x-expression Ultra Braid

X-expression Premium Original Ultra Braid Hair Extensions User Manual

Model: Ultra Braid | Color: 1 | Length: 82 Inches

INTRODUCTION

Welcome to the user manual for your X-expression Premium Original Ultra Braid hair extensions. This guide provides essential information for the proper use, care, and maintenance of your product to ensure optimal results and longevity.

PRODUCT OVERVIEW

The X-expression Premium Original Ultra Braid is a high-quality synthetic hair extension designed for braiding. Key features include:

- **Super Light:** Designed for comfort during wear.
- **Tangle Free:** Engineered to minimize tangling during installation and wear.
- **Brushable:** Can be gently brushed for styling.
- **Length:** 82 inches, providing ample length for various braiding styles.
- **Material Feature:** Shiny finish.

Package Contents

Each pack contains 3 bundles of X-expression Premium Original Ultra Braid hair extensions.

PREPARATION BEFORE INSTALLATION

Proper preparation ensures a smooth installation process and optimal results.

Hair Preparation

1. Ensure your natural hair is clean, conditioned, and thoroughly detangled.
2. For best results, natural hair should be stretched or blown out to match the texture of the braiding hair.
3. Section your natural hair according to your desired braiding pattern.

Extension Preparation

1. Gently remove the X-expression Ultra Braid from its packaging.
2. Separate the strands carefully to avoid tangling. The hair is designed to be tangle-free, but gentle handling is recommended.
3. If desired, stretch the hair slightly to achieve a tapered end for a more natural look.

INSTALLATION INSTRUCTIONS

This section outlines the general steps for installing X-expression Ultra Braid hair extensions. Specific braiding techniques may vary.

1. Take a small section of your natural hair and a corresponding section of the X-expression Ultra Braid.
2. Securely attach the braiding hair to the base of your natural hair using your preferred braiding method (e.g., knotless braids, box braids, cornrows).
3. Braid down to the desired length, ensuring even tension to prevent discomfort or damage to your natural hair.
4. To seal the ends, dip the braided ends into hot water (ensure water is not boiling) for a few seconds, then pat dry. Alternatively, use a lighter to carefully seal the ends (exercise extreme caution).

MAINTENANCE AND CARE

Proper care extends the life of your X-expression Ultra Braid extensions and maintains their appearance.

Daily Care

- Gently separate braids daily to prevent matting.
- Use a light hair mousse or spray to keep braids moisturized and reduce frizz.
- Cover your hair with a satin scarf or bonnet at night to protect braids and minimize friction.

Washing Instructions

1. Dilute a mild shampoo with water.
2. Gently apply the diluted shampoo to your scalp and braids, focusing on the scalp. Do not scrub

vigorously.

3. Rinse thoroughly with cool water, ensuring all shampoo is removed.
4. Apply a light conditioner, focusing on the length of the braids. Rinse thoroughly.
5. Gently squeeze excess water from the braids with a towel. Allow to air dry completely. Avoid blow-drying on high heat.

Styling Tips

- The hair is brushable; use a wide-tooth comb or soft brush for gentle detangling if needed.
- Avoid excessive heat styling, as this is synthetic hair and can be damaged by high temperatures.
- For curling, use the hot water method or flexi-rods with hot water.

TROUBLESHOOTING COMMON ISSUES

Tangling

While designed to be tangle-free, some tangling may occur with prolonged wear or improper care.

- Ensure gentle handling during installation and daily maintenance.
- Use a light detangling spray or conditioner.
- Separate braids regularly.

Frizziness

Frizz can develop over time.

- Apply a light hair mousse or anti-frizz serum.
- Re-dip ends in hot water if necessary to smooth.

Itching

Some individuals may experience scalp itching.

- Rinse the braiding hair with apple cider vinegar solution before installation to remove alkaline coating.
- Use a soothing scalp oil or spray.
