TROUBLESHOOTING

If you encounter issues with your Frozen Concoction Maker, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	Not plugged in; power outlet malfunction; unit not assembled correctly.	Ensure the power cord is securely plugged into a working outlet. Check if the blending jar and ice reservoir are correctly seated.
Ice is not shaving.	Ice reservoir not properly seated; ice cubes are too large or frozen together; shaving blade obstructed.	Ensure the ice reservoir is correctly locked in place. Use standard-sized ice cubes. Check for any obstructions around the shaving blade (unplug first).
Ingredients are not blending smoothly.	Too much ice or too little liquid; ingredients are too thick.	Adjust the ratio of ice to liquid. Add more liquid if the mixture is too thick. Ensure the "Blend Only" or "Shave & Blend" mode is selected.
Loud noise during operation.	Improper assembly; foreign object in blending jar or ice reservoir.	Ensure all parts are securely assembled. Unplug the unit and check for any foreign objects.
