## 4. OPERATING

---

This cable is designed for both charging and data synchronization with MFi certified Apple devices. Its MFi certification ensures complete compatibility and safe operation.

- **Charging:** When connected to a power source, the cable will charge your compatible Apple device. The charging speed depends on the power output of your charger.
- **Data Sync:** When connected to a computer, the cable allows for data transfer, such as syncing music, photos, and other files between your device and computer.

## 5. MAINTENANCE

---

To ensure the longevity and optimal performance of your cable, please follow these maintenance guidelines:

- **Avoid Extreme Bending:** While the nylon braided design offers enhanced durability, avoid sharp or excessive bending, especially near the connectors, to prevent internal wire damage.
- **Store Properly:** When not in use, coil the cable loosely and secure it with the included Velcro strap to

prevent tangling and kinking.

- **Keep Clean:** Keep the connectors free from dust, lint, and debris. Use a soft, dry cloth to gently wipe them if necessary.
- **Handle with Care:** Always pull from the connector head, not the cable itself, when unplugging from a device or power source.

## 6. TROUBLESHOOTING

If you encounter issues with your cable, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not charging.	Loose connection, faulty power source, dirty port.	Ensure cable is securely plugged into both device and power source. Try a different USB port or wall adapter. Clean the device's Lightning port gently.
Device not syncing data.	Loose connection, software issue, computer port issue.	Check all connections. Restart your computer and device. Try a different USB port on your computer. Ensure iTunes or Finder is updated.
"Accessory not supported" message.	Device software outdated, dirty port, rare cable defect.	Ensure your Apple device's iOS/iPadOS is up to date. Clean the device's Lightning port. As this cable is MFi certified, this message is unlikely unless there's a specific device or port issue.
Cable appears damaged.	Physical stress, improper handling.	Discontinue use immediately to prevent potential damage to your device. Replace the cable.
