As the mattress pad is vacuum-sealed, it will appear flat initially. To restore its fluffiness, you have two options:

1. **Option 1:** Tumble dry on low heat for approximately 20 minutes. This helps to evenly distribute the filling.

## 5. TROUBLESHOOTING

If you encounter any issues with your Bedsure mattress pad, refer to the following common solutions:

- **Pad appears flat after unboxing:** This is normal due to vacuum-sealing. Follow the fluffing instructions in Section 2.1. Tumble drying on low heat with a few tennis balls can help accelerate the fluffing process.
- **Pad shifts or bunches:** Ensure the deep pocket is fully stretched over all corners of your mattress. The elasticized skirt is designed to hold the pad securely in place. If your mattress is thinner than 8 inches, the fit might be less snug.
- **Unusual odor:** A slight odor may be present upon initial unboxing due to packaging. Air out the mattress pad in a well-ventilated area for 24-48 hours, or tumble dry on low heat as per instructions.
- **Reduced softness/fluffiness after washing:** Ensure the mattress pad is completely dry after washing. Over-drying or insufficient drying can affect the filling. Tumble dry on low heat with dryer balls to help re-fluff.
