

## P3 P7816

# P3 P7816 Attack Wave Pestrepeller Instruction Manual

## INTRODUCTION

Thank you for choosing the P3 P7816 Attack Wave Pestrepeller. This device is designed to help deter common household pests using advanced technology. Please read this manual thoroughly before operating the unit to ensure proper use, optimal performance, and safety. Keep this manual for future reference.

## IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- This device is for indoor use only. Do not expose to moisture or extreme temperatures.
- Do not open the casing or attempt to repair the unit. Refer all servicing to qualified personnel.
- Keep the device out of reach of children and pets to prevent accidental damage or misuse.
- Ensure the power outlet matches the voltage requirements of the device.
- Unplug the device from the outlet when not in use or before cleaning.

## PRODUCT FEATURES

The P3 P7816 Attack Wave Pestrepeller utilizes ultrasonic sound waves to create an uncomfortable environment for pests, encouraging them to leave your home. It is designed for continuous operation and is suitable for various indoor areas.

**Image Description:** This image displays the P3 P7816 Attack Wave Pestrepeller unit. It is a compact, light-colored device with a rounded top and bottom. The front panel features a small red push-button and a circular port, likely for power or an accessory. The brand name 'Attack Wave Pestrepeller' is visible on the top surface, printed in blue text.

## SETUP

1. **Unpacking:** Carefully remove the P3 P7816 Attack Wave Pestrepeller from its packaging.
2. **Placement:** Choose an indoor location where pest activity is observed. For optimal performance, place the unit in an open area, free from obstructions like furniture, curtains, or carpets that can absorb ultrasonic waves. Avoid placing it behind large objects.
3. **Power Connection:** Plug the device directly into a standard electrical outlet (120V AC, 60Hz). Ensure the outlet is easily accessible.
4. **Indicator Light:** Once plugged in, a red indicator light (if present) should illuminate, signifying the unit is powered on and operating.

## OPERATING INSTRUCTIONS

The P3 P7816 Attack Wave Pestrepeller is designed for continuous, 24-hour operation. Once plugged in, the device will begin emitting ultrasonic waves. No further user interaction is typically required for its basic function.

- **Continuous Operation:** For best results, keep the unit plugged in at all times.
- **Initial Results:** It may take several days to a few weeks to notice a significant reduction in pest activity. Pests may initially appear more active as they are driven from their hiding places.

- **Coverage:** One unit is generally effective for a single room. For larger areas or multiple rooms, additional units may be required.

## MAINTENANCE

The P3 P7816 Attack Wave Pestrepeller requires minimal maintenance.

- **Cleaning:** Unplug the unit from the power outlet before cleaning. Wipe the exterior with a soft, dry cloth. Do not use liquid cleaners, sprays, or abrasive materials.
- **No User Serviceable Parts:** Do not attempt to open or modify the device. Doing so will void any warranty and may cause damage or injury.

## TROUBLESHOOTING

| Problem                                       | Possible Cause                                                                         | Solution                                                                                                                                                                      |
|-----------------------------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Unit is not working / Indicator light is off. | No power to the unit.                                                                  | Check if the unit is securely plugged into a working electrical outlet. Test the outlet with another appliance.                                                               |
| Pest activity has not decreased.              | Obstructions blocking ultrasonic waves; insufficient time for results; unit placement. | Ensure the unit is not blocked by furniture or soft materials. Allow 2-4 weeks for noticeable results. Consider repositioning the unit or adding more units for larger areas. |
| Pests appear more active.                     | Pests are being driven out of hiding.                                                  | This is a normal initial reaction. Continue to operate the unit. Activity should decrease over time.                                                                          |
