3. PRODUCT FEATURES

- **4G LTE Connectivity:** Ensures reliable real-time tracking.
- **Magnetic & Weatherproof Case:** Allows for discreet and secure attachment to metal surfaces, protecting the device from harsh weather conditions.
- **Long-lasting Battery:** Features a 2600 mAh internal battery, providing approximately 2-3 weeks of operation on a single charge.
- **Real-time Tracking & Alerts:** Provides live location updates, speed information, and allows for setting up notifications for motion, arrival, or departure from specific locations.
- **Historical Data:** Stores up to six months of tracking history, accessible via the tracking software.
- **Geo-fencing:** Define custom boundaries and receive alerts when the tracker enters or exits these areas.

- **Global Coverage:** Operates in the United States, Canada, and Mexico.
- **Multi-platform Access:** Track via dedicated iOS/Android applications or through a web-based interface on any computer or tablet.

4. SETUP INSTRUCTIONS

4.1 Charging the Device

Before first use, fully charge your GPS tracker. Connect the provided USB wall plug charger to the tracker and a power outlet. The charging indicator light will show the charging status.

4.2 SIM Card Installation (if not pre-installed)

If your SIM card is not pre-installed, use the provided screwdriver to open the SIM card slot cover. Carefully insert the SIM card into the designated slot, ensuring correct orientation. Close the cover securely.

4.3 Activating the Tracker

A subscription is required for the tracker to function. Follow the instructions provided with your device or visit the Spy Spot website for activation details and plan selection. Once activated, the device will connect to the 4G LTE network.

4.4 Using the Magnetic Weatherproof Case

The magnetic weatherproof case provides protection and allows for discreet placement. Insert the GL 320MG tracker into the case. Ensure the case is securely closed. The strong magnets on the case allow it to be attached to any flat metal surface, such as the underside of a vehicle.

5. OPERATING INSTRUCTIONS

5.1 Accessing the Tracking Software

The Spy Spot GL 320MG tracker can be monitored using the dedicated mobile application (available for iOS and Android) or through the web-based interface. Download the app from your device's app store or visit the Spy Spot website to access the online portal. Log in using your activated account credentials.

REMOTELY ACCESS FROM ANY DEVICE

Monitor on your phone, tablet, or computer

NO ADDITIONAL ROAMING CHARGES

5.2 Real-time Tracking

Once logged in, you will see the current location of your tracker on a map. The interface provides details such as location coordinates, speed, and battery level. You can switch between map, satellite, and street views for detailed environmental context.

Your browser does not support the video tag.

Video: Demonstration of the Spy Spot 4G LTE Micro GPS Tracker's real-time tracking capabilities through the application interface, showing live location updates and historical data.

5.3 Historical Playback

The tracking software stores up to six months of historical data. Navigate to the "History" or "Reports" section within the app or web interface to view past routes, stops, and events. This feature allows you to review the tracker's movements over a specified period.

5.4 Setting Up Alerts and Geo-fences

Configure various alerts to receive notifications via text message or email. These alerts can include:

- **Motion Alert:** Notifies you when the tracker begins moving.
- **Speed Alert:** Triggers if the tracker exceeds a predefined speed limit.
- **Geo-fence Alert:** Set up virtual boundaries (geo-fences) on the map. You will receive an alert when the tracker enters or exits these defined areas.

Image: The Spy Spot tracking application interface demonstrating the process of setting up a geo-fence, a virtual boundary on the map.

6. MAINTENANCE

- **Charging:** Recharge the device regularly to ensure continuous tracking. Battery life is approximately 2-3 weeks depending on usage and reporting frequency.
- **Case Integrity:** Periodically inspect the magnetic weatherproof case for any damage or wear to ensure it remains sealed and protective.
- **Cleaning:** Clean the device and case with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Software Updates:** Keep your mobile application and web interface updated to the latest versions for optimal performance and new features.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No location updates	Device is out of battery, out of cellular coverage, or subscription is inactive.	Charge the device. Move to an area with better cellular signal. Verify subscription status.
Inaccurate location	Weak GPS signal (e.g., indoors, dense urban areas), or device is not positioned optimally.	Move the device to an open area with clear sky view. Ensure it's not obstructed by metal or thick materials.
Device not turning on	Battery is completely drained.	Connect to charger and allow several minutes for it to power on.
App/Web interface issues	Outdated app, browser compatibility, or internet connectivity issues.	Update the app or try a different browser. Check your internet connection. Clear browser cache.

8. SPECIFICATIONS

Feature	Detail
Model Number	GL 320MG
Connectivity	4G LTE Cellular
Battery	2600 mAh (approx. 2-3 weeks battery life)
Special Features	Magnetic, Waterproof, Portable
Color	Black
Item Weight	1.04 pounds
Supported Application	GPS Tracking App (iOS/Android), Web Interface
Coverage	United States, Canada, Mexico
