WORX WA0010

WORX WA0010 Replacement Spool Line User Manual

Model: WA0010

For WORX GT Trimmers: WG150, WG151, WG152, WG155, WG165, WG167

Introduction

The WORX WA0010 10-Foot Grass Trimmer Edger Spool Line is an original equipment manufacturer (OEM) replacement part designed for specific WORX GT trimmer models. This 12-pack ensures you have a ready supply of durable line for consistent trimming and edging performance. Each spool comes pre-wound with 10 feet of high-quality trimmer line, facilitating quick and easy replacement.

This image shows the WORX WA0010 replacement spool line. It features a vibrant red trimmer line neatly wound around a durable orange plastic spool, ready for installation into compatible WORX GT trimmers.

Setup and Installation

Proper installation of the replacement spool line is crucial for optimal performance and safety. Always ensure your trimmer is unplugged or has its battery removed before performing any maintenance or installation.

1. **Prepare the Trimmer:** Disconnect the trimmer from its power source (unplug electric models or remove battery from cordless models).
2. **Remove Spool Cap:** Locate the spool cap on the trimmer head. Depending on your model, you may need to press tabs or twist the cap to remove it.
3. **Remove Old Spool:** Carefully remove the empty or damaged spool from the trimmer head. Note the orientation of the old spool for correct installation of the new one.
4. **Install New Spool:** Take a new WORX WA0010 spool. Ensure the end of the trimmer line is threaded through the eyelet on the spool cap or trimmer head, as per your trimmer's specific design. Place the new spool into the trimmer head, aligning any notches or guides.
5. **Reattach Spool Cap:** Securely reattach the spool cap, ensuring it clicks into place or is firmly twisted on. Gently pull on the line to confirm it is properly seated and feeds freely.

Operating Guidelines

Once the WA0010 spool line is installed, your WORX GT trimmer is ready for use. The line is designed for automatic feeding in

compatible models.

- **Automatic Line Feed:** Most WORX GT trimmers feature an automatic line feed system. The line will extend as needed during operation, typically when the motor speed decreases or when the trimmer head is tapped on the ground (bump feed models).
- **Optimal Cutting:** For best results, operate the trimmer at full speed. Cut grass and weeds with the tip of the line, using a sweeping motion. Avoid forcing the line into thick brush, which can cause premature wear or breakage.
- **Edging:** When using the trimmer for edging, ensure the line is extended to the proper length for a clean cut along sidewalks or driveways.

Maintenance

Proper maintenance of your spool line and trimmer will extend their lifespan and ensure consistent performance.

- **Storage:** Store unused spools in a cool, dry place away from direct sunlight. Extreme temperatures can affect the line's flexibility and durability.
- **Line Inspection:** Periodically inspect the line for fraying, nicks, or excessive wear. Replace the spool if the line appears damaged.
- **Clean Trimmer Head:** After each use, clean any grass clippings or debris from the trimmer head and spool area. This prevents buildup that could impede line feeding.

Troubleshooting

If you encounter issues with your WA0010 spool line, consider the following common solutions:

- **Line Not Feeding:**
  - Ensure the spool is correctly installed and the line is not tangled inside the spool housing.
  - Check for debris or grass buildup around the line exit hole.
  - Verify the line is not fused together on the spool due to heat or age. If so, replace the spool.
- **Line Breaking Frequently:**
  - Avoid cutting against hard surfaces like concrete, rocks, or fences.
  - Ensure the trimmer is operating at full speed when cutting.
  - The line may be old or stored improperly, leading to brittleness. Replace with a fresh spool.
- **Spool Not Fitting:**
  - Confirm you have the correct WA0010 spool for your specific WORX GT trimmer model (WG150, WG151, WG152, WG155, WG165, WG167).
  - Ensure the spool is oriented correctly within the trimmer head.

Specifications

Model Number	WA0010
Line Length per Spool	10 feet
Quantity	12 Spools per Pack
Compatibility	WORX GT Trimmers: WG150, WG151, WG152, WG155, WG165, WG167
Color	Red Line, Orange Spool
Item Weight	8 ounces (total for pack)

Product Dimensions	1.6 x 1.6 x 0.81 inches (per spool)
UPC	600649688579, 641606964497, 744211673461

Warranty and Support

For specific warranty information regarding your WORX WA0010 replacement spool line, please refer to the documentation provided with your original WORX GT trimmer or visit the official WORX website. If you have questions or require assistance, please contact WORX customer support directly.
