DaVinci M5501G

DaVinci Kalani 4-in-1 Convertible Crib Instruction Manual

Model: M5501G

INTRODUCTION

This manual provides detailed instructions for the assembly, conversion, and maintenance of your DaVinci Kalani 4-in-1 Convertible Crib. Please read all instructions carefully before assembly and retain this manual for future reference. The DaVinci Kalani crib is designed to convert from a crib to a toddler bed, daybed, and full-size bed, offering long-term utility.

SAFETY INFORMATION

Your child's safety is paramount. Always adhere to the following safety guidelines:

- Read all instructions before assembling the crib.
- Do not use this crib if any parts are missing, damaged, or broken. Contact DaVinci for replacement parts. Do not substitute parts.
- Ensure all bolts and fasteners are securely tightened. Periodically check and retighten as necessary.
- Do not place the crib near windows where cords from blinds or drapes could strangle a child.
- Do not place items with a string or ribbon around a child's neck, such as pacifier cords or necklaces. These can cause strangulation.
- Do not suspend strings or toys over the crib.
- The mattress used with this crib must be at least 27 1/4 inches (69 cm) by 51 5/8 inches (131 cm) with a thickness not exceeding 6 inches (15 cm).

- When your child is able to climb out, or reaches 35 inches (89 cm) in height, the crib should no longer be used.
- The DaVinci Kalani crib is GREENGUARD Gold Certified, meaning it has been tested for over 10,000 chemical emissions and VOCs, contributing to healthier indoor air quality.

COMPONENTS LIST

Verify that all components are present before beginning assembly. The DaVinci Kalani 4-in-1 Convertible Crib includes the following:

- 4-in-1 Convertible Crib (main frame and components)

Additional conversion kits for toddler bed (No. M3099) and full-size bed (No. M4799) are sold separately and are required for those configurations.

ASSEMBLY INSTRUCTIONS

Assembly requires basic tools, typically an Allen wrench (often included) and a Phillips head screwdriver. It is recommended to have two adults for assembly.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a soft, clean surface to prevent scratching. Identify each part using the provided parts list in your separate assembly guide.
2. **Attach Side Rails:** Secure the side rails to the headboard and footboard using the provided hardware. Ensure all connections are tight.
3. **Install Mattress Support:** Position the mattress support at the desired height. The crib features four adjustable mattress positions. For newborns, the highest position is typically used. Lower the mattress support as your child grows and becomes more mobile.
4. **Final Tightening:** Once all parts are assembled, re-check and tighten all bolts and screws to ensure stability. Do not overtighten.

OPERATING INSTRUCTIONS: 4-IN-1 CONVERTIBILITY

The DaVinci Kalani crib is designed to adapt to your child's growth through four stages:

Image: Visual representation of the crib's four conversion stages: full-size crib, toddler bed, daybed, and full-size bed.

1. Crib Configuration

This is the initial setup for infants. Ensure the mattress support is adjusted to an appropriate height for your child's age and mobility. The highest setting is for newborns, and it should be lowered as the child grows and can sit or stand.

2. Toddler Bed Conversion

When your child is ready to transition from a crib, typically between 18 months and 3 years, you can convert it to a toddler bed. This requires the separate Toddler Conversion Kit (No. M3099).

1. Remove the front rail of the crib.
2. Attach the toddler safety rail from the conversion kit to the designated points.
3. Ensure the mattress support is at the lowest position.

3. Daybed Conversion

The daybed configuration offers an open side for easy access, suitable for older toddlers or as a small seating area. This conversion typically uses the existing crib components.

1. Remove the front rail of the crib.
2. No additional rail is used for the daybed configuration, leaving one side open.
3. Ensure the mattress support is at the lowest position.

4. Full-Size Bed Conversion

For long-term use, the crib can be converted into a full-size bed. This requires the separate Full-Size Conversion Kit (No. M4799) and a standard full-size mattress and box spring (not included).

1. Disassemble the crib, retaining the headboard and footboard.
2. Attach the full-size bed rails from the conversion kit to the headboard and footboard.
3. Place a full-size mattress and box spring onto the bed frame.

MAINTENANCE

Proper care will ensure the longevity and safety of your DaVinci Kalani crib.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or strong chemicals, as these can damage the finish.
- **Inspections:** Periodically check all screws, bolts, and fasteners to ensure they are tight. Retighten as needed.
- **Storage:** If disassembling for storage, keep all hardware in a sealed bag and store it with the crib components in a dry, temperate environment.
- **Wood Care:** The crib is made from 100% solid sustainable New Zealand pine wood. Avoid prolonged exposure to direct sunlight or extreme temperature changes, which can affect the wood.

TROUBLESHOOTING

If you encounter issues with your DaVinci Kalani crib, consider the following:

- **Wobbly Crib:** Ensure all bolts and screws are fully tightened. If the issue persists, disassemble and reassemble, carefully following the instructions to ensure all parts are correctly aligned.
- **Missing Parts:** If any parts are missing upon unboxing, do not attempt to assemble the crib. Contact DaVinci customer support immediately for replacement parts.
- **Difficulty with Conversion:** Review the specific conversion instructions for the toddler, daybed, or full-size bed. Ensure you have the correct conversion kits if required.

SPECIFICATIONS

Feature	Detail
Brand	DaVinci
