Baby Gate Help Guide

Do you need
a safety gate?

Be prepared: Even before your child is mobile, plan ahead. It's a great time to start thinking about installing child safety gates.

Types of Gates

PRESSURE MOUNTED

Pressure mounted gates use tension and wall cups to create a secure fit. Can fit wider openings using extensions - sold separately and are suitable for doorways, hallways and more.

HARDWARE MOUNTED

Hardware mounted gates are fixed into place and are great for doorways, hallways and stairs.

RETRACTABLE

Retractable gates roll into their housing and out of the way when not required providing a space efficient solution. Perfect for doorways, hallways and stairs.

CONVERTA® PLAY-PEN GATE

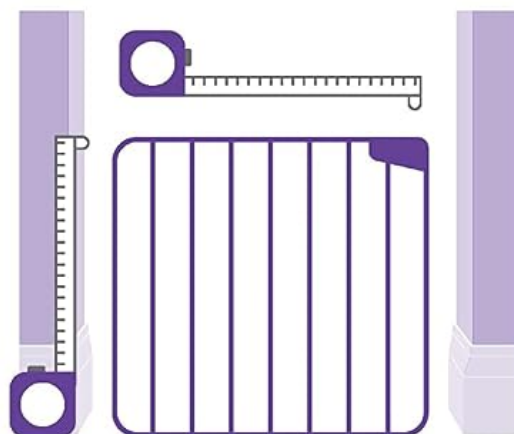

Converta® play-pen gates can be used as Hardware mounted barriers for extra-wide openings to provide restricted access to areas you want blocked off. These can also be converted to a play-pens to help provide a secure baby play space.

Locations

Look at your home's layout and identify any potential hazards, such as staircases or rooms with items like chemicals or sharp objects. If you have any areas that you want to keep off-limits, such as a home office, bathrooms, laundry rooms or a room with fragile items, a baby gate can help.

Measure your opening

Measure the width of the opening where you intend to install a safety gate and determine if extensions are required.

For pressure mounted gates, ensure there is adequate space for the tension bolts; tension bolts should not be extended any further than 6cm.
