HQRP F1 Series Replacement Filter

HQRP Replacement HEPA Filters for Dirt Devil Upright Bagless Vacuums (F1 Series)

User Manual

Introduction

This manual provides essential information for the installation, maintenance, and optimal use of your HQRP F1 series replacement HEPA filters. These filters are designed to maintain the performance of your compatible Dirt Devil upright bagless vacuum cleaner by effectively capturing dust, dirt, and allergens.

Image: HQRP HEPA filter, illustrating its benefits including removal of dirt, dust, and allergens, ease of installation and cleaning, reusability, and air quality improvement.

Compatibility

The HQRP F1 series replacement filters are compatible with various Dirt Devil upright bagless vacuum models. These filters replace Dirt Devil F1 part numbers 2JC0360000 / 3JC0360000 and 2JC0280000 / 3JC0280000.
Important Note: These filters are specifically designed for Dirt Devil upright bagless vacuum models manufactured in March 2003 and later. They are compatible with models from the M088500, M088520, M088525 series C or newer. The series information can typically be found on the bottom or back of your vacuum cleaner (e.g., MFG Code C00B, where 'C' indicates the series).

Compatible Dirt Devil Vacuum Models:

- M085800, M085805, M085806 Scorpion Deluxe Vac / Ultra Swivel Glide
- M085810 Breeze Lightweight Upright
- M085830, M085835, M088105 Jaguar Bagless Vertical

- M086700, M086700W Vision Wide Glide
- M086930, M086935, M086940 Vision Bagless
- M087800, M087800W Ultra Vision Turbo
- M085840HD, M088160, M088160BHD, M088160RHD, M088160HD, M088161HD, M088162HD, M088110, M088110HD Breeze Bagless
- M088175, M088175TT Featherlight Bagless
- M088300, M088300B, M088300SC, M088300GC Vision Turbo
- M088450B Kinetix Turbo
- M085845, M088155, M088520, M088525, M088525B, M088520SV Featherlight Bagless
- M088705 Vision Swivel Glide
- M091950A Outlast
- MRY6100 Commercial Bagless Vertical
- UD40235, UD40235HD, UD40235DI Ultra Swivel Glide Bagless
- UD40330 Classic Bagless Vertical
- MHDU300, MHDU200

Setup (Filter Installation)

Proper installation of your HQRP replacement filter is crucial for maintaining your vacuum's suction power and filtration efficiency. Always ensure the vacuum is unplugged before performing any maintenance.

1. **Unplug the Vacuum:** Disconnect the vacuum cleaner from the power outlet to prevent accidental startup.
2. **Locate the Filter Compartment:** Refer to your Dirt Devil vacuum's original manual to locate the filter compartment. This is typically found in the dirt cup assembly or a dedicated filter housing.
3. **Remove the Dirt Cup:** Detach the dirt cup from the vacuum cleaner.
4. **Access the Old Filter:** Open the filter housing or twist/pull to remove the old filter. Dispose of the old filter responsibly.
5. **Insert New Filter:** Place the new HQRP HEPA filter into the compartment. Ensure it is seated correctly and securely. The filter should fit snugly to prevent air leaks.

6. **Reassemble:** Close the filter housing and reattach the dirt cup to the vacuum cleaner. Ensure all components are securely latched.
7. **Test:** Plug in the vacuum and perform a brief test to ensure proper operation and suction.

Operating Guidelines

Once installed, the HQRP HEPA filter works continuously to capture microscopic particles during vacuum operation. For optimal performance:

- Ensure the filter is always clean and free of excessive debris before each use.
- Do not operate the vacuum without the filter properly installed, as this can damage the motor and reduce air quality.
- Regularly check the filter for signs of wear or damage.

Maintenance

To prolong the life of your HQRP HEPA filter and maintain peak vacuum performance, regular cleaning is recommended. These filters are washable and reusable.

Cleaning Instructions:

1. **Remove Filter:** Follow the installation steps to safely remove the filter from your vacuum cleaner.
2. **Tap Out Debris:** Gently tap the filter over a trash can to dislodge loose dirt and dust.
3. **Rinse:** Rinse the filter under cool, running water until the water runs clear. Do not use soap or detergents.
4. **Air Dry Completely:** Allow the filter to air dry completely for at least 24 hours before reinstallation. Ensure it is absolutely dry to prevent mold growth and damage to the vacuum motor. Do not use heat to dry the filter.
5. **Reinstall:** Once completely dry, reinstall the filter as per the setup instructions.

Replacement Schedule: While these filters are reusable, their filtration efficiency can decrease over time. It is recommended to replace your HQRP HEPA filter every 3 to 6 months, or more frequently with heavy use, to ensure optimal air filtration and vacuum performance.

Troubleshooting

If you experience issues with your vacuum cleaner after installing the HQRP replacement filter, consider the following common troubleshooting steps:

- **Reduced Suction:**
  - Ensure the filter is clean and completely dry. A wet or clogged filter will restrict airflow.
  - Verify the filter is installed correctly and securely in its compartment.
  - Check for blockages in the vacuum hose, brush roll, or dirt cup.
- **Unusual Odors:**
  - A dirty filter can cause odors. Clean or replace the filter.
  - Ensure the dirt cup is emptied and cleaned regularly.

- **Dust Escaping Vacuum:**
  - Confirm the filter is correctly seated and the filter compartment is sealed.
  - The filter may be damaged or past its effective lifespan and requires replacement.

Specifications

Feature	Detail
Brand	HQRP
Material	HEPA
Filtration Class	Sub-HEPA H12
Particle Retention	99.97% of particles down to 0.3 microns
Compatibility	Dirt Devil F1 series, various upright bagless models (see Compatibility section)
Dimensions (Approximate)	Height: 8 inches (20.3 cm) Bottom Outer Diameter: 3 inches (7.6 cm) Top Outer Diameter: 2.75 inches (7.0 cm) Inner Diameter: 1.7 inches (4.3 cm)
Quantity	2 filters per pack
Reusability	Washable and Reusable
Model Number	887774702221611
UPC	887774990306
