Troubleshooting

Most issues with Hot Wheels vehicles are minor and can be resolved with simple checks.

Problem	Possible Cause	Solution
Wheels not rolling smoothly	Debris caught in axle, bent axle, or worn wheel.	Carefully remove any visible debris. If the axle is bent, gentle straightening may be possible, but avoid excessive force. Worn wheels may indicate the end of the vehicle's functional lifespan.
Paint chipping or decals peeling	Rough handling, prolonged exposure to elements, or normal wear and tear.	This is typically cosmetic wear. To prevent further damage, handle with care and store properly.

Problem	Possible Cause	Solution
Vehicle does not fit on track	Track incompatibility or vehicle design.	Ensure the track pieces are correctly assembled. While most Hot Wheels cars fit standard tracks, some specialized vehicles may have unique dimensions.
