NP99sp NewPower99 Battery Replacement Kit

INSTRUCTION MANUAL FOR GARMIN NUVI 2699

Model: Nuvi 2699, KI22BI31DI4G1, KI34BI40DI1UK

Product Overview

This NP99sp NewPower99 Battery Replacement Kit is designed to replace or provide a backup battery for your Garmin Nuvi 2699 GPS device. The kit includes an extended capacity 1100 mAh Lithium-Ion battery, necessary tools for installation, and video instructions to guide you through the process. It aims to give new life to your device by restoring its power capabilities.

Video: Official NewPower99 instructional video demonstrating battery replacement procedures for various devices, including GPS units. This video provides step-by-step guidance for installing your new battery.

General Steps (Refer to video for detailed instructions):

1. Power off your Garmin Nuvi 2699 device completely.
2. Using the provided tools, carefully open the device casing.
3. Locate and disconnect the old battery.
4. Remove the old battery from its compartment.
5. Insert the new NP99sp battery, ensuring proper alignment and connection.
6. Carefully reassemble the device casing.
7. Power on the device to confirm successful installation.

Operating Your Device with the New Battery

After successful installation, your Garmin Nuvi 2699 should power on and function normally. It is recommended to fully charge the new battery before its first extended use. The extended capacity 1100 mAh Lithium-Ion battery provides increased uptime compared to the original battery.

- **Initial Charge:** Connect your device to its charger and allow the battery to reach 100% charge.
- **Usage:** Use your GPS device as normal. The new battery is designed to provide reliable power for navigation and other functions.

Maintenance

To maximize the lifespan and performance of your new Lithium-Ion battery, consider the following maintenance tips:

- **Avoid Extreme Temperatures:** Do not expose your device to very high or very low temperatures, as this can degrade battery performance and lifespan.
- **Regular Charging:** Avoid completely draining the battery frequently. It is generally better to charge the battery when it reaches a low percentage (e.g., 20-30%) rather than letting it die completely.
- **Storage:** If storing the device for an extended period, ensure the battery is charged to about 50% to prevent deep discharge.

Troubleshooting

If you encounter issues after replacing the battery, consider these common troubleshooting steps:

- **Device Not Powering On:**

- Ensure the battery connector is securely seated.
 - Verify the battery has sufficient charge by connecting the charger.
 - Double-check all internal connections made during installation.
- **Battery Not Charging:**
 - Confirm the charger is working correctly and the charging port is clean.
 - Ensure the battery is properly connected internally.
 - **Short Battery Life:**
 - Ensure the battery is fully charged before use.
 - Review device settings that might be consuming excessive power (e.g., screen brightness, background apps).

If problems persist after attempting these steps, please contact customer support for further assistance.

Specifications

Feature	Detail
Brand	NP99sp
Model Compatibility	Garmin Nuvi 2699
Battery Type	Lithium Ion
