- **Cleaning:** Wipe down the metal frame with a damp cloth and mild detergent. Avoid abrasive cleaners.

- **Slat Inspection:** Ensure all wooden slats are properly seated and free from damage.

7. Troubleshooting

If you encounter any issues with your bed frame, consider the following:

- **Squeaking Noises:** Squeaking often indicates loose bolts. Re-tighten all assembly hardware. Ensure the mattress is properly centered on the slats.

- **Mattress Sliding:** The wooden slats are equipped with anti-slip tape. Ensure the tape is clean and free from debris. If sliding persists, consider adding a non-slip mattress pad.
