Game Objective

The objective of Monopoly Game: Star Wars Edition is to be the last player remaining with money and properties, driving all other players into bankruptcy.

Player Turn Sequence

1. **Roll the Dice:** The current player rolls both dice.
2. **Move Your Token:** Move your ship token clockwise around the board the number of spaces indicated by the dice roll.
3. **Action on Space:** Perform the action corresponding to the space your token lands on. This may include:
    - **Unowned Property:** You may buy the property for the price indicated. If you choose not to buy it, the Banker immediately auctions it to the highest bidder.
    - **Owned Property:** If another player owns the property, you must pay them rent as indicated on the property space.
    - **Chance Space:** Draw the top Chance card and follow its instructions. Return the card to the bottom of the deck after use.
    - **Go Space:** If you pass or land on "GO", collect $200 from the Bank.
    - **Tax Spaces:** Pay the indicated tax to the Bank.
    - **Go to Jail:** Move your token directly to the "Jail" space. You do not collect $200 for passing "GO".
    - **Free Parking:** No action required.
4. **Use the Force:** This edition includes a special "Force" mechanic. If you land on a "Force" space, or if a Chance card instructs you to, you can use the Force to perform special abilities such as swapping properties, stealing money, or collecting extra funds. Refer to the specific rules for "The Force" in the game guide for detailed instructions on these abilities.
5. **End of Turn:** Once your action is complete, play passes to the player on your left.

Winning the Game

The game continues until only one player remains solvent. All other players who have gone bankrupt are out of the game. The last player remaining is the winner.
