Product Components

The Kokido Telsa 50 comes with the following components:

- Powerful motor with rechargeable battery (integrated)
- Transparent body
- Large debris cone with resistant stainless steel mesh
- Charger
- Interchangeable clip-in handle and connector (for use with a telescopic pole, not included)
- Pivoting suction head

Setup and Charging

Initial Charging

Before first use, fully charge the lithium battery. Connect the provided charger to the vacuum and a power outlet. The initial charge may take approximately **5 hours**. Subsequent charges will typically be shorter.

Assembly

1. Attach the pivoting suction head to the main vacuum body.
2. Insert the large debris cone into the transparent body. Ensure it is securely seated.
3. For handheld use, attach the clip-in handle. For extended reach, connect the appropriate connector for your telescopic pole (pole not included).

Operating Instructions

The Telsa 50 is designed for quick and efficient cleaning of pools and spas.

Vacuuming Debris

1. Ensure the vacuum is fully charged. A full charge provides approximately **45 minutes** of constant full power suction.
2. Submerge the vacuum into the water. The pivoting suction head allows for easy maneuvering on pool bottoms and steps.
3. Slowly move the vacuum across the surfaces to be cleaned. Debris will be collected in the large debris cone.

Draining Water

The vacuum features a quick drain system. When lifting the cleaner out of the pool or spa, water will automatically release, preventing excess weight and making removal easier.

Maintenance

Regular maintenance ensures the longevity and optimal performance of your Telsa 50 vacuum.

Cleaning the Debris Cone

1. After each use, remove the debris cone from the transparent body.
2. Empty any collected debris.
3. Rinse the debris cone and its stainless steel mesh thoroughly with a hose to remove fine particles.
4. Allow all components to air dry completely before reassembling or storing the vacuum.

Battery Care

- Store the vacuum in a cool, dry place when not in use.
- Avoid fully depleting the battery before recharging to prolong its lifespan.
- If storing for an extended period, charge the battery periodically (e.g., every 3-6 months) to maintain its health.

Troubleshooting

If you encounter issues with your Telsa 50, refer to the following common solutions:

Problem	Possible Cause	Solution
Reduced Suction Power	Clogged debris cone/filter; Low battery; Improper assembly.	Clean the debris cone and mesh thoroughly. Recharge the battery. Ensure all components are correctly assembled and sealed.
Vacuum Not Turning On	Battery not charged; Power button issue.	Ensure the battery is fully charged. Press the power button firmly. If the issue persists, contact customer support.
Debris Escaping Vacuum	Debris cone not properly seated; Internal flap issue.	Verify the debris cone is securely in place. Inspect any internal flaps for obstruction or damage.

Specifications

Feature	Detail
Model Name	Telsa 50
Model Number	EV50CBX/17/EU
Brand	Kokido
Power Source	Battery Powered (Rechargeable Lithium)
Battery Life	Minimum 45 minutes on a full charge
Capacity	0.65 Liters (debris cone)
Material	Stainless Steel (mesh)

Feature	Detail
Item Weight	1.76 pounds (0.8 Kilograms)
Product Dimensions	6.02 x 1.97 x 7.99 inches
UPC	844268010230
