## IMPRESA JE-MSRF-TP0C

# Impresa Products Replacement Gaskets for FoodSaver Vacuum Sealers

Model: JE-MSRF-TP0C | Brand: IMPRESA

## PRODUCT OVERVIEW

---

The Impresa Products Replacement Gaskets are designed to restore the optimal vacuum and sealing performance of your FoodSaver vacuum sealer. Over time, the original foam gaskets in your FoodSaver machine can deteriorate, leading to reduced suction and ineffective seals. This 4-pack of high-quality foam gaskets provides an excellent replacement solution, ensuring your vacuum sealer operates as intended.

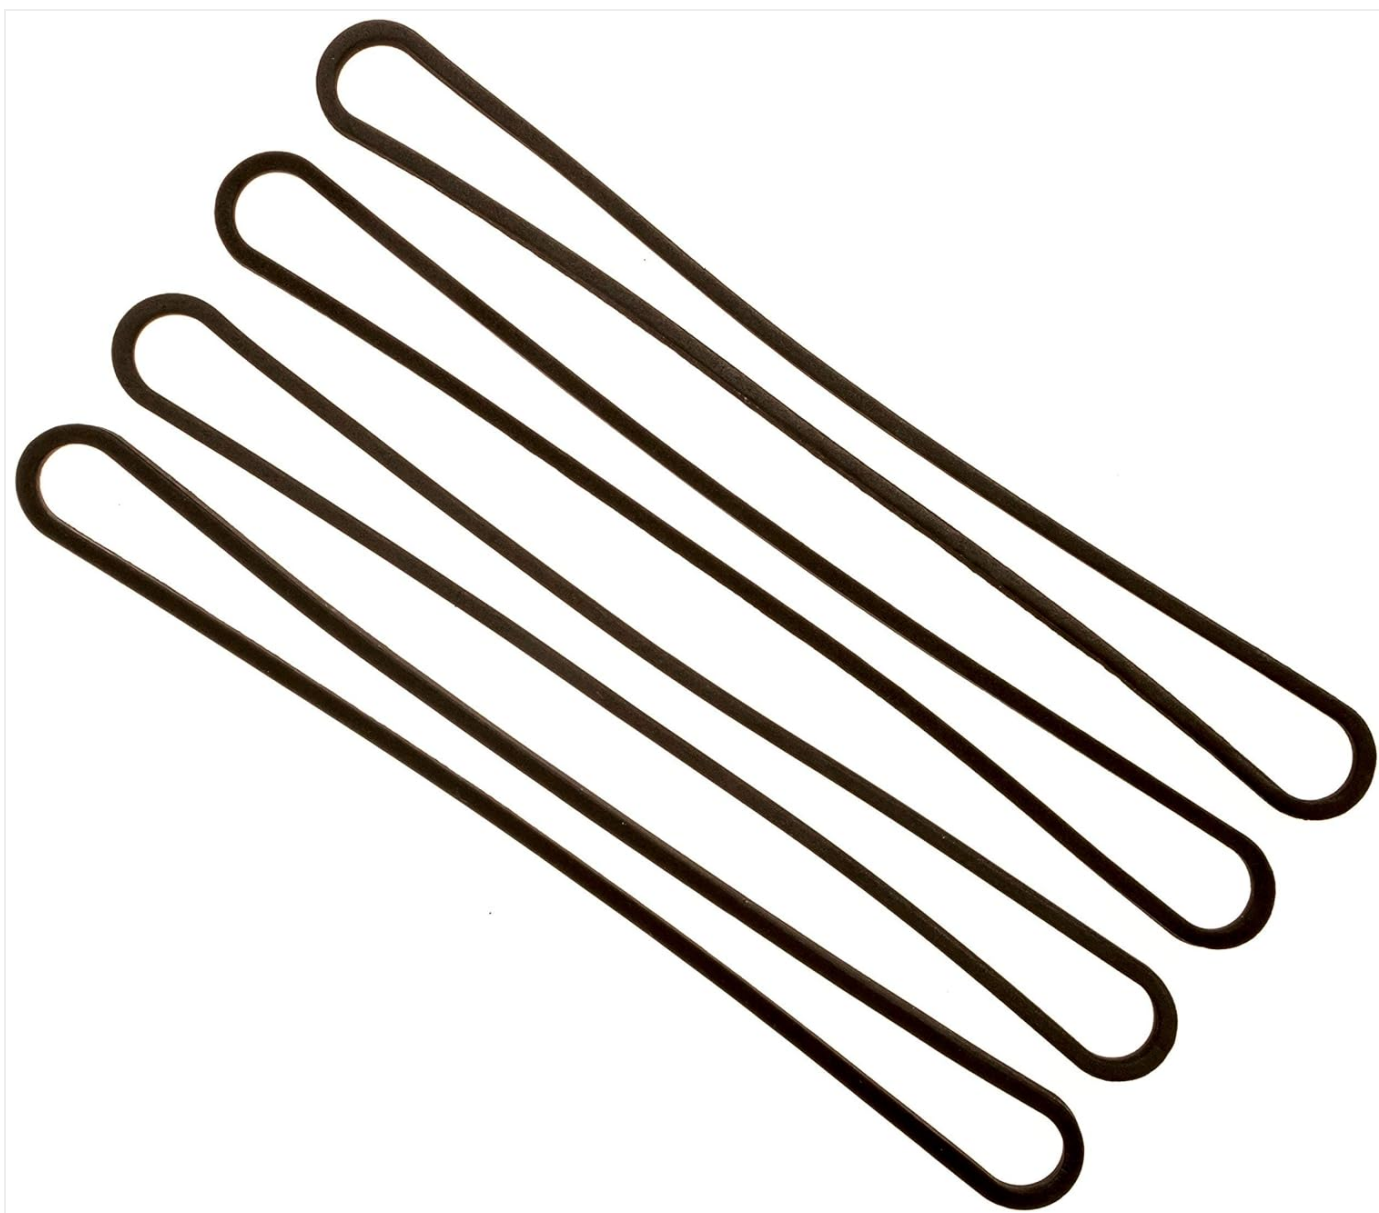

Image: Four black foam replacement gaskets, essential for maintaining vacuum sealer performance.

