Nite Ize Figure 9 Tent Line Kit F9T4-03-01 Instruction Manual

Model: F9T4-03-01

Brand: Nite Ize

PRODUCT OVERVIEW

The Nite Ize Figure 9 Tent Line Kit provides a simple and effective method for tensioning and securing tent guy lines without the need for complex knots. This kit includes four lightweight Figure 9 devices and four 8-foot reflective guy lines, designed to enhance tent stability and visibility during outdoor activities.

Image: Nite Ize Figure 9 Tent Line Kit packaging. The kit contains four black Figure 9 devices attached to green reflective cords. A tent is visible in the background, illustrating the product's use for securing tent lines. A QR code is visible on the packaging, linking to additional product information.

FEATURES

- **Knot-Free Tensioning:** Allows for easy tightening and adjustment of lines without tying knots.
- **Reflective Guy Lines:** Includes four 8-foot (2.4m) green reflective cords for improved nighttime visibility, reducing tripping hazards.
- **Durable Construction:** Lightweight black plastic Figure 9 devices (2 grams each).
- **Versatile Compatibility:** Compatible with cord sizes from 1/16" to 3/16" (2mm to 5mm).
- **Integrated Instructions:** Engraved instructions on the Figure 9 device guide users through the tensioning process.

SETUP AND OPERATION

The Figure 9 offers two primary methods for securing lines: the Fixed End System and the Loop System.

Both methods are designed for quick and secure tensioning.

Image: Back of the product packaging illustrating the two main tightening techniques for the Figure 9 device. The "Fixed End System" shows how to secure one end of the rope to a fixed point, while the "Loop System" demonstrates creating an adjustable loop. Both methods are depicted with five sequential steps.

Fixed End System

1. Secure one end of the guy line to your tent or a fixed anchor point using a knot.
2. Pass the free end of the guy line through the larger opening of the Figure 9 device.
3. Loop the line around the smaller hook of the Figure 9.
4. Pull the line taut to achieve desired tension.
5. Secure the line by wrapping it around the serrated edge of the Figure 9, ensuring it locks into place.

Loop System

1. Create a loop in your guy line.
2. Pass the loop through the larger opening of the Figure 9 device.
3. Bring the loop around the smaller hook of the Figure 9.
4. Pull the free end of the line to adjust the size of the loop and achieve tension.

5. Lock the line by wrapping it around the serrated edge of the Figure 9.

The Figure 9 device has engraved instructions to guide you through these steps.

REFLECTIVE GUY LINES

The included 8-foot reflective guy lines are designed to increase visibility in low-light conditions, preventing accidental trips and enhancing safety around your tent.

Image: Reflective green guy lines attached to a tent, illuminated in the dark to show their high visibility. A Figure 9 device is visible securing the line near the tent base.

MAINTENANCE

The Nite Ize Figure 9 devices and reflective cords require minimal maintenance to ensure longevity and performance.

- Inspect devices and cords regularly for wear, fraying, or damage before each use.
- Clean with mild soap and water if necessary.
- Store in a dry place away from direct sunlight when not in use to prolong material life.

SAFETY INFORMATION

Warning:

- Not for use where disengagement could result in bodily injury or property damage.
- Not for climbing or load-bearing applications where failure could cause harm.
- Ensure the Figure 9 is properly secured and tensioned before relying on it.
- Always double-check connections, especially in windy conditions.

SPECIFICATIONS

Feature	Detail
Model Number	F9T4-03-01
Brand	Nite Ize
Material	Plastic (Figure 9 devices)
Item Weight	2.11 ounces (total kit)
Product Dimensions	3.8 x 0.2 x 2 inches (packaging)
Figure 9 Weight (each)	2 grams
Cord Length (each)	8 feet (2.4 meters)
Cord Type	Reflective Green
Compatible Cord Sizes	1/16" - 3/16" (2mm - 5mm)
Kit Contents	4 Figure 9 devices, 4 reflective cords
