# Touchstone Sideline 36-inch Smart Electric Fireplace (Model 80014) Instruction Manual

Model: 80014 | Brand: Touchstone

## 1. IMPORTANT SAFETY INFORMATION

Please read and understand this entire instruction manual before attempting to assemble, operate, or install this electric fireplace. Failure to follow these instructions may result in electric shock, fire, property damage, or personal injury.

- Always disconnect the fireplace from the power supply before cleaning or performing maintenance.
- Do not use this fireplace outdoors.
- Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains, at least 3 feet (0.9 m) from the front of the fireplace.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the fireplace.
- This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm (Proposition 65 warning).

## 2. SETUP AND INSTALLATION

The Touchstone Sideline electric fireplace is designed for recessed in-wall mounting. Careful planning and measurement are essential for a successful installation.

### 2.1 Pre-Installation Considerations

- **Location:** Choose a location that allows for proper clearance. A minimum of 8 inches of space is recommended between the top of the fireplace and any television, mantel, or ceiling.
- **Ventilation:** This fireplace is ventless. Ensure no obstructions block the front-facing heater vents.
- **Electrical Requirements:** The unit draws a maximum of 12 amps. It can be used on a 15-amp circuit, but a dedicated 20-amp circuit may be necessary if other electronics share the same circuit.
- **Existing Fireplace Openings:** The Sideline can be installed in existing fireplace openings. Consult a licensed professional to properly secure any unused gas lines and vents.

## 2.2 Measuring for Recessed Installation

Before ordering or beginning installation, measure the height, width, and depth of your intended fireplace opening to ensure a perfect fit.

**Image Description:** A diagram illustrating the rough opening dimensions required for recessed installation of the fireplace. The diagram shows a wall cutout with labels for height (20 1/4" H), depth (5 3/4" D), and width (32 3/4" W).

## 2.3 Installation Steps

1. **Prepare the Opening:** Create a framed opening in your wall according to the specified dimensions (refer to the technical drawing in Section 5).
2. **Power Connection:** The unit comes with a 6-foot power cord for a standard 110-120V outlet. It is also hard-wire ready for direct electrical connection. Ensure power is off before connecting.
3. **Insert Fireplace:** Carefully slide the fireplace into the prepared opening.
4. **Secure Unit:** Attach the fireplace to the framing studs using the provided screws and drywall anchors. The unit includes a wall-mount bracket if you choose not to recess it.

**Image Description:** A series of three images demonstrating the simple installation process. The first image shows a framed wall opening. The second and third images show individuals carefully inserting the fireplace into the opening and securing it to the framing studs.
