KOTION EACH G4000 (Black/Red)

KOTION G4000 (Black/Red) Gaming Headset User Manual

Model: G4000 (Black/Red) | Brand: KOTION EACH

1. INTRODUCTION

Thank you for purchasing the KOTION G4000 (Black/Red) Gaming Headset. This manual provides detailed instructions for setting up, operating, and maintaining your headset to ensure optimal performance and longevity. Please read this manual thoroughly before using the product.

2. SAFETY INFORMATION

To prevent damage to your headset or injury to yourself, please observe the following safety precautions:

- Avoid prolonged listening at high volume levels to prevent hearing damage.
- Do not expose the headset to extreme temperatures, humidity, or direct sunlight.
- Keep the headset away from water and other liquids.
- Do not attempt to disassemble or modify the headset. This will void the warranty.
- Clean the headset with a soft, dry cloth only. Do not use harsh chemicals or abrasive materials.
- Keep out of reach of children.

3. PACKAGE CONTENTS

Please check the package for the following items:

- KOTION G4000 (Black/Red) Gaming Headset
- User Manual (this document)
- Audio/Microphone Splitter Cable (if applicable, for separate audio/mic jacks)

4. PRODUCT OVERVIEW

The KOTION G4000 is a wired gaming headset designed for immersive audio experiences. It features comfortable over-ear cups, an adjustable headband, and a flexible microphone.

Figure 4.1: Front view of the KOTION G4000 Gaming Headset, highlighting the earcups and microphone.

Figure 4.2: Side view of the KOTION G4000 Gaming Headset, showing the "KOTION EACH" branding on the earcup.

Figure 4.3: KOTION G4000 Gaming Headset with its flexible microphone extended forward.

Key Features:

- **Wired Connectivity:** Connects via 3.5mm audio jack and USB for power (for LED lights).
- **Integrated Microphone:** Flexible, noise-cancelling microphone for clear communication.
- **In-line Controls:** Volume control and microphone mute switch on the cable.
- **Comfortable Design:** Soft ear cushions and adjustable headband for extended wear.

5. SETUP

Follow these steps to set up your KOTION G4000 Gaming Headset:

1. **Identify Cables:** The headset has two 3.5mm audio jacks (one for audio, one for microphone) and one USB-A connector (for LED lighting). If your device has a single combined 3.5mm jack, use the included splitter cable.
2. **Connect Audio:**
 - For PCs with separate audio and microphone ports: Plug the green 3.5mm jack into your computer's audio output port (headphone icon) and the red 3.5mm jack into the microphone input port (microphone icon).

- For devices with a single combined 3.5mm jack (e.g., laptops, PS4 controllers, Xbox One controllers with adapter): Use the provided 3.5mm splitter cable. Plug both headset 3.5mm jacks into the splitter, then plug the splitter's single 3.5mm jack into your device.
- 3. **Connect USB (Optional):** Plug the USB-A connector into any available USB port on your computer or gaming console. This connection is solely for powering the LED lights on the headset earcups. The headset will function for audio and microphone without the USB connected, but the lights will not illuminate.
- 4. **Adjust Settings:** After connecting, you may need to adjust your device's audio settings to select the headset as the default playback and recording device.
 - **Windows:** Right-click the speaker icon in the taskbar, select "Sound settings" or "Playback devices," and set the headset as default. Do the same for "Recording devices."
 - **Mac:** Go to System Preferences > Sound, and select the headset for both Input and Output.

6. OPERATING INSTRUCTIONS

6.1. Volume Control

The headset features an in-line volume control wheel located on the cable. Rotate the wheel up to increase volume and down to decrease volume.

6.2. Microphone Mute

Next to the volume wheel on the in-line control, there is a switch to mute or unmute the microphone. Slide the switch to the "OFF" position to mute the microphone and to the "ON" position to unmute it.

6.3. Microphone Positioning

The microphone boom is flexible. Adjust its position so that the microphone is close to your mouth for optimal voice clarity, typically about 1-2 inches away.

6.4. Headband Adjustment

The headband is adjustable. Gently slide the earcups up or down along the headband to find a comfortable fit that fully covers your ears.

7. MAINTENANCE

Proper maintenance will extend the life of your headset:

- **Cleaning:** Use a soft, dry, lint-free cloth to wipe down the earcups and headband. For stubborn dirt, slightly dampen the cloth with water, but ensure no liquid enters the speaker grilles or microphone.
- **Storage:** When not in use, store the headset in a clean, dry place, away from direct sunlight and extreme temperatures. Avoid tangling the cable.
- **Cable Care:** Do not pull on the cable to disconnect the headset. Always grasp the plug itself. Avoid sharp bends or kinks in the cable.

8. TROUBLESHOOTING

If you encounter issues with your KOTION G4000 headset, try the following solutions:

Problem	Possible Cause	Solution
No audio from headset	Incorrect audio jack connection Volume too low Headset not selected as default playback device Faulty cable/port	Ensure green 3.5mm jack is fully inserted into the audio output port. Increase volume using the in-line control and your device's volume settings. Check sound settings on your device and set headset as default playback device. Try connecting to a different port or device to isolate the issue.
Microphone not working	Incorrect microphone jack connection Microphone muted Headset not selected as default recording device Microphone privacy settings	Ensure red 3.5mm jack is fully inserted into the microphone input port. Check the in-line mute switch and ensure it is in the "ON" position. Check sound settings on your device and set headset as default recording device. Verify microphone privacy settings in your operating system (e.g., Windows Privacy settings).
LED lights not illuminating	USB cable not connected Faulty USB port	Ensure the USB-A connector is securely plugged into a powered USB port. Try a different USB port on your device.
