Geberit G243173001

Geberit G243173001 Water Supply Hose

For Geberit Duofix Carrier 111.798

INTRODUCTION

This manual provides essential instructions for the safe and correct installation, operation, and maintenance of the Geberit G243173001 Water Supply Hose. This hose is specifically designed to connect the water supply to the Geberit Duofix Carrier 111.798, which is used with bidet seats. Please read this manual thoroughly before installation and keep it for future reference.

SAFETY INFORMATION

- Always shut off the main water supply before beginning any plumbing work.
- Ensure all connections are hand-tightened first, then gently tightened with a wrench to prevent leaks without overtightening.
- Inspect the hose and connections regularly for any signs of wear, damage, or leaks.
- If you are unsure about any step, consult a qualified plumber.

PACKAGE CONTENTS

The Geberit G243173001 package includes:

- 1 x Geberit G243173001 Water Supply Hose

No additional tools or components are included with this product.

SPECIFICATIONS

Model	G243173001
Brand	Geberit
Material	Rubber
Item Weight	3.04 ounces
Specific Use	Water supply connection for Geberit Duofix Carrier 111.798

SETUP AND INSTALLATION

Before you begin, ensure the main water supply to the toilet area is turned off. You may need a wrench for tightening connections.

1. **Prepare the Area:** Turn off the main water supply valve. Flush the toilet to drain the tank and bowl.
2. **Identify Connection Points:** The Geberit G243173001 hose has two distinct ends. One end connects to the water supply valve, and the other connects to the Geberit Duofix Carrier 111.798.
3. **Connect to Water Supply:** Carefully attach one end of the hose to the water supply valve. Hand-tighten first, then use a wrench for a quarter to half turn until snug. Do not overtighten.

OPERATING

After installation, slowly turn on the main water supply valve. Check all connections for leaks immediately. If no leaks are present, the system is ready for use with the Geberit Duofix Carrier and connected bidet seat.

MAINTENANCE

- Periodically inspect the hose and its connections for any signs of wear, cracks, bulges, or corrosion.
- Check for any drips or moisture around the connection points. Address any leaks promptly.
- Replace the hose if any damage is observed to prevent potential water damage.

TROUBLESHOOTING

Leaks at Connections

- **Cause:** Loose connection or damaged washer/gasket.
- **Solution:** Turn off water supply. Gently tighten the connection with a wrench. If the leak persists, check the washer/gasket inside the connector for proper seating or damage. Replace if necessary.

No Water Flow

- **Cause:** Water supply valve is off or partially closed.
- **Solution:** Ensure the main water supply valve and any inline shut-off valves are fully open.

WARRANTY INFORMATION