Each gasket is crafted from a specially designed foam blend to ensure the highest level of quality and durability. This product is a generic replacement manufactured and distributed by Impresa Products, designed to meet or exceed the quality of OEM gaskets.

## COMPATIBILITY

---

These replacement gaskets are compatible with a wide range of FoodSaver vacuum sealer models. They are designed to fit all models in the following series:

- **FoodSaver V2200 Series:** V2220, V2222, V2240, V2244, V2250, and others.
- **FoodSaver V2400 Series:** V2420, V2430, V2431, V2432, V2433, V2440, V2450, V2460, V2461, V2470, V2480, V2490.
- **FoodSaver V2800 Series:** V2820, V2830, V2835, V2840, V2841, V2860, V2865.
- **FoodSaver V3000 Series:** V3020, V3040, and others.
- **FoodSaver V3200 Series:** V3240, V3250, and others.
- **FoodSaver V3400 Series:** V3420, V3425, V3430, V3431, V3440, and others.
- **FoodSaver V3800 Series:** V3810, V3815, V3816, V3817, V3820, V3825, V3835, V3840, and others.

These gaskets correspond to FoodSaver part number T910-00075. Please note that this product is not for use with non-

FoodSaver vacuum sealers or FoodSavers that utilize rubber gaskets.

## SETUP AND INSTALLATION

---

Replacing the gaskets is a straightforward process. The primary purpose of these gaskets is to create an airtight seal necessary for effective vacuum sealing. When your FoodSaver machine experiences reduced vacuum strength or inconsistent seals, it is often an indication that the existing gaskets need replacement.

1. **Identify Gasket Location:** Locate the existing foam gaskets within your FoodSaver vacuum sealer. Depending on your model, there may be one or two gaskets.
2. **Remove Old Gaskets:** Carefully remove the old, deteriorated gaskets. They are typically held in place by friction or a simple groove.
3. **Clean Area:** Gently clean the area where the new gaskets will be installed to ensure no debris interferes with the seal.
4. **Install New Gaskets:** Press the new Impresa Products replacement gaskets firmly into their designated grooves. Ensure they are seated properly and lie flat.
5. **Dual Gasket Models:** For models that use two gaskets, it is recommended to replace both gaskets simultaneously for optimal performance and consistent sealing results.

## OPERATING PRINCIPLE

---

The Impresa Products replacement gaskets function by creating a tight, airtight seal between the vacuum sealer's lid and base, or within the vacuum channel itself. This seal is crucial for the vacuum pump to effectively remove air from the bag and for the heat sealer to create a permanent, airtight closure. A properly functioning gasket ensures maximum vacuum pressure is achieved, preserving food freshness and preventing spoilage.

## MAINTENANCE

While the gaskets themselves are designed for durability, their lifespan can be extended by ensuring the sealing area of your FoodSaver machine is kept clean.

- **Regular Cleaning:** After each use, wipe down the sealing area and around the gaskets with a damp cloth to remove any food particles or moisture.
- **Avoid Abrasives:** Do not use abrasive cleaners or sharp objects near the gaskets, as this can damage the foam material and compromise the seal.
- **Inspect Periodically:** Periodically inspect the gaskets for signs of wear, cracks, flattening, or stickiness. Replace them promptly if any damage is observed to maintain optimal performance.

## TROUBLESHOOTING

If you experience issues with your FoodSaver vacuum sealer after replacing the gaskets, consider the following:

Problem	Possible Cause	Solution
Poor vacuum or no vacuum	Gaskets not seated correctly; debris on gaskets; old gaskets not fully removed; incorrect gasket type.	Ensure gaskets are fully and evenly seated. Clean sealing area. Verify all old gasket material is gone. Confirm you are using foam gaskets for FoodSaver models.
Seal not holding	Gaskets are damaged or worn; bag not positioned correctly; moisture in sealing area.	Inspect gaskets for damage and replace if necessary. Reposition bag. Ensure sealing area is dry.
Machine making unusual noise but no vacuum	Significant air leak due to gasket issue.	Re-check gasket installation. If your model uses two gaskets, ensure both are replaced and properly installed.

If troubleshooting steps do not resolve the issue, please refer to your FoodSaver machine's original instruction manual or contact Impresa Products customer service for further assistance.

## SPECIFICATIONS

Attribute	Detail
Brand	IMPRESA
Model Number	JE-MSRF-TP0C
Color	Black
Material	Rubber (Foam Blend)

Attribute	Detail
Product Dimensions (L x W x H)	20.32 x 1.27 x 7.62 cm (8 x 0.5 x 3 inches)
Item Weight	28.35 grams (1 ounce)
Compatible Devices	FoodSaver V2200, V2400, V2800, V3000, V3200, V3400, V3840 Series
Number of Pieces	4
UPC	646341537609

## WARRANTY AND SUPPORT

---

Impresa Products stands behind its products with a commitment to customer satisfaction. While this is a generic replacement part and not covered by any FoodSaver manufacturer warranty, Impresa Products offers its own guarantee and first-class customer service.

For any questions, concerns, or support regarding your Impresa Products replacement gaskets, please contact Impresa Products directly. Refer to the packaging or the seller's information for contact details.
