Key Features:

- Wall-to-wall mineral crystal lens for enhanced durability.
- Glossy black dial with a genuine diamond at the 12 o'clock position.
- Gold-tone hands and hour markers for clear readability.
- Comfortable black leather strap with a secure buckle closure.
- Reliable Japanese-quartz movement for accurate timekeeping.
- Water resistant to 30 meters (100 feet).

About Armitron:

Armitron has been a leader in watchmaking since 1975, known for combining technology with forward-thinking design. The brand is committed to making elegant and functional watches accessible, offering a wide range of high-quality timepieces.

2. SETUP AND INITIAL USE

Setting the Time:

1. Gently pull the crown (the small knob on the side of the watch case) outwards to the time-setting position.
2. Rotate the crown in either direction to move the hour and minute hands until the desired time is displayed.
3. Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Adjusting the Leather Strap:

The watch features a classic buckle closure for the leather strap. To adjust the fit:

1. Thread the end of the strap through the buckle.
2. Select the hole on the strap that provides a comfortable and secure fit on your wrist.
3. Insert the buckle pin into the chosen hole to fasten the strap.

3. OPERATING YOUR WATCH

Your Armitron watch is designed for straightforward operation. Once the time is set, the Japanese-quartz movement will keep accurate time. There are no additional complex functions to operate beyond setting the time.

4. MAINTENANCE AND CARE

Water Resistance:

This watch is water resistant to 30 meters (100 feet). This means it is suitable for everyday use and can withstand splashes or brief immersion in water. However, it is **not suitable for swimming, showering, bathing, or diving**. Avoid operating the crown while the watch is wet to prevent water intrusion.

Cleaning Your Watch:

To maintain the appearance of your watch:

- Wipe the watch case and crystal with a soft, dry cloth.
- For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals, as these can cause damage or discoloration. Wipe with a slightly damp cloth if necessary, then dry thoroughly.

Battery Replacement:

Your watch is powered by a product-specific battery (included). When the watch stops running, it indicates the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and maintain water resistance.

5. TROUBLESHOOTING

Watch Not Running:

- Ensure the crown is fully pushed in against the watch case. If it is pulled out, the watch will not run.
- If the crown is pushed in and the watch is still not running, the battery may need to be replaced. Refer to the 'Battery Replacement' section.

Time is Incorrect:

- Follow the 'Setting the Time' instructions to reset the watch to the correct time.
- If the time consistently becomes incorrect shortly after setting, this may indicate a low battery or a need for professional servicing.
