Instruction Manual

Datalogic ADC HD3130-BKK1B Heron HD3130 USB Kit

Model: HD3130-BKK1B

Introduction

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Datalogic Heron HD3130 USB Kit. Please read this manual thoroughly before using the device to ensure proper functionality and to prevent damage.

Safety Information

Always observe the following safety precautions:

- Do not expose the device to extreme temperatures, humidity, or direct sunlight.
- Avoid dropping or subjecting the device to strong impacts.
- Use only the provided USB cable and stand.
- Do not attempt to disassemble or repair the device yourself. Refer to qualified service personnel.
- Keep the device away from liquids.

Package Contents

Verify that all items are present in the package:

Setup

Connecting the Scanner

1. Connect the USB cable to the port at the base of the Heron HD3130 scanner.
2. Connect the other end of the USB cable to an available USB port on your computer (Laptop or Desktop).
3. The scanner will power on and emit a series of beeps, indicating it is ready for use. Most operating systems will automatically install the necessary drivers.

Assembling the Stand

The stand allows for hands-free operation. Follow the instructions provided with the stand for assembly. Once assembled, place the scanner securely into the cradle of the stand.

Operating Instructions

Scanning Barcodes

The Heron HD3130 scanner is designed to read 1D barcodes. To scan a barcode:

1. Point the scanner's light beam at the center of the barcode you wish to scan.
2. Ensure the entire barcode is within the scanning area.
3. Press the trigger button on the scanner. A successful scan will be indicated by a beep and/or a green light.
4. The scanned data will be transmitted to your connected computer as keyboard input.

Operating Modes

The scanner typically operates in trigger mode (manual scan) or presentation mode (automatic scan when placed in the stand). Refer to the full programming manual (not included here) for details on configuring different operating modes using programming barcodes.

Maintenance

Cleaning the Scanner

To maintain optimal performance, keep the scanner's window clean. Use a soft, lint-free cloth lightly dampened with water or a mild, non-abrasive cleaner. Do not use harsh chemicals or abrasive materials.

Storage

When not in use, store the scanner in a cool, dry place, away from direct sunlight and extreme temperatures. Using the provided stand can help protect the scanner from accidental damage.

Troubleshooting

Problem	Possible Cause	Solution
Scanner not powering on.	USB cable not properly connected or faulty USB port.	Ensure USB cable is securely connected to both scanner and computer. Try a different USB port.
Scanner not reading barcodes.	Barcode damaged, scanner window dirty, or incorrect symbology enabled.	Check barcode integrity. Clean scanner window. Refer to the programming manual to enable required barcode symbologies.
Scanned data appears incorrectly.	Keyboard layout mismatch or data formatting issue.	Ensure your computer's keyboard layout matches the scanner's configuration. Consult the programming manual for data formatting options.
