HOMEFORT H-HB-C05HBL

HOMEFORT 5-Tier Wire Shelving Unit Instruction Manual

Model: H-HB-C05HBL

INTRODUCTION

Thank you for choosing the HOMEFORT 5-Tier Wire Shelving Unit. This durable metal storage rack is designed to provide versatile organization solutions for various spaces in your home or office. Constructed from powder-coated metal tubes and high-quality plastic connectors, it offers stability and resistance to rust and corrosion under normal use. This manual provides detailed instructions for assembly, usage, maintenance, and troubleshooting to ensure optimal performance and longevity of your shelving unit.

SAFETY INFORMATION

- **Weight Capacity:** Do not exceed the maximum weight capacity of 330 lbs (150kg) for the entire unit, or 66 lbs (30kg) per shelf, to ensure safe use and prevent potential hazards.
- **Stability:** Ensure the unit is placed on a flat, stable surface. For added stability, especially with heavy items or in areas prone to movement, consider securing the unit to a wall using appropriate hardware (not included).
- **Assembly:** Follow all assembly instructions carefully. Do not force parts together. Ensure all connections are secure before loading the shelves.
- **Children and Pets:** Keep children and pets away from the unit during assembly. Do not allow children to climb on the shelving unit.

PARTS LIST

Before beginning assembly, please verify that all parts are present and undamaged. If any parts are missing or damaged, please contact customer service.

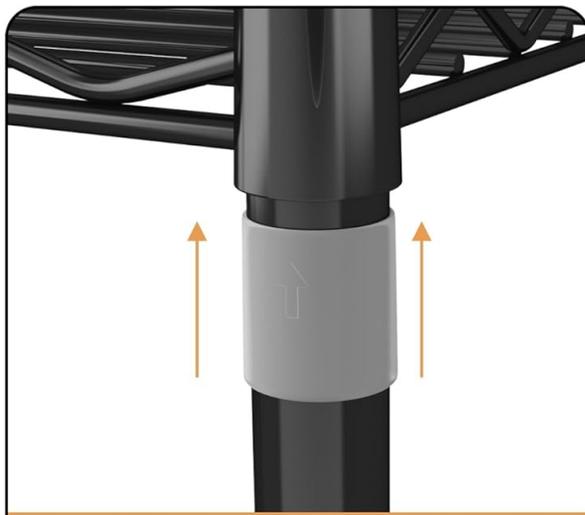

- Wire Shelves (5x)
- Support Poles (4x, segmented)
- Plastic Clips (multiple pairs)

- Plastic Feet (4x)
- Assembly Instruction Manual (1x)

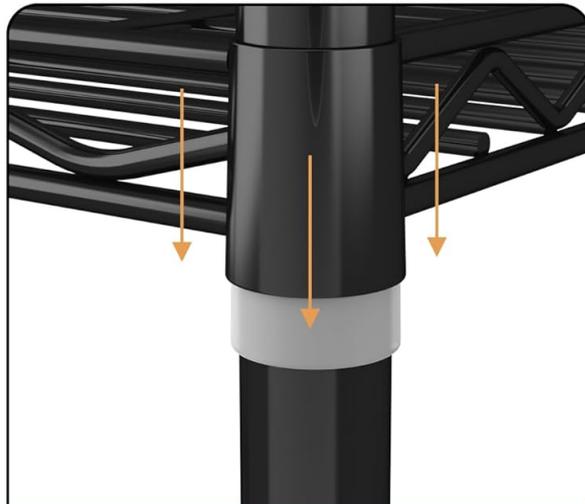

SETUP AND ASSEMBLY

The HOMEFORT 5-Tier Wire Shelving Unit is designed for quick and easy assembly without the need for additional tools. Follow these steps:

1. **Attach Plastic Feet:** Screw the four plastic feet into the bottom of the lower pole sections. These feet protect your floors from scratches.
2. **Assemble Lower Poles:** Connect the lower pole sections by screwing them together. Ensure they are tightly secured.
3. **Install Plastic Clips:** Determine the desired height for your first shelf. Snap two plastic clips onto each pole at the same height, ensuring the upward arrow mark on the clips points upwards.
4. **Place First Shelf:** Slide the first wire shelf down over the poles until it rests securely on the plastic clips. Gently press down on the mesh until it fits firmly into the buckle of the clips. Ensure the upper diameter of the shelf is small and the lower diameter is large, with the baffle facing upward to prevent items from sliding off.
5. **Repeat for Remaining Shelves:** Repeat steps 3 and 4 for the remaining four shelves, installing plastic clips at your desired heights and then placing the shelves. Note that the shelf height cannot be adjusted once the clips are in place.
6. **Connect Upper Poles:** Once all lower shelves are in place, connect the upper pole sections to the lower ones, then continue installing the remaining shelves.
7. **Final Check:** After all shelves are installed, gently push down on each shelf to ensure it is fully seated and stable.

