smart alarms through the Nuband app. These alarms can gently wake you during an optimal sleep stage within a set window, promoting a more refreshed feeling upon waking.

MAINTENANCE

- **Cleaning:** Regularly clean your watch and band with a soft, damp cloth. Avoid harsh chemicals or abrasive materials.
- **Water Resistance:** The watch is designed for daily wear and is splash-proof, but it is not suitable for swimming or showering. Avoid prolonged exposure to water.
- **Storage:** Store the watch in a cool, dry place when not in use.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge it when the battery indicator is low.

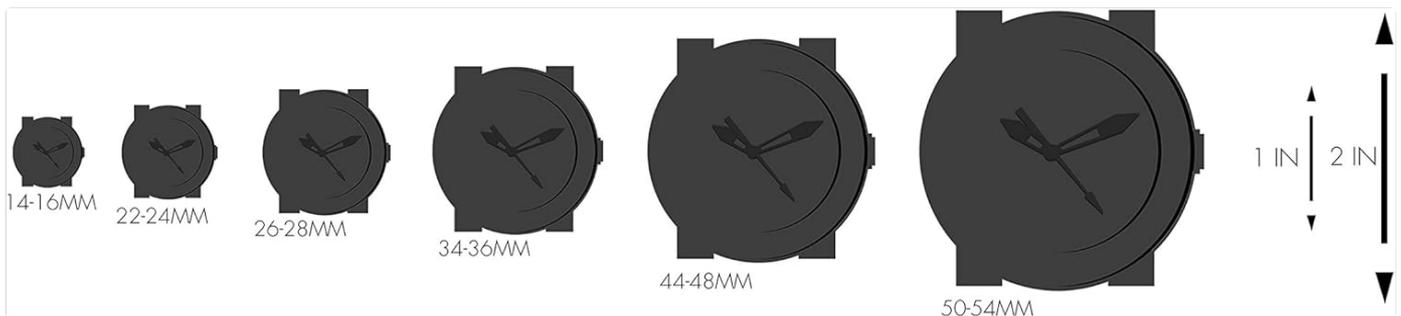

TROUBLESHOOTING

Issue	Possible Cause	Solution
Watch not syncing with phone	Bluetooth off, app permissions, app glitch, watch not connected.	<p>Ensure Bluetooth is enabled on your phone.</p> <p>Check if location services are enabled for the Nuband app.</p> <p>Restart both the watch and the Nuband app.</p> <p>Try unpairing and re-pairing the device in the app's settings.</p> <p>Ensure the watch battery is not critically low.</p>
Inaccurate heart rate readings	Watch fit too loose/tight, sensor dirty, excessive movement.	<p>Adjust the watch band to be snug but comfortable on your wrist.</p> <p>Clean the heart rate sensor on the back of the watch.</p> <p>Remain relatively still during heart rate measurements.</p>
Display not turning on	Low battery, watch frozen.	<p>Charge the watch for at least 30 minutes.</p> <p>Attempt a soft reset (refer to app or online resources for specific reset instructions if available).</p>

SPECIFICATIONS
