Britzgo BHA-220D

Britzgo BHA-220D Silver Hearing Amplifier Instruction Manual

Model: BHA-220D

Introduction

This manual provides essential information for the proper use and maintenance of your Britzgo BHA-220D Silver Hearing Amplifier. Please read it thoroughly before operating the device to ensure optimal performance and longevity.

Key Features:

- Digitally designed for enhanced sound clarity.
- Super efficient battery life for extended use.
- Simple and intuitive design for ease of use.
- Safe, lightweight, and comfortable fit.
- Changeable tube to fit both left and right ears.

Setup Instructions

1. Battery Installation

The Britzgo BHA-220D uses zinc-air batteries. To install a battery:

1. Gently open the battery compartment located at the bottom of the hearing amplifier.
2. Remove the protective tab from the new battery. Allow the battery to air activate for a few minutes before insertion.
3. Insert the battery with the positive (+) side facing upwards (usually indicated by a blue label).
4. Close the battery compartment firmly until it clicks into place.

Video: Detailed instructions on how to correctly install the battery into the Britzgo BHA-220D hearing amplifier.

2. Earplug Selection and Fitting

Proper earplug selection is crucial for comfort and to prevent whistling. The device comes with various sizes of ear domes.

1. Select an ear dome that fits snugly into your ear canal without causing discomfort. A good seal prevents feedback (whistling).
2. Attach the selected ear dome to the speaker of the hearing amplifier.
3. Adjust the rotatable ear tube to ensure it comfortably hooks over your ear.
4. Insert the ear dome into your ear canal, ensuring the speaker is sealed tightly.

Operating Instructions

1. Power On/Off

Locate the independent switch on the device. Slide it upwards to turn the amplifier ON and downwards to turn it OFF.

2. Volume Control

The device comes preset to the lowest volume. Use the volume control buttons (usually marked '+' and '-') to adjust the sound level to your

comfort. Avoid excessively loud volumes to prevent discomfort or potential hearing fatigue.

3. Mode Selection

The Britzgo BHA-220D features four frequency modes to adapt to various sound environments. Press the 'M' (Mode) button to cycle through the modes. Each mode change is indicated by a distinct beep pattern:

- **Mode 1 (1 beep):** General setting for everyday use.
- **Mode 2 (2 beeps):** Enhanced for low-frequency sounds.
- **Mode 3 (3 beeps):** Enhanced for high-frequency sounds.
- **Mode 4 (4 beeps):** Optimized for mid-range sounds, such as conversations.

The hearing amplifier is equipped with a memory function, so your preferred settings will be retained after powering off.

Maintenance

Regular cleaning ensures optimal performance and hygiene.

1. Power off the device every day after use.
2. Use the provided cleaning brush to gently remove any earwax or debris from the ear dome and the speaker opening.
3. Ensure the earplugs are free from clogging to maintain sound quality.
4. Store the amplifier in its protective case when not in use.

Video: Instructions on how to clean the hearing aid regularly to prevent earwax buildup and maintain functionality.

Troubleshooting

If you encounter any issues with your Britzgo BHA-220D, refer to the following common solutions:

- **Whistling Sound:** This often indicates a poor seal between the ear dome and your ear canal. Ensure the ear dome is correctly inserted and provides a tight fit. Try a different size ear dome if necessary.
- **Noise Problem:** For initial use, wear the device in a quiet environment. Ensure the earplug fits closely to the ear canal to minimize external noise interference.
- **Device Not Working:**
    a. Check if the battery is correctly installed and has sufficient power. Replace if necessary.
    b. Clean any earwax blocking the earplug or speaker.
    c. Adjust the volume and mode settings until you can hear clearly.
