SETUP AND ASSEMBLY

This model kit is designed for easy assembly without the need for glue or paints. All markings and insignias are pre-printed on the model components. Follow these steps for assembly:

1. Identify all major components of the airplane model.
2. Carefully attach the wings to the fuselage using the provided screws. Ensure proper alignment.
3. Secure the tail section to the rear of the fuselage.
4. Attach any remaining smaller components, such as landing gear or propellers, as indicated by the design.
5. Use the included screwdriver to tighten all screws gently. Do not overtighten.

OPERATING AND DISPLAY

Once assembled, your Spad S.V II model is ready for display. Place it on a stable, flat surface. The included display stand can be used to enhance its presentation. Handle the model with care to avoid damage to delicate parts.

MAINTENANCE

To keep your model in optimal condition:

- **Cleaning:** Gently dust the model with a soft, dry cloth. Avoid using liquid cleaners or abrasive materials, as these may damage the finish or printed details.
- **Storage:** If storing the model, place it in a protective container away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or material degradation.

TROUBLESHOOTING

- **Loose Parts:** If any parts become loose after assembly, gently re-tighten the corresponding screws with the provided screwdriver.
- **Missing Components:** If you find any components missing upon unboxing, please contact NewRay customer support for assistance.
- **Assembly Difficulty:** Refer to the assembly steps and demonstration videos. Ensure all parts are correctly oriented before attempting to secure them.
