SETUP

Connecting the Webcam

1. Place the webcam securely on top of your monitor or on a flat surface. The adjustable clip is designed to fit various screen thicknesses.
2. Connect the USB cable from the webcam to an available USB port on your computer (PC or Mac).
3. The webcam is designed for plug-and-play functionality and should be automatically recognized by your operating system. No additional driver installation is typically required.

TROUBLESHOOTING

No Image/Video

- Ensure the USB cable is securely connected to both the webcam and your computer.
- Try connecting the webcam to a different USB port on your computer.
- Restart your computer.
- Check your operating system's privacy settings to ensure camera access is enabled for your applications.
- Verify that the correct webcam (papalook PA150S) is selected as the video input device in your video conferencing software settings.

Poor Image Quality

- Adjust the manual focus ring on the lens until the image appears clear and sharp.
- Ensure there is adequate lighting in your environment. While the webcam has auto low light correction, sufficient ambient light significantly improves image quality.
- Clean the webcam lens with a soft, lint-free cloth to remove any dust or smudges.

No Audio/Poor Audio Quality

- Ensure the webcam's microphone is selected as the default audio input device in your computer's

sound settings and your application's audio settings.

- Check that the microphone is not muted in your system settings or within the application you are using.
- Speak clearly and within a reasonable distance from the webcam for optimal audio capture.
