5. MAINTENANCE

To ensure the longevity and appearance of your tectake storage unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the surfaces with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or solvents, as these can damage the plastic coating.
- **Dusting:** Regularly dust the unit with a dry, soft cloth to prevent dust buildup.
- **Spills:** In case of spills, wipe them immediately with a dry cloth to prevent moisture absorption into the MDF.
- **Inspection:** Periodically check all screws and fittings to ensure they remain tight. Retighten if necessary.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit feels unstable or wobbly.	Screws are loose; unit is not level; unit is not wall-mounted.	Ensure all screws are tightened. Place the unit on a level surface. Utilize the anti-tip strap to secure the unit to a wall.
Difficulty inserting shelf pins or shelves.	Holes are misaligned; pins are not fully inserted.	Ensure pins are pushed firmly into the holes. If holes seem misaligned, double-check the orientation of the side panels during assembly.
Visible screw heads on the top panel.	Plastic caps not used or not fitting properly.	Ensure the small plastic caps provided are firmly pressed into the screw heads for a more aesthetic finish.
Stickers on panels are difficult to remove.	Adhesive is strong.	Carefully peel off stickers. If residue remains, use a small amount of rubbing alcohol or a specialized adhesive remover on a soft cloth, testing on an inconspicuous area first to avoid damaging the finish.
