6. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your range hood. Always disconnect power before performing any maintenance.

6.1 Cleaning the Filters

The aluminum mesh filters with stainless steel decorative panels are designed to trap grease and are dishwasher-safe. Clean them regularly (e.g., monthly, depending on usage) to maintain airflow and prevent grease buildup.

1. Carefully remove the filters from the range hood.
2. Place the filters in a dishwasher or wash them by hand with hot water and a mild detergent.

3. Ensure filters are completely dry before re-installing them.

6.2 Cleaning the Exterior

Wipe the stainless steel exterior surfaces with a clean cloth dampened with warm water and a mild, non-abrasive detergent. Dry thoroughly with a soft cloth. Avoid using abrasive cleaners or scouring pads, which can scratch the finish.

6.3 LED Lights

The LED lights are designed for long life. If replacement is ever needed, consult a qualified technician or the manufacturer's support for guidance.

7. TROUBLESHOOTING

Before contacting support, review the following common issues and solutions:

Problem	Possible Cause	Solution

Lights do not work.	No power, faulty LED, loose connection.	Check power supply. Ensure light button is pressed. If problem persists, contact support.
Poor suction performance.	Clogged filters, restricted ductwork, incorrect fan speed.	Clean or replace filters. Check ductwork for obstructions. Increase fan speed.
