Lion Locks 1500

Lion Locks 1500 Key Lock Box Instruction Manual

Model: 1500

INTRODUCTION

The Lion Locks 1500 Key Lock Box provides a secure and convenient solution for key access. Designed for durability and ease of use, this lockbox is ideal for real estate agents, property managers, short-term rental hosts, and families needing shared access to keys. It features a customizable 4-digit combination and a robust construction to withstand various conditions.

PRODUCT FEATURES

- **Secure, Convenient Access:** Allows authorized users access without compromising security.
- **Heavy-Duty & Durable Design:** Crafted from rugged, rust-proof zinc metal, built to endure outdoor elements.
- **Protective Features:** Coated shackle prevents scratches, and protective back padding guards doors and handles from damage.
- **Easy-to-Use, Resettable Code:** Customize the 4-digit combination (10,000 possible codes) and reset it anytime for enhanced security.
- **Capacity:** Spacious design holds up to five standard keys.
- **Flexible Installation:** Fits securely on door handles, knobs, fences, and other access points.

(3.05cm)

Image: The interior of the lockbox is designed to comfortably hold up to five standard keys.

Image: The 4-digit combination mechanism offers 10,000 unique code possibilities for security.

SETUP

1. **Initial Code:** The lockbox is typically set to a default code (e.g., 0-0-0-0) from the factory.
2. **Open the Lockbox:** Enter the current combination and push the release lever on the side of the lockbox to open the compartment.
3. **Change the Combination:** Inside the open compartment, locate the reset lever (usually a small silver or black lever). Push this lever to the 'SET' position (or as indicated by an arrow).

4. **Set Your New Code:** While the reset lever is in the 'SET' position, rotate the combination dials to your desired 4-digit code. Choose a memorable but secure combination.
5. **Lock the New Code:** Push the reset lever back to its original 'LOCK' position. Your new combination is now set.
6. **Test the Code:** Scramble the dials, then enter your new code and push the release lever to ensure it opens correctly.

OPERATING INSTRUCTIONS

1. **Attaching the Lockbox:** To attach the lockbox to a door handle or gate, enter the correct combination and push the side release lever to open the shackle. Place the shackle around the desired fixture.
2. **Securing the Shackle:** Push the shackle back into the lockbox until it clicks securely into place. Scramble the dials to lock the shackle.
3. **Storing Keys:** With the lockbox compartment open, place your keys inside. Ensure they fit without obstructing the closing mechanism. The lockbox can hold up to 5 standard keys.
4. **Closing the Compartment:** Close the lockbox compartment lid firmly until it latches. Scramble the combination dials to secure the contents.
5. **Accessing Keys:** To retrieve keys, enter the correct 4-digit combination and push the side release lever to open the compartment. After retrieving keys, close the compartment and scramble the dials.

MAINTENANCE

To ensure the longevity and proper function of your Lion Locks 1500 Key Lock Box, follow these maintenance guidelines:

- **Cleaning:** Wipe the exterior with a soft, damp cloth to remove dirt and grime. Avoid abrasive cleaners or solvents that could damage the finish.
- **Lubrication:** Periodically apply a small amount of silicone-based lubricant to the shackle mechanism and combination dials to ensure smooth operation.
- **Weather Protection:** While the lockbox is designed for outdoor use, it is not water resistant. For prolonged exposure to harsh weather, consider placing it in a sheltered location to prevent moisture intrusion and potential damage to internal mechanisms or stored items.
- **Inspection:** Regularly inspect the lockbox for any signs of wear, damage, or corrosion. Ensure the shackle and compartment close securely.

TROUBLESHOOTING

- **Lockbox Not Opening:**
 - Ensure the correct 4-digit combination is entered. Double-check each dial.
 - Verify that the side release lever is fully depressed after entering the code.
 - If the dials are stiff, try lubricating them with a silicone spray.

- **Shackle Not Releasing/Locking:**

- Make sure the combination is correctly set before attempting to release the shackle.
- Ensure the shackle is aligned properly when pushing it back into the lockbox.
- Check for any debris or obstruction in the shackle mechanism.

- **Difficulty Changing Combination:**

- Ensure the lockbox is open and the reset lever is fully moved to the 'SET' position before changing the dials.
- Confirm the reset lever is returned to its original 'LOCK' position after setting the new code.

- **Keys Not Fitting:**

- The lockbox is designed for standard keys. Oversized key fobs or a large number of keys may not fit.
- Ensure keys are arranged neatly to allow the compartment to close completely.
