3. ASSEMBLY INSTRUCTIONS

Assembling nanoblock models requires patience and attention to detail due to the micro-sized nature of the blocks. Please follow the included step-by-step instruction sheet carefully.

3.1 General Tips for Assembly:

1. **Sort Your Pieces:** Before starting, it is highly recommended to sort your nanoblock pieces by color and shape. This will significantly speed up the building process and reduce frustration.
2. **Work on a Clean, Flat Surface:** Ensure your workspace is clean and free from clutter to prevent

losing any small pieces.

- 3. **Follow Layer by Layer:** nanoblock instructions typically guide you layer by layer. Pay close attention to the orientation of each piece as shown in the diagrams.
- 4. **Use Proper Pressure:** Apply firm but gentle pressure to connect the blocks. Avoid excessive force, which can damage the pieces.
- 5. **Reference Faded Sections:** In the instruction diagrams, faded sections indicate parts that have already been assembled in previous steps. Focus on the brightly colored sections for the current step.

5. SAFETY INFORMATION

WARNING: CHOKING HAZARD - Small Parts. Not for children under 3 years.

This product contains very small parts and is intended for individuals aged 15 years and up. Keep all pieces out of reach of young children and pets to prevent accidental ingestion.

6. MAINTENANCE

To keep your nanoblock model in optimal condition:

- **Cleaning:** Gently dust your assembled model with a soft brush or a can of compressed air. For stubborn dirt, use a slightly damp cloth, but avoid excessive moisture.
- **Storage:** Store your nanoblock model in a stable location away from direct sunlight and extreme temperatures to prevent discoloration or warping of the plastic.
- **Handling:** Handle the model with care, as excessive force can cause pieces to detach.

7. TROUBLESHOOTING

If you encounter any issues during assembly:

- **Missing Pieces:** Double-check all packaging and your workspace. If pieces are genuinely missing, refer to the warranty and support section for contact information.
- **Difficulty Connecting Pieces:** Ensure the pieces are correctly aligned and apply gentle, even pressure. Sometimes, a slight twist can help.
- **Model Instability:** Re-examine previous steps to ensure all connections are secure and pieces are placed in the correct orientation. Incorrect placement of even one piece can affect the overall stability.