Assemble the clips according to the upward arrow mark

Press gently until the mesh fits the buckle.

The upper diameter is small, the lower diameter is large, and the baffle is upward

Figure 1: Detailed view of plastic clip installation and shelf placement. Ensure clips are oriented with the arrow pointing upwards and the shelf mesh fits securely into the buckle.

Figure 2: The assembled 5-tier wire shelving unit with dimensions: 21 inches wide, 11.4 inches deep, and 54 inches high.

Assembly Video Guide

USAGE AND PLACEMENT

This versatile 5-tier shelving unit is suitable for various indoor environments and purposes. Its compact design makes it ideal for spaces requiring significant storage without occupying excessive floor area.

- **Recommended Uses:** Organize books, decorative items, kitchen utensils, liquor, shoes, pantry items, laundry supplies, and more.
- **Ideal Room Types:** Bathroom, bedroom, kitchen, living room, office, pantry, closet, doorway, entryway, garage, and laundry rooms.

- **Loading:** Distribute weight evenly across shelves. Place heavier items on lower shelves for increased stability.

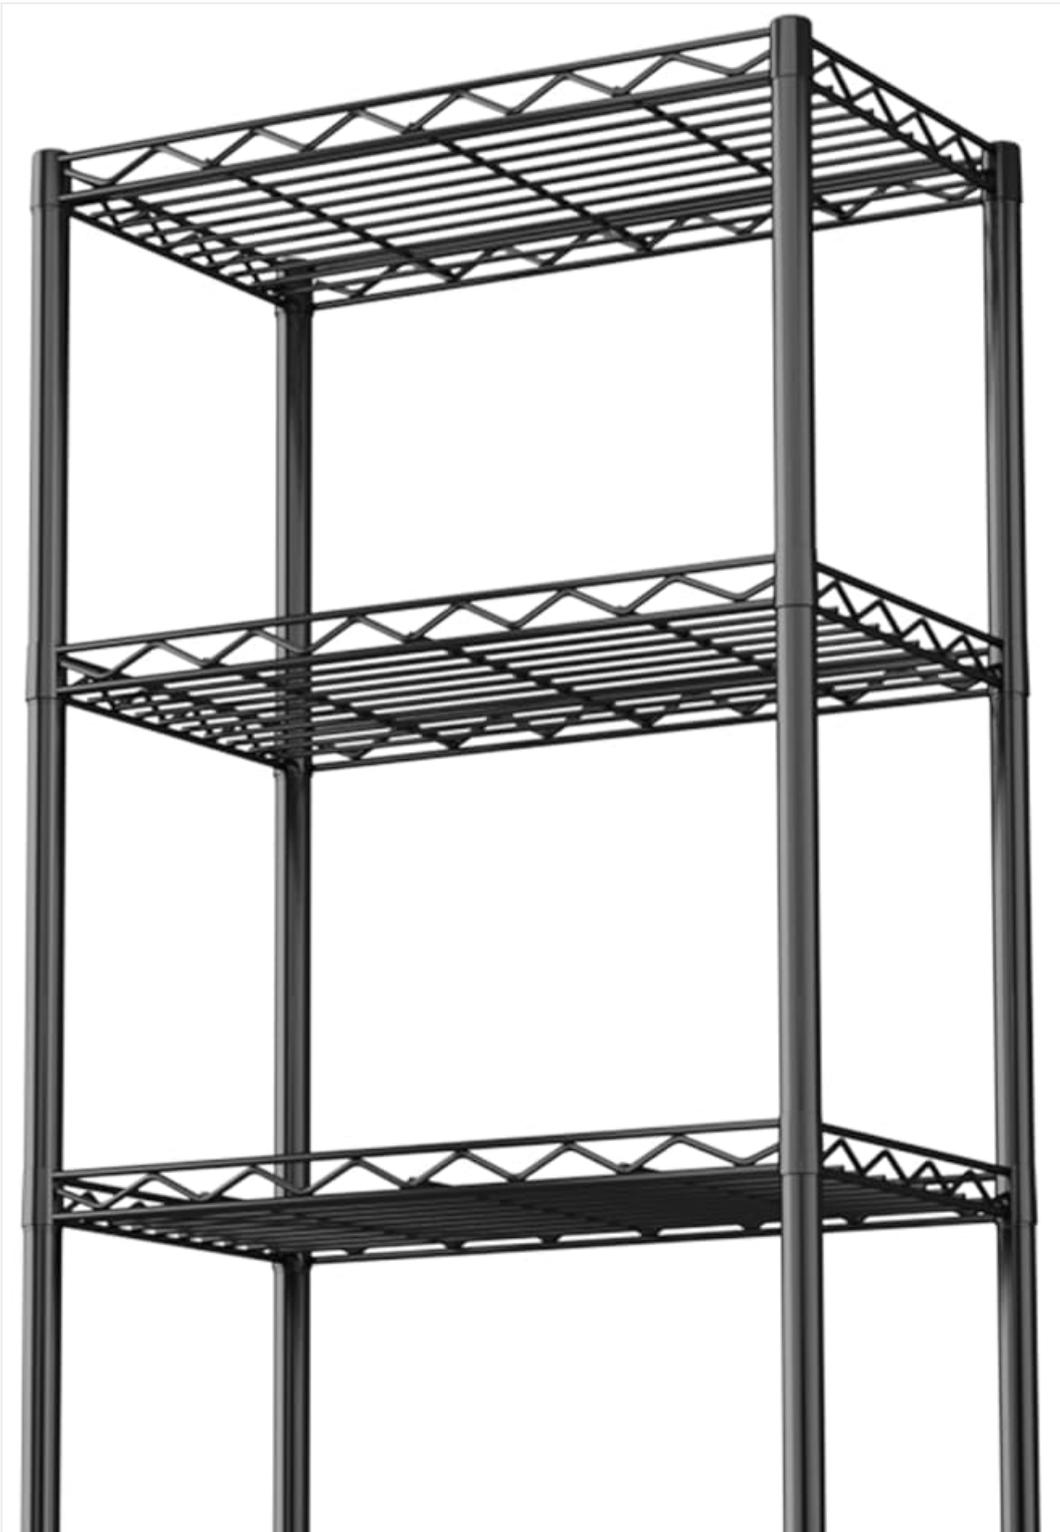

Figure 4: The shelving unit providing storage for bathroom essentials such as toiletries, towels, and cleaning supplies.

Figure 5: The shelving unit used in a living room, showcasing its ability to store books, decorative objects, and other household items.

MAINTENANCE AND CARE

