EDUP AC600M USB WiFi Adapter User Manual

MODEL: FBA_EDUP-EP-1607

Introduction

This manual provides comprehensive instructions for the installation, operation, maintenance, and troubleshooting of your EDUP AC600M USB WiFi Adapter. This device is designed to provide high-speed dual-band wireless connectivity for your PC or laptop, supporting both 2.4GHz and 5GHz networks.

What's in the Box:

- 1* EDUP WiFi Adapter
- 1* CD driver
- 1* User manual

Setup

Follow these steps to set up your EDUP AC600M USB WiFi Adapter.

1. Driver Installation

For Windows 11/10 systems, the adapter typically works automatically as a plug-and-play device. If it does not, or for Windows 8/8.1/7/XP, manual driver installation is required.

1. Insert the provided CD driver into your computer's CD-ROM drive.
2. Follow the on-screen instructions to install the driver software.
3. Alternatively, download the latest driver and installation guide from the official EDUP website:szedup.com/usb-adapters/EPAC1607GS.html.
4. Once the driver installation is complete, restart your computer if prompted.

Operating Instructions

Once the adapter is installed, you can connect to a wireless network.

Connecting to a Wi-Fi Network:

1. Locate the Wi-Fi icon in your computer's system tray (usually in the bottom-right corner for Windows).

2. Click the Wi-Fi icon to view available wireless networks.

3. Select your desired network (SSID) from the list.

4. Click "Connect" and enter the network security key (password) if prompted.

5. The adapter supports dual-band connectivity, allowing you to connect to either 2.4GHz or 5GHz networks for optimal performance.

Image: This diagram shows the adapter's capability to connect to both 2.4GHz and 5GHz Wi-Fi bands, indicating different devices connected to each band.

AP Mode (Hotspot Functionality):

The EDUP AC600M USB WiFi Adapter supports Access Point (AP) mode, allowing you to create a Wi-Fi hotspot from your computer to share your internet connection with other Wi-Fi enabled devices.

1. Ensure your computer has an active internet connection (e.g., via Ethernet).

2. Open the wireless utility software installed with the adapter (or use Windows built-in Mobile Hotspot feature).

3. Enable AP mode and configure the network name (SSID) and password for your new hotspot.

4. Other devices can now connect to your computer's shared internet connection.

Bring you extreme fast experience

Excellent for online 4K video, gaming, high quality music, HD videos and streaming

Image: This illustration explains the two primary modes of operation: Wi-Fi Mode for connecting to existing networks and AP Mode for creating a personal Wi-Fi hotspot.

Maintenance

Proper maintenance ensures the longevity and optimal performance of your WiFi adapter.

- **Keep Clean:** Regularly clean the adapter and its USB port to prevent dust buildup, which can affect connectivity. Use a soft, dry cloth.
- **Avoid Physical Damage:** Handle the adapter carefully. Avoid bending the antenna excessively or exposing the device to extreme temperatures or moisture.
- **Driver Updates:** Periodically check the EDUP website (szedup.com/usb-adapters/EPAC1607GS.html) for updated drivers. Keeping drivers current can improve performance and compatibility.
- **Secure Connection:** Ensure the adapter is firmly seated in the USB port to maintain a stable connection.

Troubleshooting

If you encounter issues with your EDUP AC600M USB WiFi Adapter, refer to the following common problems and

solutions:

Problem	Possible Cause	Solution
Adapter not detected or not working.	Driver not installed or corrupted; loose USB connection; incompatible OS.	Ensure drivers are correctly installed (refer to Setup section). Try a different USB port. Restart your computer. Verify OS compatibility (Windows 11/10/8.1/8/7/XP only).
Slow Wi-Fi speed or frequent disconnections.	Interference; distance from router; outdated drivers; network congestion.	Move closer to your Wi-Fi router. Ensure no physical obstructions. Update adapter drivers. Try connecting to the 5GHz band if available and your router supports it. Reduce interference from other electronic devices.
Cannot connect to a specific Wi-Fi network.	Incorrect password; network not broadcasting SSID; router issues.	Double-check the Wi-Fi password. Ensure the network SSID is being broadcast. Restart your Wi-Fi router. Verify network settings on your computer.

If the issue persists after trying these solutions, please contact EDUP customer support for further assistance.

Specifications

| Feature	Detail
Model Number	FBA_EDUP-EP-1607
Wireless Type	5 GHz Radio Frequency, 2.4 GHz Radio Frequency, 802.11ac
Data Transfer Rate	Up to 600 Mbps (433Mbps at 5GHz, 150Mbps at 2.4GHz)
Hardware Interface	USB
Compatible Operating Systems	Windows 11/10/8.1/8/7/XP
Product Dimensions	3.4 x 2.7 x 0.5 inches
Item Weight	0.801 ounces
Color	Black
Antenna	2dBi External Antenna

Warranty and Customer Support

EDUP provides a 3-year manufacturer replacement warranty for this product. Additionally, a 90-day no-questions-asked

return policy is offered.

For any issues, technical support, or warranty claims, please contact EDUP customer support via Amazon message. We are committed to providing prompt assistance and solutions.