To maintain the appearance and functionality of your HOMEFORT 5-Tier Wire Shelving Unit, follow these simple care instructions:

- **Cleaning:** Wipe the unit with a damp cloth to remove dust and dirt. Avoid using abrasive cleaners or harsh chemicals, which can damage the powder-coated finish.
- **Rust Prevention:** The powder-coated finish is designed to resist rust and corrosion under normal indoor use. Avoid prolonged exposure to excessive moisture or harsh outdoor conditions.
- **Inspection:** Periodically check all connections to ensure they remain tight and secure. Re-tighten if necessary.

TROUBLESHOOTING

If you encounter any issues with your shelving unit, please refer to the following common solutions:

- **Unit Wobbles:**

- Ensure the unit is placed on a level surface.
 - Verify that all pole sections are fully screwed together and all plastic clips are securely seated in the grooves.
 - Check that the shelves are fully pressed down onto the clips.
 - Consider securing the unit to a wall for enhanced stability, especially if it is heavily loaded or placed on an uneven floor.
- **Shelves Not Level:**
 - Ensure all plastic clips for a given shelf are installed at the exact same height on each pole.
 - Confirm that the shelf is fully seated on all clips.
- **Items Sliding Off:**
 - Ensure the shelves are installed with the baffle (raised edge) facing upward.
- **Missing or Damaged Parts:** If you find any parts missing or damaged upon opening the package, please contact our customer service team immediately for assistance.
